Aldo Leopold The Man And His Legacy:

Aldo Leopold Thomas Tanner,1987 *Aldo Leopold's Odyssey, Tenth Anniversary Edition* Julianne Lutz Warren,2016-05-24 In 2006 Julianne Lutz Warren n e Newton asked readers to rediscover one of history s most renowned conservationists Aldo Leopold s *Odyssey* was hailed by The New York Times as a biography of ideas making us feel the loss of what might have followed *A Sand County Almanac* by showing us in authoritative detail what led up to it Warren s astute narrative quickly became an essential part of the Leopold canon introducing new readers to the father of wildlife ecology and offering a fresh perspective to even the most seasoned scholars A decade later as our very concept of wilderness is changing Warren frames Leopold s work in the context of the Anthropocene With a new preface and foreword by Bill McKibben the book underscores the ever growing importance of Leopold s ideas in an increasingly human dominated landscape Drawing on unpublished archives Warren traces Leopold s quest to define and preserve land health Leopold s journey took him from Iowa to Yale to the Southwest to Wisconsin with fascinating stops along the way to probe the causes of early land settlement failures contribute to the emerging science of ecology and craft a new vision for land use Leopold s life was dedicated to one fundamental dilemma how can people live prosperously on the land and keep it healthy too For anyone compelled by this question the Tenth Anniversary Edition of Aldo Leopold s *Odyssey* offers insight and inspiration **Leopold's Shack and Ricketts's Lab** Michael Lannoo,2010-05-01 Aldo Leopold and Ed Ricketts are giants in the history of environmental awareness They were born ten years and only about 200 miles apart and died within weeks of each other in 1948 Yet they never met and they didn t read each other s work This illuminating book reveals the full extent of their profound and parallel influence both on science and our perception of natural world today In a lively comparison Michael J Lannoo shows how deeply these two ecological luminaries influenced the emergence both of environmentalism and conservation biology In particular he looks closely at how they each derived their ideas about the possible future of humanity based on their understanding of natural communities Leopold and Ricketts both believed that humans cannot place themselves above earth s ecosystems and continue to survive In light of climate change invasive species and collapsing ecosystems their most important shared idea emerges as a powerful key to the future *The Wilderness Debate Rages On* Michael P. Nelson,J. Baird Callicott,2008 Ten years ago The Great New Wilderness Debate began a cross disciplinary conversation about the varied constructions of wilderness and the controversies that surround them The *Wilderness Debate Rages On* will reinvigorate that conversation and usher in a second decade of debate Like its predecessor the book gathers both critiques and defenses of the idea of wilderness from a wide variety of perspectives and voices The *Wilderness Debate Rages On* includes the best explorations of the concept of the concept of wilderness from the past decade underappreciated essays from the early twentieth century that offer an alternative vision of the concept and importance of wilderness and writings meant to clarify or help us rethink the concept of wilderness Narrative writers such as Wendell Berry Scott Russell Sanders

Marilynne Robinson Kathleen Dean Moore and Lynn Maria Laitala are also given a voice in order to show how the wilderness debate is expanding outside the academy The writers represented in the anthology include ecologists environmental philosophers conservation biologists cultural geographers and environmental activists The book begins with little known papers by early twentieth century ecologists advocating the preservation of natural areas for scientific study not as did Thoreau Muir and the early Leopold for purposes of outdoor recreation The editors argue that had these writers influenced the eventual development of federal wilderness policy our national wilderness system would better serve contemporary conservation priorities for representative ecosystems and biodiversity

The River of the Mother of God Aldo

Leopold,1992-12-01 His name is inextricably linked with a single work A Sand County Almanac a classic of natural history literature and the conservationist s bible This book brings together the best of Leopold s essays

The Environment and the

Press Mark Neuzil,2008-07-16 This history of environmental journalism looks at how the practice now defines issues and sets the public agenda evolving from a tradition that includes the works of authors such as Pliny the Elder John Muir and Rachel Carson It makes the case that the relationship between the media and its audience is an ongoing conversation between society and the media on what matters and what should matter

The Rights of Nature Roderick Frazier

Nash,1989-01-17 Charting the history of contemporary philosophical and religious beliefs regarding nature Roderick Nash focuses primarily on changing attitudes toward nature in the United States His work is the first comprehensive history of the concept that nature has rights and that American liberalism has in effect been extended to the nonhuman world A splendid book Roderick Nash has written another classic This exploration of a new dimension in environmental ethics is both illuminating and overdue Stewart Udall His account makes history come alive Sierra So smoothly written that one almost does not notice the breadth of scholarship that went into this original and important work of environmental history Philip Shabecoff New York Times Book Review Clarifying and challenging this is an essential text for deep ecologists and ecophilosophers Stephanie Mills Utne Reader

The Ecology of Place Ian Billick,Mary V. Price,2012-08-01

Ecologists can spend a lifetime researching a small patch of the earth studying the interactions between organisms and the environment and exploring the roles those interactions play in determining distribution abundance and evolutionary change With so few ecologists and so many systems to study generalizations are essential But how do you extrapolate knowledge about a well studied area and apply it elsewhere Through a range of original essays written by eminent ecologists and naturalists The Ecology of Place explores how place focused research yields exportable general knowledge as well as practical local knowledge and how society can facilitate ecological understanding by investing in field sites place centered databases interdisciplinary collaborations and field oriented education programs that emphasize natural history This unique patchwork of case study narratives philosophical musings and historical analyses is tied together with commentaries from editors Ian Billick and Mary Price that develop and synthesize common threads The result is a unique volume rich with all too rare

insights into how science is actually done as told by scientists themselves *Conserving Words* Daniel J. Philippon, 2004

Conserving Words looks at five authors of seminal works of nature writing who also founded or revitalized important environmental organizations Theodore Roosevelt and the Boone and Crockett Club Mabel Osgood Wright and the National Audubon Society John Muir and the Sierra Club Aldo Leopold and the Wilderness Society and Edward Abbey and Earth First These writers used powerfully evocative and galvanizing metaphors for nature metaphors that Daniel J Philippon calls conserving words frontier Roosevelt garden Wright park Muir wilderness Leopold and utopia Abbey Integrating literature history biography and philosophy this ambitious study explores how conserving words enabled narratives to convey environmental values as they explained how human beings should interact with the nonhuman world **Driven Wild** Paul S. Sutter, 2009-11-23

In its infancy the movement to protect wilderness areas in the United States was motivated less by perceived threats from industrial and agricultural activities than by concern over the impacts of automobile owners seeking recreational opportunities in wild areas Countless commercial and government purveyors vigorously promoted the mystique of travel to breathtakingly scenic places and roads and highways were built to facilitate such travel By the early 1930s New Deal public works programs brought these trends to a startling crescendo The dilemma faced by stewards of the nation s public lands was how to protect the wild qualities of those places while accommodating and often encouraging automobile based tourism By 1935 the founders of the Wilderness Society had become convinced of the impossibility of doing both In *Driven Wild* Paul Sutter traces the intellectual and cultural roots of the modern wilderness movement from about 1910 through the 1930s with tightly drawn portraits of four Wilderness Society founders Aldo Leopold Robert Sterling Yard Benton MacKaye and Bob Marshall Each man brought a different background and perspective to the advocacy for wilderness preservation yet each was spurred by a fear of what growing numbers of automobiles aggressive road building and the meteoric increase in Americans turning to nature for their leisure would do to the country s wild places As Sutter discovered the founders of the Wilderness Society were driven wild pushed by a rapidly changing country to construct a new preservationist ideal Sutter demonstrates that the birth of the movement to protect wilderness areas reflected a growing belief among an important group of conservationists that the modern forces of capitalism industrialism urbanism and mass consumer culture were gradually eroding not just the ecology of North America but crucial American values as well For them wilderness stood for something deeply sacred that was in danger of being lost so that the movement to protect it was about saving not just wild nature but ourselves as well *Renewable Resource Policy* David A. Adams, 2007-01-31

Renewable Resource Policy is a comprehensive volume covering the history laws and important national policies that affect renewable resource management The author traces the history of renewable natural resource policy and management in the United States describes the major federal agencies and their functions and examines the evolution of the primary resource policy areas The book provides valuable insight into the often neglected legal administrative and bureaucratic aspect of natural

resource management It is a definitive and essential source of information covering all facets of renewable resource policy that brings together a remarkable range of information in a coherent integrated form **Social Sciences in Forestry** ,1987

The Oxford Handbook of Animal Ethics Tom L. Beauchamp,R.G. Frey,2011-11-17 This text is designed to capture the nature of the questions as they stand today and to propose solutions to many of the major problems in the ethics of how we use animals **Selected References Concerning the USDA Forest Service** ,1995 The Landscape of Reform Ben A. Minter,2006 In The Landscape of Reform Ben Minter offers a fresh and provocative reading of the intellectual foundations of American environmentalism focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century Liberty Hyde Bailey a forgotten figure in the Progressive conservation movement urban and regional planning theorist Lewis Mumford Benton MacKaye the forester and conservationist who proposed the Appalachian Trail in the 1920s and Aldo Leopold author of the environmentalist classic A Sand County Almanac Minter argues that these writers blazed a significant third way in environmental ethics and practice a more pragmatic approach that offers a counterpoint to the anthropocentrism versus ecocentrism use versus preservation narrative that has long dominated discussions of the development of American environmental thought Minter shows that the environmentalism of Bailey Mumford MacKaye and Leopold was also part of a larger moral and political program one that included efforts to revitalize democratic citizenship conserve regional culture and community identity and reclaim a broader understanding of the public interest that went beyond economics and materialism Their environmental thought was an attempt to critique and at the same time reform American society and political culture Minter explores the work of these four environmental reformers and considers two present day manifestations of an environmental third way Natural Systems Agriculture an alternative to chemical and energy intensive industrial agriculture and New Urbanism an attempt to combat the negative effects of suburban sprawl By rediscovering the pragmatic roots of American environmentalism writes Minter we can help bring about a new civic minded environmentalism today **Conserving Southern Longleaf** Albert G. Way,2011 The Red Hills region of south Georgia and north Florida contains one of the most biologically diverse ecosystems in North America with longleaf pine trees that are up to four hundred years old and an understory of unparalleled plant life At first glance the longleaf woodlands at plantations like Greenwood outside Thomasville Georgia seem undisturbed by market economics and human activity but Albert G Way contends that this environment was socially produced and that its story adds nuance to the broader narrative of American conservation The Red Hills woodlands were thought of primarily as a healthful refuge for northern industrialists in the early twentieth century When notable wildlife biologist Herbert Stoddard arrived in 1924 he began to recognize the area s ecological value Stoddard was with the federal government but he drew on local knowledge to craft his land management practices to the point where a distinctly southern agrarian form of ecological conservation emerged This set of practices was in many respects progressive particularly in its approach to fire management and species

diversity and much of it remains in effect today Using Stoddard as a window into this unique conservation landscape Conserving Southern Longleaf positions the Red Hills as a valuable center for research into and understanding of wildlife biology fire ecology and the environmental appreciation of a region once dubbed simply the pine barrens **Protection of Global Biodiversity** Lakshman D. Guruswamy, Jeffrey A. McNeely, 1998 The rate of extinction of biological species is greater today than at any time in the last 65 million years Some predict that if this rate continues two thirds of all living species will disappear during the next century Because reaching consensus on specific courses of action involves complex issues any adequate response to this impending crisis must include coverage of many areas of inquiry and understanding Protection of Global Biodiversity features essays by distinguished international experts who communicate with each other across disciplinary boundaries to address the challenge of formulating policies to protect biodiversity Although the global community has recently adopted a Convention of Biological Diversity the agreement sets forth only abstract goals Contributors to this volume advance the Convention s initial steps by providing workable solutions that can be implemented regionally nationally and locally The contributors including natural social and political scientists economists lawyers and environmentalists and decisionmakers in business agriculture and government have united to create a common discourse and to evaluate and propose strategies for halting this alarming loss of biodiversity In recognizing the diverse aspects of this task scientific economic institutional moral and legal this book presents a new picture of emerging action Contributors S James Anaya Gregory Benford Graciela Chichilnisky S Todd Crider Yvonne Cripps Robert T Fraley Anil K Gupta Lakshman D Guruswamy G M Heal Brent Hendricks Robert B Horsch Laura L Jackson Annie Lovejoy Ariel E Lugo Jeffrey A McNeely Brian G Norton Elinor Ostrom Peter H Raven John W Reid Walter V Reid Mark Sagoff Roger A Sedgo R David Simpson Ana Sittenfeld Christopher D Stone Gary H Toenniessen A ^AGreat Aridness William deBuys, 2011-11-25 A lyrical and deeply researched account of the impact of climate change on the landscape and future of the American Southwest *Earth Day* Jean Griffith, 2019-06-05 Issues They are the conflagrations the bonfires the burning controversies so profound so personal they move people to take action and generate the momentum to change the political system and the course of history Be it the Boston Tea Party of 1773 Jacob Coxey s Army the Bonus Army March of June 1932 the National Moratorium to End the War in Vietnam the Women s March of January 2018 or March for Our Lives to end gun violence in America in March of 2018 all came about because of Americans motivated by issues so much so they took their message of change to the street Driven by issues which galvanized public opinion people protested demonstrating public solidarity for a cause Earth Day America at the Environmental Crossroads is a political history focusing on the issues which generated the first Earth Day in April 1970 It is about the people who brought about this momentous political turning point during a period in American history of unprecedented turmoil and political protest Open its cover and you will learn about the agents of change Some have risen to take their place in the pantheon of environmental history others are all but forgotten in the collective public mind It begins

with herbicide contamination and the Cranberry Scare of November 1959 then explains the use of Agent Orange in Vietnam and its impact on the environmental movement Though the use of two nuclear weapons by the United States military ended World War II in the Pacific the inevitable arms race with the Soviet Union during the Cold War led to the testing of these weapons of mass destruction The second chapter explains how nuclear contaminated fallout became a health threat and a concern for environmentalists and the general public Overpopulation seems to be a nonissue today During the decades prior to Earth Day in 1970 the world s population numbers were a concern of monumental importance This is the focus of chapter three No credible treatment of the twentieth century environmental movement would be complete without addressing the contribution of Rachel Carson and her book Silent Spring Unlike pesticides the effects of which oftentimes surface years after exposure deteriorating air quality burned the eyes and made it difficult to breathe Polluted air particularly in the country s urban areas not only left an indelible impression in the minds of environmentalists but it also threatened public health And clean water taken for granted today by most Americans is the subject of chapter six which describes the extent to which the country s waterways were part of a multibillion dollar restoration project on the part of the states mandated by the federal government The seventh chapter is a retelling of the oil spill disaster in Santa Barbara California and the radical fringe of the environmental movement which manifested itself before Earth Day a fitting precursor to the event itself the subject of the final chapter
