Corruption, Party, and Government in Britain, 1702-1713 Aaron Graham, 2015 Corruption Party and Government in Britain 1702 1713 offers an innovative and original reinterpretation of state formation in eighteenth century Britain reconceptualising it as a political and fundamentally partisan process Focussing on the supply of funds to the army during the War of the Spanish Succession 1702 13 it demonstrates that public officials faced multiple incompatible demands but that political partisanship helped to prioritise them and to hammer out settlements that embodied a version of the national interest These decisions were then transmitted to agents in overseas through a mixture of personal incentives and partisan loyalties which built trust and turned these informal networks into instruments of public policy However the process of building trust and supplying funds laid officials and agents open to accusations of embezzlement fraud and financial misappropriation In particular although successive financial officials ran entrepreneurial private financial ventures that enabled the army overseas to avoid dangerous financial shortfalls they found it necessary to cover the costs and risks by receiving illegal gratifications from the regiments Reconstructing these transactions in detail Corruption Party and Government in Britain 1702 1713 demonstrates that these corrupt payments advanced the public service and thus that corruption was as much a dispute over ends as means Ultimately this volume demonstrates that state formation in eighteenth century Britain was a contested process of interest aggregation in which common partisan aims helped to negotiate

compromises between various irreconcilable public priorities and private interests within the frameworks provided by formal institutions and then collaboratively imposed through overlapping and intersecting networks of formal and informal agents
