Alcohol Tolerance And Dependence:

Alcohol Tolerance and Dependence Henk Rigter, John C. Crabbe, 1980-01-01 **Research Advances in Alcohol and Drug Problems** Reginald Smart, 2013-11-22 This book continues the series of reviews of research advances first published in 1974 The editors aim here is to present critical and integrative reviews by internationally recognized scholars of areas in which there has been much recent research In this task we have been greatly helped by the staff of Plenum Press and the Advisory Panel listed at the front of this volume Several members of the Panel have retired Dr W M D Paton Dr K Bruun Dr K F Killam and Dr J R Seeley Dr Klaus Makela has accepted our invitation to join the Panel Unfortunately one member of the Panel Professor William McGlothlin died as a result of a tragic accident He was a gifted and sensitive researcher His work over many years was well known to those studying alcohol and drug problems We want to acknowledge his contributions to the Research Advances Series and to the field in general The editors wish to acknowledge the help of Julliana Newell Ayoub in preparation of this volume This volume contains three papers by H Fingarette R Room and B Kissin on The Disease Concept They were originally prepared for an earlier volume but could not be included because of scheduling problems The editors and not the authors are responsible for this delay Because they are primarily philosophical and theoretical in nature they are not diminished in value by the lesser number of references to recent research **Psychopharmacology Abstracts**, 1980 *Alcohol Metabolism, Alcohol Intolerance, and Alcoholism* Dharam P. Agarwal, H. Werner Goedde, 2012-12-06 Alcohol abuse alcohol intolerance alcohol dependence and other alcohol related disabilities are some of the most challenging public health problems facing our modern day society The purpose of this comprehensive monograph is to review the available knowledge concerning the pharmacogenetic basis of alcohol sensitivity and its physiological implications and to synthesize the bulk of existing knowledge regarding metabolic features and biomedical disturbances related to alcoholism The chapters cover a broad array of disciplines including an overview of historical and epidemiological aspects biochemistry and molecular genetics of enzymes involved in alcohol metabolism biochemical and neuropsychopharmacological effects of alcohol Major emphasis is placed on the role of genetic factors in alcoholism The experimental details are summarized and a comprehensive bibliography is included **The Pharmacology of Alcohol Abuse** Henry R. Kranzler, 2012-12-06 In recent years alcohol abuse has received increased international attention Such attention is justified by the enormous negative impact that this disorder has on health as well as on economic and social well being Governmental and other sources of research support have promoted substantial investigation into the negative consequences of alcohol examining both animal models and human subjects Consequently there has been a virtual explosion of preclinical and clinical data much of it focused on alcohol's pharmacologic effects However there have been few efforts to integrate this wealth of new information into a single manageable volume This volume provides an up to date in depth treatment of the pharmacology of alcohol particularly as it relates to alcohol abuse The overriding theme of the book is the interplay between the preclinical and

clinical domains Increasingly these areas of investigation have served to inform one another a trend that can be expected to grow with time The topics covered include the effects of alcohol on biological systems and the impact of medications on those effects In addition recent insights obtained from molecular biological investigations are discussed in terms of their relevance for understanding the effects of alcohol at the cellular level and the implications of these for the development of medications Consideration is also given to important methodological issues that influence the evaluation of medications in the context of clinical trials

The Pharmacology of Alcohol and Alcohol Dependence Henri Begleiter, Benjamin Kissin, 1996 This is a comprehensive review of the pharmacological effects of alcohol and the mechanisms underlying the pathogenesis of alcoholism The book draws on general pharmacology neuropharmacology and alcohol studies to explore its theme The second volume in the ALCOHOL AND ALCOHOLISM series it focuses on the pharmacologic mechanisms underlying the development of alcoholism The first section on basic pharmacology is concerned with those aspects that are common to all of alcohol's effects These include pharmacokinetics general metabolism and cross tolerance The second section on neuropharmacology describes the effects of alcohol on various brain functions including circulation and metabolism The third section provides an in depth review of the neurobiology of physical dependence withdrawal and physiological tolerance The book as a whole gives a comprehensive and authoritative picture of the complex pharmacologic actions of alcohol particularly on the nervous system For clinicians and researchers in the field of alcohol and alcoholism it will serve as a fundamental reference

Alcohol Health and Research World, 1997 **Alcohol Research & Health**, 1997 *Research Awards Index*, 1989 **Dispelling the Myths About Addiction** Institute of Medicine, Committee to Identify Strategies to Raise the Profile of Substance Abuse and Alcoholism Research, 1997-12-10 Every year about half a million men women and children in the United States die from the effects of using nicotine alcohol and illegal drugs one of every four American deaths Yet research to solve this terrible problem is often perceived as less important than other types of biomedical investigation Focusing on four major classes of drugs with the greatest social and economic impact nicotine alcohol opioids and stimulants **Dispelling the Myths About Addiction** examines what is known about addiction and what is needed to develop a talented cadre of investigators and to educate the public about addiction research The committee explores these areas Economic costs of addiction What has been learned about addiction from research into basic neurobiology and the brain psychosocial and behavioral factors and epidemiology Education and training of researchers and the research infrastructure Public perceptions and their impact on public policy in this field This volume outlines the challenges and opportunities in addiction research today and makes recommendations to educators treatment professionals public and private institutions and others for how to build support for addiction research and treatment Biomedical Index to PHS-supported Research, 1990
