Albert Einstein Maker Of Universes:

Albert Einstein Albert Einstein, 1948 *Albert Einstein* H. Gordon Garbedian, 2013-10 This is a new release of the original 1939 edition **Albert Einstein** Haig Gordon Garbedian, 1939 **Albert Einstein: Creator and Rebel** Banesh Hoffmann, 2019-08-10 Hoffmann does more than convey the emotional impact of Einstein's science on Einstein. He tries to make the general reader see the problems that concerned Einstein and understand the kinds of theories he constructed to solve them. This calls for scientific popularization of a high order. Hoffmann does it very effectively. Martin Klein and Robert Merton. The New York Times succeeds in catching some of Einstein's wholeness: the genius and the human being, the scientist and the responsible citizen. Peter Bergmann. Physics Today. What a rewarding and civilizing book for anyone interested in physics, its history and the look and smell of the whole era during which relativity and quantum physics established themselves. This is one of the few biographies of Einstein that gives an authentic view from close up. Gerald Holton. The Physics Teacher. This book deserves to become a best seller. I know of no other book on Einstein that gives so complete and well balanced a picture of that great man. Otto Robert Frisch. It is the very product of Einstein's brain that most clearly delineates the man and to get that across there is none better than Dr Hoffmann who can write so charmingly that even General Relativity sounds like a fun thing in its very profound simplicity. Isaac Asimov. Here is an excellent biography of Albert Einstein by a theoretical physicist with broad interests and a deep human understanding. Hoffmann builds a remarkably interesting and human picture of an extremely gifted man. Louis Green. Sky and Telescope *Bertrand Russell and Albert Einstein - Builders of Peace* Claudio Giulio Anta, Bertrand Russell and Albert Einstein had very different cultural backgrounds and personalities. At the same time they were united in their tenacious battle for peace. It began with the Great War and culminated in their famous 1955 Manifesto. Through various kinds of pacifism they sought to encapsulate the dilemmas and problems that derived from the changed political conditions of his time: the beginning of the Great War, the creation and failure of the League of Nations, the affirmation of totalitarian regimes, the outbreak of the Second World War, the origin of the atomic age and the escalation of the Cold War, the establishment of the UN with its political and institutional weakness and the need for a world government in the form of a world federation. Their reflections on the subject of peace led them into dialogue with some of the greatest figures of their time: R. Rolland, Th. Woodrow Wilson, V. I. Lenin, F. D. Roosevelt, J. F. Kennedy, N. Khrushchev, F. Castro, S. Freud, L. Szilard and E. Reves **My Time with Einstein** Stanley R. Cohen, 2012-09-05 Would you like to know the truth about Albert Einstein from a friend who really knew him? Much of what is reported by some historians about his life is consistent with his personal writings, but much is conjecture based on people who never knew him and they simply made up whatever the writers thought he must be like. After nearly two years of personal conversation directly with Einstein, I have tried to recall specific things about him which may be of interest to you. He needs to be remembered for the truth about his contributions to the whole world. He was indeed a rare bird *Lucy's Bones, Sacred*

Albert Einstein: Mind Beyond the Universe Fabricio Sales Silva, 2025-05-07 If I stand before you today it is not as a master but as an eternal learner a tireless curious who all his life has pursued the light of understanding in a world often overshadowed by ignorance and fear My journey though punctuated by discoveries that some call genius is more truly a series of lessons learned through questions some answered many still echoing in the vast universe Imagination is more important than knowledge For while knowledge defines everything we already know and understand imagination points to everything we are yet to discover and create Life imposes challenges and questions on us that cannot be answered merely by what is known One must dare to imagine dare to be different and dare to see the world not only as it is but as it could be I grew up in a time that didn't understand my visions I often felt isolated an outsider observing the world from an angle few seemed to share But it was this same isolation that taught me to value deep reflection and creative silence I don't have any special talents but I'm deeply curious My curiosity led me to explore not only science but the complex fabrics of human existence To the young to dreamers of all ages and backgrounds I say do not be afraid of error Just be afraid of getting stagnant Anyone who has never made a mistake has never tried something new It is vital that they maintain the ability to fail and through failure learn and grow

The Shock of Recognition Lewis Pyenson, 2020-10-12 In The Shock of Recognition Lewis Pyenson uses a method called Historical Complementarity to identify the motif of non figurative abstraction in modern art and science He identifies the motif in Picasso's and Einstein's educational environments He shows how this motif in domestic furnishing and in urban lighting set the stage for Picasso's and Einstein's professional success before 1914 He applies his method to intellectual life in Argentina using it to address that nation's focus on an inventory of the natural world until the 1940s its adoption of non figurative art and nuclear physics in the middle of the twentieth century and attention to landscape painting and the wonder of nature at the end of the century

Einstein in Bohemia Michael D. Gordin, 2022-02-22 Though Einstein is undoubtedly one of the most important figures in the history of modern science he was in many respects marginal Despite being one of the creators of quantum theory he remained skeptical of it and his major research program while in Princeton the quest for a unified field ultimately failed In this book Michael Gordin explores this paradox in Einstein's life by concentrating on a brief and often overlooked interlude his tenure as professor of physics in Prague from April of 1911 to the summer of 1912 Though often dismissed by biographers and scholars it was a crucial year for Einstein both personally and scientifically his marriage deteriorated he began thinking seriously about his Jewish identity for the first time he attempted a new explanation for gravitation which though it failed had a significant impact on his later work and he met numerous individuals including Max Brod Hugo Bergmann Philipp Frank and Arno t Kolman who would continue to influence him In a kind of double biography of the figure and the city this book links Prague and Einstein together Like the man the city exhibits the same paradox of being both central and marginal to the main contours of European history It was to become the capital of the Czech Republic but it was always compared to Vienna and Budapest less central in the Habsburg Empire Moreover it was home to a lively Germanophone intellectual and artistic scene though the vast majority of its population spoke only Czech By emphasizing the marginality and the centrality of both Einstein and Prague Gordin sheds new light both on Einstein's life and career and on the intellectual and scientific life of the city in the early twentieth century

the human brain its insurmountable malleability to adapt and learn its exquisite ability to allow multiple individuals to synchronize their minds around a task goal or belief and its incomparable capacity for abstraction Combining insights from such diverse fields as neuroscience mathematics evolution computer science physics history art and philosophy Nicolelis presents a neurobiologically based manifesto for the uniqueness of the human mind and a cautionary tale of the threats that technology poses to present and future generations
