Aldo Leopold Curt D. Meine,2010-10-19 This biography of Aldo Leopold follows him from his childhood as a precocious naturalist to his profoundly influential role in the development of conservation and modern environmentalism in the United States This edition includes a new preface by author Curt Meine and an appreciation by acclaimed Kentucky writer and farmer Wendell Berry Justice and the Earth Eric T. Freyfogle,1995 An eloquent case against accepted notions of private property and free markets is at the heart of this finely argued plea for basic changes in the ways humans view the Earth Justice and the Earth urges people to envision an integrated tapestry of natural systems for which they are responsible rather than an economic resource they own The Fish and Wildlife Job on the National Forests Theodore Catton,1998 A Natural History of Nature Writing Frank Stewart,2012-07-11 A Natural History of Nature Writing is a penetrating overview of the origins and development of a uniquely American literature Essayist and poet Frank Stewart describes in rich and compelling prose the lives and works of the most prominent American nature writers of the 19th and 20th centuries including Henry D Thoreau the father of American nature writing John Burroughs a schoolteacher and failed businessman who found his calling as a writer and elevated the nature essay to a loved and respected literary form John Muir founder of Sierra Club who celebrated the wilderness of the Far West as few before him had Aldo Leopold a Forest Service employee and scholar who extended our moral responsibility to include all animals and plants Rachel Carson a scientist who raised the consciousness of the nation by revealing the catastrophic effects of human intervention on the Earth s living systems Edward Abbey an outspoken activist who charted the boundaries of ecological responsibility and pushed these boundaries to political extremes Stewart highlights the controversies ignited by the powerful and eloquent prose of these and other writers with their expansive and often strongly political points of view Combining a deeply felt sense of wonder at the beauty surrounding us with a rare ability to capture and explain the meaning of that beauty nature writers have had a profound effect on American culture and politics A Natural History of Nature Writing is an insightful examination of an important body of American literature **Green Voices** Richard D. Besel,Bernard K. Duffy,2016-02-25 The written works of nature s leading advocates from Charles Sumner and John Muir to Rachel Carson and President Jimmy Carter to name a few have been the subject of many texts but their speeches remain relatively unknown or unexamined Green Voices aims to redress this situation After all when it comes to the leaders heroes and activists of the environmental movement their speeches formed part of the fertile earth from which uniquely American environmental expectations assumptions and norms germinated and grew Despite having in common a definitively rhetorical focus the contributions in this book reflect a variety of methods and approaches Some concentrate on a single speaker and a single speech Others look at several speeches Some are historical in

orientation while others are more theoretical In other words this collection examines the broad sweep of US environmental history from the perspective of our most famous and influential environmental figures This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/7126>

Facing the Abyss George Hutchinson, 2018-01-23 Mythologized as the era of the good war and the Greatest Generation the 1940s are frequently understood as a more heroic uncomplicated time in American history Yet just below the surface a sense of dread alienation and the haunting specter of radical evil permeated American art and literature Writers returned home from World War II and gave form to their disorienting experiences of violence and cruelty They probed the darkness that the war opened up and confronted bigotry existential guilt ecological concerns and fear about the nature and survival of the human race In *Facing the Abyss* George Hutchinson offers readings of individual works and the larger intellectual and cultural scene to reveal the 1940s as a period of profound and influential accomplishment *Facing the Abyss* examines the relation of aesthetics to politics the idea of universalism and the connections among authors across racial ethnic and gender divisions Modernist and avant garde styles were absorbed into popular culture as writers and artists turned away from social realism to emphasize the process of artistic creation Hutchinson explores a range of important writers from Saul Bellow and Mary McCarthy to Richard Wright and James Baldwin African American and Jewish novelists critiqued racism and anti-Semitism women writers pushed back on the misogyny unleashed during the war and authors such as Gore Vidal and Tennessee Williams reflected a new openness in the depiction of homosexuality The decade also witnessed an awakening of American environmental and ecological consciousness Hutchinson argues that despite the individualized experiences depicted in these works a common belief in art's ability to communicate the universal in particulars united the most important works of literature and art during the 1940s Hutchinson's capacious view of American literary and cultural history masterfully weaves together a wide range of creative and intellectual expression into a sweeping new narrative of this pivotal decade

Baptized with the Soil Kevin M. Lowe, 2016 In the early twentieth century many Americans were troubled by the way agriculture was becoming increasingly industrial and corporate Mainline Protestant churches and cooperative organizations began to come together to promote agrarianism the belief that the health of the nation depended on small rural communities and family farms In *Baptized with the Soil* Kevin M Lowe offers for the first time a comprehensive history of the Protestant commitment to rural America Christian agrarians believed that farming was the most moral way of life and a means for people to serve God by taking care of the earth that God created When the Great Depression hit Christian agrarians worked harder to keep small farmers on the land They formed alliances with state universities cooperative extension services and each other's denominations They experimented with ways of revitalizing rural church life including new worship services like Rural Life Sunday and new strategies for raising financial support like the Lord's Acre Because they believed that the earth was holy Christian agrarians also became leaders in promoting soil conservation Decades before the environmental movement they inspired an ethic of environmental stewardship in their congregations They may not have been able to prevent the spread of industrial agribusiness but their ideas have helped define significant and long lasting currents in American culture
