The Arnold-Gelfand Mathematical Seminars V. Arnold, I.M. Gelfand, Mikhail Smirnov, Vladimir S. Retakh, 2012-12-06

It is very tempting but a little bit dangerous to compare the style of two great mathematicians or of their schools I think that it would be better to compare papers from both schools dedicated to one area geometry and to leave conclusions to a reader of this volume The collaboration of these two schools is not new One of the best mathematics journals Functional Analysis and its Applications had I M Gelfand as its chief editor and V I Arnold as vice chief editor Appearances in one issue of the journal presenting remarkable papers from seminars of Arnold and Gelfand always left a strong impact on all of mathematics We hope that this volume will have a similar impact Papers from Arnold's seminar are devoted to three important directions developed by his school Symplectic Geometry F Lalonde and D McDuff Theory of Singularities and its applications F Aicardi I Bogaevski M Kazarian Geometry of Curves and Manifolds S Anisov V Chekanov L Guieu E Murre and V Ovsienko S Gusein Zade and S Natanzon A little bit outside of these areas is a very interesting paper by M Karoubi Produit cyclique d'espaces et opérations de Steenrod

Dillen,Leopold C.A. Verstraelen,2005-11-29 In the series of volumes which together will constitute the Handbook of Differential Geometry we try to give a rather complete survey of the field of differential geometry The different chapters will both deal with the basic material of differential geometry and with research results old and recent All chapters are written by experts in the area and contain a large bibliography In this second volume a wide range of areas in the very broad field of differential geometry is discussed as there are Riemannian geometry Lorentzian geometry Finsler geometry symplectic geometry contact geometry

complex geometry Lagrange geometry and the geometry of foliations Although this does not cover the whole of differential geometry the reader will be provided with an overview of some its most important areas Written by experts and covering recent research Extensive bibliography Dealing with a diverse range of areas Starting from the basics
