## **Airline Business In The 21st Century:**

Airline Business in the 21st Century Rigas Doganis, 2005-06-28 This book focuses on the major issues that will affect the airline industry in this new millennium. It tells of an industry working on low margins and of cut-throat competition resulting from open skies. Among the issues discussed are the low cost airline, the impact of electronic commerce, the debate on global airline alliances, privatizing state-owned airlines, the creation of a Trans Atlantic Common Aviation area. Most importantly, the book carefully analyzes the strategies that are needed for airlines to succeed in the twenty-first century. This is essential reading for anyone interested in aviation.

**The Airline Business** Rigas Doganis, 2005-11-16 The second edition of Rigas Doganis' book brings the airline industry story up to date, exploring airline mergers and alliances, price wars, the impact of disasters, and the future prospects for the industry as a whole.

**The Airline Business in the Twenty-first Century** Rigas Doganis, 2001 *The Airline Industry* Alessandro Cento, 2008-10-15 The debate on the future of the aviation sector and the viability of its traditional business practices is the core of this book. The liberalization of the EU market in the 1990s has radically modified the competitive environment and the nature of airline competition. Furthermore, the new millennium began with terrorist attacks, epidemics, trade globalization, and the rise of oil prices, all of which combined to push the industry into a perfect storm. Airline industry profitability has been an elusive goal for several decades, and the recent events have only accentuated existing weaknesses. The main concern of industry observers is whether the airline business model successful during the 1980s and 1990s is now sustainable in a market crowded by low cost carriers. The airlines that will respond rapidly and determinedly to increase pressure to restructure, consolidate, and segment the industry will achieve competitive advantages. In this context, the present study aims to model the new conduct of the legacy carriers in a new liberalized European market in terms of network and pricing competition with low cost carriers and competitive reaction to the global economic crises.

**Airline Management** Paul Stephen Dempsey, Laurence E. Gesell, 2006 Strategic Management in the Aviation Industry Herbert Baum, Stefan Auerbach, 2017-07-05 This book provides a comprehensive overview of current strategic challenges and measures required to meet those challenges in a dynamic industry. Experts from aviation practice and management, in addition to acknowledged scholars, contribute to this volume and combine academic expertise with economic and business perspectives in an unprecedented way for the aviation field. The focus is not restricted to passenger airlines. The five parts of the book additionally include chapters on alliance management and formation, strategic issues for air freight carriers, and airport companies, as well as impacts the airline industry exerts on its environment. The book combines both concepts and results from recent academic research with applications and case studies from major industry players. Readership includes academics, students on advanced aviation courses, senior aviation professionals in airline, airport, and supplier companies, international organizations, and governmental agencies.
