Airpower Against an Army William F. Andrews, 1998 For nearly two decades the United States Air Force USAF oriented the bulk of its thinking acquisition planning and training on the threat of a Soviet blitzkrieg across the inter German border The Air Force fielded a powerful conventional arm well rehearsed in the tactics required to operate over a central European battlefield Then in a matter of days the 1990 invasion of Kuwait altered key assumptions that had been developed over the previous decade and a half The USAF faced a different foe employing a different military doctrine in an unexpected environment Instead of disrupting a fast paced land offensive the combat wings of the United States Central Command Air Forces CENTAF were ordered to attack a large well fortified and dispersed Iraqi ground force The heart of that ground force was the Republican Guard Forces Command RGFC CENTAF s mission dictated the need to develop an unfamiliar repertoire of tactics and procedures to meet theater objectives How effectively did CENTAF adjust air operations against the Republican Guard to the changing realities of combat Answering that question is central to this study and the answer resides in evaluation of the innovations developed by CENTAF to improve its operational and tactical performance against the Republican Guard Effectiveness and timeliness are the primary criteria used for evaluating innovations

Putney,2004 American air power is a dominant force in today s world Its ascendancy evolving in the half century since the end of World War II became evident during the first Gulf War Although a great deal has been written about military operations in Desert Shield and Desert Storm this deeply researched volume by Dr Diane Putney probes the little known story of how the Gulf War air campaign plan came to fruition Based on archival documentation and interviews with USAF planners this work takes the reader into the planning cells where the difficult work of building an air campaign plan was accomplished on an around the clock basis The tension among air planners is palpable as Dr Putney traces the incremental progress and friction along the way The author places the complexities of the planning process within the context of coalition objectives All the major players are here President George H W Bush General H Norman Schwarzkopf General Colin Powell General Chuck Horner and Secretary of Defense Richard Cheney The air planning process generated much debate and friction but resulted in great success a 43 day conflict with minimum casualties Dr Putney s rendering of this behind the scenes evolution of the planning process in its complexity and even suspense provides a fascinating window into how wars are planned and fought today and what might be the implications for the future C R Anderegg Director of Air Force History

Airpower in Small Wars James S. Corum, Wray R. Johnson, 2003 The use of airpower in wartime calls to mind the massive bombings of World War II but airplanes have long been instrumental in small wars as well Ever since its use by the French to put down rebellious Moroccan tribes in 1913 airpower has been employed to fight in limited but often lengthy small conflicts around the globe This is the first comprehensive history of airpower in small wars conflicts pitting states against non state groups such as insurgents bandits factions and terrorists tracing it from the early years of the twentieth century to the present day It examines dozens of conflicts with strikingly different scenarios the Greek Civil War the Philippine Anti Huk campaign French and British colonial wars the war in South Vietnam before the American escalation counterinsurgency in southern Africa Latin American counterinsurgency operations and counterinsurgency and counterterrorist campaigns in the Middle East over the last four decades For each war the authors describe the strategies employed on both sides of the conflict the air forces engaged and the specific airpower tactics employed They discuss the ground campaigns and provide the political background necessary to understand the air campaigns and in each case they judge the utility of airpower in its broadest sense In their historic sweep they show how forms of airpower evolved from planes to police helicopters aircraft of the civilian air reserve and today s unmanned aircraft They also disclose how small wars after World War II required new strategies operational solutions and tactics By taking this broad view of small war airpower the authors are able to make assessments about the most effective and least effective means of employing airpower They offer specific conclusions ranging from the importance of comprehensive strategy to the need for the United States and its allies to expand small wars training programs Airpower in Small Wars will be invaluable for educating military professionals and policy makers in the subject as well as for providing a useful framework for developing more effective doctrine for employing airpower in the conflicts we are most likely to see in the twenty first century

Comes of Age General Henry H. Arnold, 2004-10 This volume has richly enhanced General Henry H. Arnold's reputation as the father of today's United States Air Force. Major General John W. Huston himself an Army Air Forces combat veteran of the war has edited each of Arnold's World War II diaries and placed them in their historical context while explaining the problems Hap faced and evaluating the results of his travels. General Huston a professional historian has taught at both the US Air Force Academy and the US Naval Academy. A former Chief of the Office of Air Force History and an experienced researcher both here and abroad in the personal and official papers of the war's leaders he has been careful to let Hap speak for himself. The result is an account of the four year odyssey that took Arnold to every continent but one as he took part in deliberations that involved Allied leaders in major diplomacy strategy meetings with Franklin D. Roosevelt, Harry S. Truman, Winston Churchill, Josef Stalin, Charles de Gaulle and Chiang Kai-shek. At those meetings Hap recorded the comments of the various participants. His 12 diaries contain his own thoughts which range from being lost over the Himalayas to comforting the wounded as they were airlifted from the Normandy beaches. He experienced an air raid in London and viewed the carnage in recently liberated Manila. Arnold recorded his honest impressions from private meetings with King George VI in Buckingham Palace to eating from mess kits with his combat crews in the North African desert all while perceptively commenting on the many issues involved and assessing the people, the culture and the surroundings. This volume offers the best assessment we have of Hap as he survived four wartime heart attacks and continued to work tirelessly for proper recognition of airpower. It will also continue my emphasis while Chief of Staff of the US Air Force on encouraging professional reading through making historical accounts available to personnel of the finest air force in the world a success achieved in large part because of Hap Arnold. Ronald R. Fogleman, General, United States Air Force, Retired. [Military Air Power in Europe: Preparing for War](#) Norman Ridley, 2023-01-24 The First World War had seen the mechanization of warfare. Battle fronts had become immobilized in the grip of machine guns and heavy artillery leading to slaughter on an unprecedented scale. The end of the war saw exhausted governments extricating themselves from the carnage but some leaders were concerned that sooner or later another major war would follow. As France's Marshal Foch put it the Treaty of Versailles was only a twenty year truce. The overriding concern was to find ways in future of avoiding the kind of static battle fronts that had consumed so many in such futile efforts. Military aviation was seen as the one great innovation that had the potential to do this by revolutionizing warfare. It would not only augment the effectiveness of ground forces in a tactical role but it also had the means of reaching out strategically beyond the battlefronts to strike at the enemy's trade supplies, communications and industrial production. All through the war military aviation had been firmly under the control of army commanders but there was soon a fierce debate over the way it should develop. The development of an air doctrine within each of the major European powers was fraught with difficulty as the nascent air arms struggled with varying degrees of success to free themselves from army control to find a new independent identity. This book examines the way in which these

air arms competed for prominence within the military structures of six major European nations Germany Britain France Soviet Union Poland and Italy with different resources ambitions and philosophies in the years from the beginning of aviation right up to the start of the Second World War A Companion to American Military History James C. Bradford,2009-11-03 With more than 60 essays A Companion to American MilitaryHistory presents a comprehensive analysis of the historiographyof United States military history from the colonial era to thepresent Covers the entire spectrum of US history from the Indian andimperial conflicts of the seventeenth century to the battles inAfghanistan and Iraq Features an unprecedented breadth of coverage from eminentmilitary historians and emerging scholars including little studiedtopics such as the military and music military ethics care of thedead and sports Surveys and evaluates the best scholarship on every importanter a and topic Summarizes current debates and identifies areas whereconflicting interpretations are in need of further study *The Effectiveness of Airpower in the 20th Century* John F. O'Connell,2007-09 This volume looks at the air arms of seven nations engaged in World War II France Germany Great Britain Italy Japan the USSR and the United States Selected campaigns are discussed in detail to illustrate how national pre war airpower doctrine was applied and what results were achieved Preface US Air Power Thomas E. Mackin,1974 **Airpower and the Normandy Campaign** Michael Bechthold,2025-09-16 This essential work reframes the conversation about airpower in Normandy and offers a deeper understanding of its role in the Allied victory With fresh viewpoints for both scholars and practitioners of military history comprehensive research and expert analysis inspire further debate and exploration on the enduring legacy of airpower in modern warfare During the spring and summer of 1944 air superiority was essential for the success of Operation Overlord Allied air forces provided pivotal support across multiple domains from the elimination of the Luftwaffe and the protection of the invasion fleet to the tactical air support that facilitated ground operations Yet despite its undeniable significance the role of airpower has often been overshadowed by the more conventional ground battles The nuanced scholarship in this collection delves into complexities of air operations in Normandy through both traditional military histories and emerging perspectives Covering the roles of the Royal Air Force the U S Army Air Forces and the Luftwaffe and with an international scope that incorporates British American Canadian Australian French and German viewpoints a core theme throughout is the integrated nature of Allied air ground and naval forces during the campaign Using a joint or purple perspective the contributors highlight the interservice collaborations and the tensions that arose between them pointing out the operational dynamics essential to the overall success of the invasion Several case studies critically assess the successes and failures of airpower during the landings and the subsequent fighting and offer in depth analyses of specific air operations such as the bombing raids in the early days of the invasion the attack on Cherbourg and the effectiveness of U S heavy bombers in Operation Cobra The impact of airpower on French civilians particularly from bombing campaigns is another key theme underscoring the complex consequences of wartime aerial bombardment *United States Army in World War II.* ,1959 **Annual**
