Haberman,1984 This pioneering volume describes the first longitudinal study of alcoholic men and women in the professions Based on personal interviews with 407 professionals over a five year period the book offers the first published data on alcoholic attorneys and the only follow up study on alcoholic physicians nurses dentists and social workers In addition the authors provide an international directory of support advocacy and disciplinary groups for alcoholic professionals with complete information on whom to contact and requirements for membership *The Biology of Alcoholism* Benjamin Kissin,Henri Begleiter,2013-03-09 In this volume the third of our series the emphasis has shifted from the theoretical and experimental to the more clinical and practical aspects of alcoholism Where in the earlier volumes more attention was directed to animal than human studies in this volume almost all material deals with the human condition The clinical manifestations of alcoholism may be divided into two major aspects that of the disease itself and that of its complications This separation is to some extent artificial since in a sense the natural history of the disease is a function of the development of certain complicating mechanisms These mechanisms in turn either become part and parcel of the underlying condition alcoholism or give rise to a new set of clinical variables characterized as medical complications At this point the dichotomy becomes real The disease alcoholism tends to be seen as a distinct psychosocial entity and to be treated with psychosocial techniques The medical complications are more clearly envisioned as being within the legitimate domain of medical practice and are treated by physicians who often tend to ignore the underlying alcoholism The patient is sometimes lost in between The major thrust of this volume is an attempt to describe the mechanisms of alcoholism as they are now known in such a way as to establish a continuum between the disease alcoholism and its medical complications **Current Issues in Alcohol/drug Studies** ,1989 In this new volume experts focus on a number of important issues of current interest and controversy Is alcoholism a disease or is it not Should federal bans on drugs like heroin and cocaine be removed and will that solve modify or exacerbate the problem Can the risk for alcoholism really be predicted Professionals from a very wide variety of disciplinesmedicine and biochemistry psychiatry and psychology philosophy anthropology law social work and journalismpresent their very differing points of view on the perception of alcoholism as a disease and on public policy issues like proposed legislative controls over alcoholic beverages **Thesaurus of ERIC Descriptors** ,1968 4th 7th eds contain a special chapter on The role and function of the thesaurus in education by Frederick Goodman Addiction and the Making of Professional Careers Griffith Edwards,Thomas F.
