Care Medicine John M. O'Donnell, Flávio E. Nácul, 2009-11-18 We are honored to present the second edition of *Surgical Intensive Care Medicine* Our first edition was considered to be an important contribution to the critical care literature and received excellent reviews from *Critical Care Medicine* *Chest* and *Anesthesiology* In the second edition the basic organization

of the book remains unchanged being composed of 60 carefully selected chapters divided into 11 sections. The book begins with general topics in primary intensive care such as airway management and vascular cannulation followed by categories based on medical and surgical subspecialties. While the chapters discuss definitions, pathophysiology, clinical course, complications, and prognosis, the primary emphasis is devoted to patient management. The contents of the current edition have been comprehensively upgraded and the chapters retained from the first edition have been thoroughly updated, revised, or rewritten. In this second edition, some new topics have been added, including Postoperative Care of the Obese Patient, Postoperative Care of the Pancreas Transplant Patient, Optimization of High Risk Surgical Patients, Postoperative Alcohol Withdrawal Syndrome, Ethics and End of Life Issues, Improving the ICU, and Continuous Medical Education in Intensive Care Medicine. We are extremely fortunate to have high quality contributors, many of whom are nationally and internationally recognized researchers, speakers, and practitioners in Critical Care Medicine. An important feature of this latest edition is the geographical diversity of its authors. Most are based in the United States, but colleagues from Canada, England, Ireland, Germany, Belgium, Holland, France, Italy, Portugal, and Australia have also made notable contributions.

Surgery Jeffrey Norton, R. Randall Bollinger, Alfred E. Chang, Stephen F. Lowry, 2012-12-06. I had a dream. My dream was to assemble the current and future leaders in surgery and ask them to develop an evidence-based surgical textbook that would provide the reader with the most up-to-date and relevant information on which to base decisions in modern surgical practice. In other words, the dream was to create the best, most comprehensive textbook of surgery. Fortunately, I met Laura Gillan of Springer Verlag New York, who had a similar dream. As our editor, she has provided the foundation and structure for this dream. She has made this dream a reality. Because surgery is a highly specialized and diverse discipline with significant complexity, I also needed a commitment from outstanding surgeons to serve as coeditors. I was fortunate to have a diverse group of exceptional young, energetic, cutting-edge surgical investigators share in this project, and I wish to thank them for their valuable contribution to this undertaking. The Editorial Board, including Randy Bollinger, Fred Chang, Steve Lowry, Sean Mulvihill, Harvey Pass, and Robert Thompson, met for the first time at the American College of Surgeons meeting in Chicago in October 1997. (Fig. 1) There, this book was conceived. Each of us developed the plan and content for his specific surgical discipline. The common thread is that all decisions and recommendations are based on the best available evidence, and that the reader can clearly see the evidence in our Evidence-based tables, specifically marked for the reader's reference.
