Albanian Collateral Law System Handbook:

Handbook on the Albanian Collateral Law Yair Baranes, Ronald C. C. Cuming, 2001-01-01 Since 1985 national economies have become increasingly integrated into a global network At the same time both population and production in developing countries are becoming concentrated in urban regions This in turn has generated demands for more local autonomy shifting more decision making to sub national levels Globalization is expected to continue leading to greater openness and international mobility of capital and people There are few reasons to believe that these trends will abate Acirc if anything they are likely to intensify the focus on cities and sharpen competition among these for international and local resources This volume underscores the transformative role of globalization and urbanization and shows the interplay between the two forces

A Guide to the World Bank, 2003 The World Bank Group works in more than 100 developing economies and is one of the world s largest sources of development assistance In 2002 the institution provided US 19 5 billion in loans to its client countries This guide reviews the organisation s history objectives and operations and looks at the five institutions that make up the World Bank Group the International Bank for Reconstruction and Development IBRD the International Development Association IDA the International Finance Corporation IFC the Multilateral Investment Guarantee Agency MIGA and the International Centre for Settlement of Investment Disputes ICSID

Secured Transactions Reform and Access to Credit Frederique Dahan, John Simpson, 2009-01-01 The book is unique It brings together articles on the economics and the law of property rights and combines these with case studies observations of what works and what does not and a checklist of things to watch for This is a very useful book that should appeal to reformers working in the field whether they are governmental officials trying to modernize their economies or economists and lawyers working in developmental agencies There are few other books or publications that bring together the views of experts working in this important albeit somewhat neglected area of financial sector plumbing

William P Armstrong *Banking and Finance Law Review* a well presented collection of interesting papers within which one finds a rich resource of information and perspectives on secured transactions reform from parts of the world which are often overlooked in comparative commercial law scholarship

Noel McGrath *Journal of Business Law* with its insightful analysis interesting empirical studies and knowledgeable team of contributors the book will be illuminating and useful not just for those interested in development but also anyone who has anything to do with granting credit and taking security

Dora S Neo *Singapore Journal of Legal Studies* This is an excellent unique book The material is very well written and presented in a carefully thought out coherent way It tells us a legal story of our own unique time Any lawyer working in transition economies whether or not directly on reform projects would find it of great interest Even economists should perhaps take a look at it

Roger McCormick *Law and Financial Markets Review* Secured transactions reform also known as collateral or pledge law reform is increasingly seen as an important building block for economic development The commonly held view is that the availability and cost of credit as well as the efficiency of

the market for secured credit are directly influenced by the laws affecting secured transactions and their implementation. However, there is still a lot of confusion about this relatively complex and technical area of the law and its role in promoting access to credit and economic growth. The chapters presented here provide for the first time a comprehensive and cutting edge view of the subject from both a legal and economic perspective. They start at the macro level of financial systems moving towards the behaviours of lenders, commercial banks and micro lenders, policy options for government and the mechanisms of collateral law reform. By approaching the subject from different angles and experiences, the work advocates an inclusive approach to the subject where all stakeholders' interests can be taken into account. It addresses the question of what role laws and institutions can play to encourage access to credit. This book will be of primary interest to those involved in economic development and the interaction between law and economics, either for practical reasons, for example working on reform or providing advice on investment in transition economies or for research purposes.
