Arizona In Perspective 2004 15th Pb 2004:

On the Move to Meaningful Internet Systems 2004: OTM 2004 Workshops Zahir Tari, Angelo Corsaro, 2004-10-14
A special mention for 2004 is in order for the new Doctoral Symposium Workshop where three young postdoc researchers organized an original setup and formula to bring PhD students together and allow them to submit their research proposals for selection. A limited number of the submissions and their approaches were independently evaluated by a panel of senior experts at the conference and presented by the students in front of a wider audience. These students also got free access to all other parts of the OTM program and only paid a heavily discounted fee for the Doctoral Symposium itself. In fact, their attendance was largely sponsored by the other participants. If evaluated as successful, it is the intention of the General Chairs to expand this model in future editions of the OTM conferences and so draw in an audience of young researchers to the OnTheMove forum. All three main conferences and the associated workshops share the distributed aspects of modern computing systems and the resulting applications created by the Internet and the so-called Semantic Web. For DOA 2004, the primary emphasis stayed on the distributed object infrastructure for ODBASE 2004; it was the knowledge bases and methods required for enabling the use of formal semantics and for CoopIS 2004, the main topic was the interaction of such technologies and methods with management issues such as occurs in networked organizations. These subject areas naturally overlap and many submissions in fact also treat envisaged mutual impacts among them.

On the Move to Meaningful Internet Systems 2004: OTM 2004 Workshops R. Meersman, 2004-10-14
This book constitutes the joint refereed proceedings of seven international workshops held as part of OTM 2004 in Agia Napa, Cyprus, in October 2004. The 73 revised papers presented together with 31 abstracts of posters from the OTM main conferences were carefully reviewed and selected from more than 150 submissions. In accordance with the 7 workshops, the papers are organized in topical sections on grid computing and its applications to data analysis, Java technologies for real time and embedded systems, modeling inter-organizational systems, regulatory ontologies, semantics, and e-learning, PhD symposium, and interoperability.

The papers are organized in topical sections on support tools and environments, performance prediction and evaluation, scheduling and load balancing, high performance architectures and compilers, parallel and distributed databases, grid, cluster, and cloud computing, peer-to-peer computing, distributed systems and algorithms, parallel and distributed programming, parallel numerical algorithms, multicore and manycore programming, theory and algorithms for parallel computation, high performance networks, and mobile and ubiquitous computing.

Structural Analysis of Historical Constructions - 2 Volume Set Claudio Modena, P.B. Lourenço, P. Roca, 2004-11-15. Structural Analysis of Historical Constructions contains about 160 papers that were presented at the IV International Seminar on Structural Analysis of Historical Constructions that was held from 10 to 13 November 2004 in Padova Italy. Following publications of previous seminars that were organized in Barcelona Spain 1995 and 1998 and Guimar es Portugal 2001 state of the art information is presented in these two volumes on the preservation protection and restoration of historical constructions both comprising monumental structures and complete city centers. These two proceedings volumes are devoted to the possibilities of numerical and experimental techniques in the maintenance of historical structures. In this respect the papers originating from over 30 countries are subdivided in the following areas: Historical aspects and general methodology; Materials and laboratory testing; Non destructive testing and inspection techniques; Dynamic behavior and structural monitoring; Analytical and numerical approaches; Consolidation and strengthening techniques; Historical timber and metal structures; Seismic analysis and vulnerability assessment; Seismic strengthening and innovative systems; Case studies. Structural Analysis of Historical Constructions is a valuable source of information for scientists and practitioners working on structure related issues of historical constructions.

Cold Aqueous Planetary Geochemistry with FREZCHEM Giles M. Marion, Jeffrey S. Kargel, 2007-12-20. Written by two of the best US researchers in the field, this text investigates issues of astrobiological relevance in the context of cold aqueous planetary geochemistry. At the core of the technical chapters is the FREZCHEM model initially developed over many years by one of the authors to quantify aqueous electrolyte properties and chemical thermodynamics at subzero temperatures. FREZCHEM is of huge relevance to scientists in a number of fields including biogeochemists.

Microbial Source Tracking: Methods, Applications, and Case Studies Charles Hagedorn, Anicet R. Blanch, Valerie J. Harwood, 2011-06-08. Understanding the origin of fecal pollution is essential in assessing potential health risks as well as for determining the actions necessary to remediate the quality of waters contaminated by fecal matter. As a result, microbial source tracking (MST) has emerged as a field that has evolved and diversified rapidly since the first approaches were described only a decade ago. In response to the emergence of MST, there have been three large multi laboratory method comparison studies: two in the US and one in Europe, plus numerous workshops, book chapters, and review articles dedicated to synthesizing information on the topic. Furthermore, a federal USEPA guide document describing the uses and limitations of MST methods was published in 2005, and a book dedicated to MST as an emerging issue in food safety was published in 2007. These documents provide a collective body of literature on MST that is both conflicting and complementary, often repetitious and difficult to condense and interpret. In

addition it does not reflect the current diversity of MST approaches with different organisms newer methodologies such as quantitative PCR and anthropogenic chemicals nor does it embrace the scope of MST research being conducted around the world The three editors of the book all with extensive MST expertise have developed chapters and invited authors who reflect the rich diversity and truly international scope of MST The unifying theme throughout the book is the design of more standardized approaches to MST that include performance criteria regardless of method or organism plus recommendations for field study design and MST implementation The editors intend that this book will serve as a valuable reference for all those who are involved with *Assessment of Grassland Ecosystem Conditions in the Southwestern United States: without special title* ,2004 **Assessment of grassland ecosystem conditions in the southwestern United States** ,2004
