The Biology of Sin Matthew S. Stanford, 2010 Can I pray and believe enough to stop sinning There are heated discussions happening on the conflict between science and faith This disagreement tends to focus around three main issues one of them being what causes our sinful behavior The intense conflict has to do with biblically defined sinful behaviors and if there just might be a biological predisposition for these behaviors The Biology of Sin speaks to this debate and hopefully brings some resolution to the conflict As both a Christian and a neuroscientist Dr Stanford has seen scientific knowledge distorted to justify sinful behavior and perhaps more disturbingly he has seen Christians misuse Scripture to demonize and alienate the very ones they should be reaching out to He suggests that the underlying cause of this problem in the church is a lack of knowledge both of basic brain function and scriptural teaching The Biology of Sin

discusses sinful behaviors including adultery rage addiction and homosexuality asking of each What does science say and what does the Bible say about this behavior He then attempts to reconcile the fact that biological predispositions do play a role in behavior which the Bible defines as sinful while always emphasizing the authority of God s Holy Word and the abundant grace he has for those struggling with habitual sin **The Alchemy of Love and Lust** Theresa L.
