Monet, Narcissus, and Self-Reflection Steven Zalman Levine, 1994 Steven Z Levine provides a new understanding of the life and work of Claude Monet and the myth of the modern artist Levine analyzes the extensive critical reception of Monet and the artist s own prolific writings in the context of the story of Narcissus popular in late nineteenth century France Through a careful blending of psychoanalytical theory and historical study Levine identifies narcissism and obsession as driving forces in Monet s art and demonstrates how we derive meaning from the accumulated verbal responses to an artist s work

European Anti-Catholicism in a Comparative and Transnational Perspective Yvonne Maria Werner, Jonas Harvard, 2013-08-01 Tales about treacherous Jesuits and scheming popes are an important and pervasive part of European culture They belong to a set of ideas images and practices that when grouped under the label anti Catholicism represent a phenomenon that can be traced back to the Reformation Anti Catholic movements and sentiments crossed boundaries between European countries contributing to the early modern consolidation of national identities In the nineteenth century secularist movements adopted and transformed confessional criticism in a new internationalist dimension that was articulated across the whole Western world A variety of liberal conservative secular Protestant and other forces gave shape to this counter image taking on the function of a pattern from which one s own ideals and beliefs could be chiselled out The contributions to this volume show how different national contexts affected the proliferation of anti Catholic messages over the course of four centuries of

European history and demonstrate that anti Catholicism constituted a powerful European cross cultural phenomenon

Marketing Modernism in Fin-de-Siècle Europe Robert Jensen,2022-02-08 In this fundamental rethinking of the rise of modernism from its beginnings in the Impressionist movement Robert Jensen reveals that market discourses were pervasive in the ideological defense of modernism from its very inception and that the avant garde actually thrived on the commercial appeal of anti commercialism at the turn of the century The commercial success of modernism he argues depended greatly on possession of historical legitimacy The very development of modern art was inseparable from the commercialism many of its proponents sought to transcend Here Jensen explores the economic aesthetic institutional and ideological factors that led to its dominance in the international art world by the early 1900s He emphasizes the role of the emerging dealer gallery market and of modernist art historiographies in evaluating modern art and legitimizing it through the formation of a canon of modernist masters In describing the canon building of modern dealerships Jensen considers the new ideological dealer and explores the commercial construction of artistic identity through such rhetorical concepts as temperament and independent art and through such institutional structures as the retrospective His inquiries into the fate of the juste milieu a group of dissidents who saw themselves as true heirs of Impressionism and his look at a new form of art history emerging in Germany further expose a linear dealer oriented history of modernist art constructed by or through the modernists themselves *Van steentijd tot Nokia / druk 1* A. Pieterse,2006 The Symbolist Roots of Modern Art Michelle Facos,2017-07-05 With the words A new manifestation of art was expected necessary inevitable Jean Mor announced the advent of the Symbolist movement in 1886 When Symbolist artists began experimenting in order to invent new visual languages appropriate for representing modern life in all its complexity they set the stage for innovation in twentieth century art Rejecting what they perceived as the superficial descriptive quality of Impressionism Naturalism and Realism Symbolist artists delved beneath the surface to express feelings ideas scientific processes and universal truths By privileging intangible concepts over perceived realities and by asserting their creative autonomy Symbolist artists broke with the past and paved the way for the heterogeneity and penchant for risk taking that characterizes modern art The essays collected here which consider artists from France to Russia and Finland to Greece argue persuasively that Symbolist approaches to content form and subject helped to shape twentieth century Modernism Well known figures such as Kandinsky Khnopff Matisse and Munch are considered alongside lesser known artists such as Fini Gyzis Koen and Vrubel in order to demonstrate that Symbolist art did not constitute an isolated moment of wild experimentation but rather an inspirational point of departure for twentieth century developments **Nordic Landscape Painting in the Nineteenth Century** Torsten Gunnarsson,1998-01-01 This study identifies and analyzes the different types of landscape painting that dominated the Scandinavian countries in the 19th century The author shows how the wilderness became a symbol of Nordic strength as well as a counter image to industrialization and European urban culture
