Ak L 19 Animal Communication:

Playback and Studies of Animal Communication Peter K. McGregor, 2013-11-11 Playback is the technique of rebroadcasting natural or synthetic signals to animals and observing their response. The ability to present a putative signal in isolation without the potential confounding effects of other activities of the signaller is the main reason for the depth and range of our knowledge of communication systems. To date, playback of sound signals has predominated, but playback of electric signals and even video playback of visual signals suggests that playback will become just as prevalent in studies of communication in other sensory modalities. This book is one of the outcomes of a workshop on playback held at Thombridge Hall in the Peak District National Park, England, during August 1991. There were two reasons for organising the workshop. First, the considerable and lively debate in the literature about the design and analysis of playback experiments, the pseudoreplication debate, was in danger of generating more heat than light. A workshop forum seemed the obvious place to clarify and, if possible, resolve the debate. Second, with the number of new playback and analysis techniques increasing rapidly, it seemed an opportune moment to discuss these techniques and to review some rapidly developing areas of interest in sound communication. Information Circular, 1985. *Caribou Herds of Northwest Alaska, 1850-2000* Ernest S. Burch Jr., 2012-09-15 In his final major publication, Ernest S. Burch Jr. reconstructs the distribution of caribou herds in northwest Alaska using data and information from research conducted over the past several decades, as well as sources that predate western science by more than one hundred years. Additionally, he explores human and natural factors that contributed to the demise and recovery of caribou and reindeer populations during this time. Burch provides an exhaustive list of published and unpublished literature and interviews that will intrigue laymen and experts alike. The unflinching assessment of the roles that humans and wolves played in the dynamics of caribou and reindeer herds will undoubtedly strike a nerve. Supplemental essays before and after the unfinished work add context about the author, the project of the book, and the importance of both. Social Life in Northwest Alaska Ernest S. Burch, 2006 This landmark volume will stand for decades as one of the most comprehensive studies of a hunter-gatherer population ever written. In this third and final volume in a series on the early contact period Iupiaq Eskimos of northwestern Alaska, Burch examines every topic of significance to hunter-gatherer research, ranging from discussions of social relationships and settlement structure to nineteenth-century material culture. *Cephalopod Behaviour* Roger T.
