Alchemy Revisited Z.R.W.M. von Martels, 2023-12-14 Alchemy revisited is an important collection of papers presented at an international congress held at the University of Groningen in April 1989 Among the scholars whose work is presented here are Prof N Sivin Chinese alchemy Prof B Vickers res and verba in Greek alchemy Profs K Figala and U Neumann with new material on Michael Maier Prof A G Debus on iatrochemistry and the chemical revolution and Prof M Crosland on alchemy in the Age of Enlightenment They and the other contributors give an unusually comprehensive survey of Indian Greek Arabic and European alchemy which will serve as an authoritative scholarly introduction to the subject for historians of science and related literature Prof J D North contributes a short lecture on Chaucer's Canon's Yeoman's Tale

Alchemical Mercury Karen Pinkus, 2009-11-09 How can we account in a rigorous way for alchemy's ubiquity We think of alchemy as the transformation of a base material usually lead into gold but alchemy is a word in wide circulation in everyday life often called upon to fulfill a metaphoric duty as the magical transformation of materials Almost every culture and time has had some form of alchemy This book looks at alchemy not at any one particular instance along the historical timeline not as a practice or theory not as a mode of redemption but as a theoretical problem linked to real gold and real production in the world What emerges as the least common denominator or intensive property of alchemy is ambivalence the impossible and paradoxical coexistence of two incompatible elements Alchemical Mercury moves from antiquity through the golden age of alchemy in the Dutch seventeenth century to conceptual art to alternative fuels stopping to think with writers such as Dante Goethe Hoffmann the Grimm Brothers George Eliot and Marx Eclectic and wide ranging this is the first study to consider alchemy in relation to literary and visual theory in a comprehensive way

Access to Western Esotericism Antoine Faivre, 1994-12-05 This is the first systematic treatment of esotericism to appear in English Here is also a historical survey beginning with the Alexandrian Period of the various esoteric currents such as Christian Kabbalah Theosophy Alchemy Rosicrucianism and Hermeticism Common characteristics of these currents are the notion of universal interdependency and the experience of spiritual transformation The author establishes a rigorous methodology provides clarifying definitions of

such key terms as gnosis theosophy occultism and Hermeticism and offers analysis of contemporary esotericism based on three distinct pathways The second half of the book presents a series of studies on several important figures works and movements in Western esotericism studies devoted to some of the most characteristic and illuminating aspects that this form of thought has taken such as theosophical speculations on androgyny rosicrucian literature and Masonic symbolism The book is completed by a rich and selective Bibliography conceived as a means of orientation and a tool for research Max Ernst and Alchemy M. E. Warlick, 2013-05-01 Surrealist artist Max Ernst defined collage as the alchemy of the visual image Students of his work have often dismissed this comment as simply a metaphor for the transformative power of using found images in a new context Taking a wholly different perspective on Ernst and alchemy however M E Warlick persuasively demonstrates that the artist had a profound and abiding interest in alchemical philosophy and often used alchemical symbolism in works created throughout his career A revival of interest in alchemy swept the artistic psychoanalytic historical and scientific circles of the late nineteenth and early twentieth centuries and Warlick sets Ernst s work squarely within this movement Looking at both his art many of the works she discusses are reproduced in the book and his writings she reveals how thoroughly alchemical philosophy and symbolism pervade his early Dadaist experiments his foundational work in surrealism and his many collages and paintings of women and landscapes whose images exemplify the alchemical fusing of opposites This pioneering research adds an essential key to understanding the multilayered complexity of Ernst s works as it affirms his standing as one of Germany s most significant artists of the twentieth century *DADA, Surrealism, and the Cinematic Effect* R. Bruce Elder, 2013-08-06 This book deals with the early intellectual reception of the cinema and the manner in which art theorists philosophers cultural theorists and especially artists of the first decades of the twentieth century responded to its advent While the idea persists that early writers on film were troubled by the cinema s lowly form this work proposes that there was another largely unrecognized strain in the reception of it Far from anxious about film s provenance in popular entertainment some writers and artists proclaimed that the cinema was the most important art for the moderns as it exemplified the vibrancy of contemporary life This view of the cinema was especially common among those whose commitments were to advanced artistic practices Their notions about how to recast the art media or the forms forged from those media s materials and the urgency of doing so formed the principal part of the conceptual core of the artistic programs advanced by the vanguard art movements of the first half of the twentieth century This book a companion to the author s previous *Harmony Dissent* examines the Dada and Surrealist movements as responses to the advent of the cinema *Theosophical Enlightenment* Joscelyn Godwin, 1994-10-28 This is an intellectual history of occult and esoteric currents in the English speaking world from the early Romantic period to the early twentieth century The Theosophical Society founded in 1875 by Helena P Blavatsky holds a crucial position as the place where all these currents temporarily united before again diverging The book s ambiguous title points to the author s thesis that Theosophy owed as much to the skeptical

Enlightenment of the eighteenth century as it did to the concept of spiritual enlightenment with which it is more readily associated The author respects his sources sufficiently to allow that their world so different from that of academic reductionism has a right to be exhibited on its own terms At the same time he does not conceal the fact that he considers many of them deluded and deluding In the context of theosophical history this book is neither on the side of the blind votaries of Madame Blavatsky nor on that of her enemies It may therefore be expected to mildly annoy both sides Character
