*Progressive Commercialization of Airline Governance Culture* Jan Walulik, 2016-08-05 Progressive Commercialization of Airline Governance Culture analyzes the transition of the airline sector from the not for profit nation bound public utility model towards a profit oriented globalized industry It illustrates how legal political historical and cultural factors have shaped the corporate governance in the airline sector and describes how these factors influence economic decisions and performance The unique feature of the book is that the subject is consequentially discussed from the perspective of airline governance culture This approach links the examination of legal and policy factors which influence airline activities together with a discussion of economic issues all within one clear coherent and comprehensive framework

*Airline Network Development in Europe and its Implications for Airport Planning* Guillaume Burghouwt, 2016-03-23 The ongoing deregulation and liberalization of worldwide air transport markets confronts airport planners with an increasingly problematic context On the one hand the capital intensive large scale and complex airport investments need a detailed long medium term planning of airport infrastructure Such planning requires at least predictable traffic volumes and traffic composition within the planning horizon On the other hand airline route networks are increasingly dynamic structures that frequently show discontinuous changes As a consequence the much more volatile airport traffic restricts the value of detailed traffic forecasts Volatility of airport traffic and its composition requires flexibility of airport strategies and planning processes The book explores this dilemma through a detailed study of airline network development airport connectivity and airport planning in the deregulated EU air transport market The questions the book seeks to answer are how have airlines responded to the regime changes in EU aviation with respect to the configuration of their route networks what has been the impact of the reconfiguration of airline network configurations for the connectivity of EU airports how can airport planners and airport authorities deal with the increasingly uncertain airline network behaviour in Europe

**ITF Research Reports Liberalisation of Air Transport** International Transport Forum, 2019-05-03 Aviation is

one of the most regulated industries in the world Much of this regulation is safety related to mitigate the inherent risks tied with air transport But aviation is also subject to economic regulation that influences which airline flies which route at which frequency capacity and price It even stipulates the nationality of its owners and decision makers Aviation has freed itself from some restrictions over the past three decades with many benefits to society Yet liberalisation has also raised issues with regard to maintaining fair competition high labour standards and mitigating aviation's growing environmental impact

**Airline Survival Kit** Nawal K. Taneja, 2017-07-05 Reviews the challenges encountered by the airline industry plausible future prospects for global passenger growth and its regional distribution and alternative airline business models to capture and stimulate this traffic

**Introduction to Air Law** Pablo Mendes de Leon, 2022-08-11 The world of aviation has moved on rapidly since the appearance of the ninth edition of this pre eminent resource five years ago Those developments pertain to market access and market behaviour by air carriers including competition new perceptions of safety and security among others in relation to transparency of accident investigation and cybersecurity case law in the area of airline liability with new cases from the United States product liability and insurance the United Kingdom and elsewhere the growing importance of environmental concerns the rights and obligations of passengers also in the context of unruly passengers and innovative methods for financing aircraft Special attention has been paid in this edition to regional integration movements especially in Europe affecting the mentioned subjects The book's extensive references to other sources in the field have been expanded and updated by the author and experts in specialised areas The present edition addresses the following topics the regulatory framework governing the operation of air services including the principle of sovereignty in national airspace the distinction between State and civil aircraft dispute settlement in international civil aviation economic regulation of international air transport services including the establishment of air services agreements inter airline cooperation in the context of competition law regimes liability of the various service providers in particular airlines and related insurance coverage the promotion of safety standards criminal acts affecting the safety of aviation the role of international and regional organisations with particular reference to that of the European Union liability of the aircraft manufacturer for equipment and financial and security interests in mobile equipment The many practitioners officials business people and academics with a professional interest in aviation law will appreciate this new edition as one of the fundamental works in the field and newcomers will discover an incomparable resource This eleventh edition is ready to be of unmatched service to any practising member of the air law community anywhere in the world

**The Regulation of Air Transport** Barry Humphreys, 2023-04-17 The regulation of modern civil aviation can be traced back to the later years of the Second World War An intense debate about the future regulatory regime resulted in a compromise which to this day essentially dictates the structure of the global airline industry Further progress towards normalising the industry appears to be slowing down and perhaps even going into reverse Without an understanding of the development of regulation it is not possible to understand

fully the industry's current problems and how they might be resolved. Many books have been written about the development of international air transport covering deregulation, privatisation, the emergence of new business models among other things, but few if any have taken a broad view of the trends which have determined the industry's current structure. *The Regulation of Air Transport* charts the development of aviation from the end of the Second World War to the present day, following the key trends and disruptive forces. It provides an overview of what has determined the industry's current structure, the problems still facing the industry and the ways in which it could develop in the future. This wide-ranging study is important reading for both professionals and academics within the aviation field as well as anyone interested in the broader development of economic regulation.

**Strategies for Sustainable Air Services Development** Chrystal Zhang, Kareem Yarde, 2024-12-02. Routes are arguably the most valuable of airline assets. Although widely practised in the industry, the process of developing air connectivity has drawn very limited academic research. However, this book fills in this knowledge gap. *Strategies for Sustainable Air Services Development* unwraps the process of decision making in establishing airlinks from the airline's perspective as well as the roles of various stakeholders including airports, tourism authorities, tourist destination organizations, local investment agencies and regional development agencies. Developed from rigorous academic research and analysis of a myriad of data sources that include interviews, surveys and workshops with industry practitioners, it presents a framework of best practices that will serve as a toolkit and central resource point for industry professionals to initiate and establish airlinks to benefit air travellers and society at large. The first book of its kind, it presents the most comprehensive assessment available to date of all the intricacies involved in developing airlinks. The book will equip senior and middle managers, practitioners, policymakers and students with the practical skills and tools required to develop and design airlinks for the benefit of all stakeholders.

*Global Airlines* James Patrick Hanlon, 2007. Provides comprehensive insight into today's global airline industry, now in its 3rd edition.

*Straight and Level* Stephen Holloway, 2016-12-14. This third edition of *Straight and Level* thoroughly updates the previous edition with extensive comments on recent industry developments and emerging business models. The discussion is illustrated by current examples drawn from all sectors of the industry and every region of the world. The fundamental structure of earlier editions, now widely used as a framework for air transport management courses, nonetheless remains unchanged. Part 1 of the book provides a strategic context within which to consider the industry's economics. Part 2 is built around a simple yet powerful model that relates operating revenue to operating cost; it examines the most important elements in demand and traffic, price and yield, output and unit cost. Part 3 probes more deeply into three critical aspects of capacity management: network management, fleet management and revenue management. Part 4 concludes the book by exploring relationships between unit revenue, unit cost, yield and load factor. *Straight and Level* has been written primarily for masters-level students on aviation management courses. The book should also be useful to final-year undergraduates wanting to prepare for more advanced study. Amongst practitioners, it will appeal

to established managers moving from functional posts into general management More broadly anyone with knowledge of the airline industry who wants to gain a deeper understanding of its economics at a practical level and an insight into the reasons for its financial volatility should find the book of interest      *Work in Tumultuous Times* Vivian Shalla,Wallace Clement,2007-03-12 Using a progressive approach to political economy contributors propose alternative policies and practices that might secure more decent livelihoods for workers and their families      **Working in a Global Era** Vivian Shalla,2011-10-03 Now in its second edition this reader presents a critical examination of the changing structure of work in Canada and abroad Its focus is on the role of Canadian labour in the globalized world Contributors include David Livingstone Pat Armstrong Meg Luxton Dave Broad and other prominent Canadian scholars Each of the seven themed sections begins with a contextual introduction by Vivian Shalla and concludes with critical thinking questions and suggestions for further reading New to this edition All new content 14 up to date chapters reflecting the current state of research on work in Canada New section on informal care work More workplace based chapters that provide a view from the shop floor
