Aldous Huxley and Indian Thought Sumita Roy, Annie Pothen, K. S. Sunita, 2003 Contributed papers presented at a national seminar

Aldous Huxley Robert E. Kuehn, 1974 Critical essays examine the impact and influence

of Huxley's early novels and poems and explore the later stages of his career The Tempo of Modernity Gabriel R. Ricci, 2017-09-08 The present work is a study in the history of an enduring idea that defines the inner life of the mind and also supplied a substratum for the twentieth century literary imagination and substance for philosophical thinking producing a unique alliance between philosophy and literature This special union was forged by a new holistic conception of time which supplemented and even supplanted the conventional sense of chronological time This temporal turn animated the existential insights of Husserl Heidegger and Bergson but it was grounded in nineteenth century advances in the biological sciences the hegemony of Hegelianism and even stretched back to Augustine's early meditation on time in Book XI of his Confessions In linking together a set of thinkers who addressed this form of temporal consciousness Gabriel R Ricci illuminates a common intellectual preoccupation from the vantage point of a concept The authors do not together assemble the thought it is the thought that produced a collective voice This voice appears in the episodes outlined in each chapter and they are framed by an introduction which explores Joseph Frank's insights into the new spatial forms in literature and an epilogue which resurrects J W Dunne's peculiar dream experiments and theory of precognition Ricci employs Frank's seminal essay to draw comparisons between literature's adaptation of the new time sense and philosophy's expression of the new compatibility between space and time Dunne's theory serves to demonstrate the continuity between literary form and philosophical speculation **Temporaries and Eternals** Michael Allis, 2013-02-21 Marking the fiftieth anniversary of the death of Aldous Huxley 1894-1963 *Temporaries and Eternals* focuses on the music column that Huxley wrote for *The Weekly Westminster Gazette* in 1922-23 Readers of Huxley's novels, essays and travel writing will be aware of the wealth of musical detail in these works and this book suggests that such references can only be fully understood in the context of the opinions voiced in Huxley's music criticism Not only does Huxley's column offer a fascinating snapshot of musical life in 1920s Britain but several of the themes that Huxley explores continue to have contemporary relevance These include music and technology the composer-performer relationship the nature of the child prodigy musical tradition and innovation the suitability of opera libretti and how to write about music effectively However Huxley's central theme reflected in the title of this book is the problematic question of how to judge the significance and potential longevity of specific composers and their works from Palestrina to Schoenberg After an extended introduction placing Huxley's music criticism in the context of his other writings the book reproduces all 64 of Huxley's weekly articles with footnote commentary to help the reader appreciate his wide ranging textual references *Aldous Huxley Annual. Volume 15 (2015)* Bernfried Nugel, Jerome Meckier, 2016-12 Volume 15 is dedicated to Prof David Bradshaw Oxford University who died on 13 September 2016 after a long illness His last article is published at the beginning of this issue to be followed by Uwe Rasch's essay on Huxley's 1912 sketchbook with over 30 unpublished images and a new selection of unpublished Huxley letters by James Sexton The volume continues with several articles on Huxley in the 1920s and 1930s and is rounded off with an essay on Huxley's stance as social ecologist

Towards a New Anthropology of the Embodied Mind: Maine de Biran's Physio-Spiritualism from 1800 to the 21st Century, 2023-11-13 This exploration in the history of ideas examines the groundbreaking notion of the embodied mind in its analysis by the French philosopher and politician Maine de Biran 1766 1824 and in its afterlife consciousness is generated through frequent interaction between the voluntary and the spiritual The conscious active self is constituted in its sovereign autonomy as free and undivided by an inner act of willful resistance a physical effort towards its own body and the world For the first time a multidisciplinary group of senior and junior researchers from Japan USA and Europe investigate origins and discursive cross fertilization of this concept around 1800 an intermediary stage between 1870 and 1945 and its influence upon existentialism phenomenology and deconstructivism during the postwar period and beyond from 1943 to 2010

Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give

greater clarity and consistency to the entries *Aldous Huxley and the Mysticism of Science* J. Deery, 1996-07-05 Can religious belief survive in a scientific era Aldous Huxley thought so His early recognition of the profound significance of twentieth century science and the need for moral and spiritual direction resulted in his espousal of mysticism An examination of his fiction and nonfiction reveals Huxley s significance for cross disciplinary debates between religion science and literature and provides examples of the transmission or refraction of knowledge from one discourse to another
