Soils of Volcanic Regions in Europe Ólafur Arnalds, Francois Bartoli, Peter Buurman, Hlynur Oskarsson, Georges Stoops, Eduardo Garcia-Rodeja, 2007-03-06 This book compiles information gained by an EU research network over six years of research on European volcanic soils. It gives comprehensive coverage of soils in volcanic regions within Europe dealing with most aspects of modern day soil science. New methodology is introduced and the synthesis of the research casts a new light on soils with andic soil properties.

Manual of Romance Languages in Africa Ursula Reutner, 2023-12-18 With more than two thousand languages spread over its territory, multilingualism is a common reality in Africa. The main official languages of most African countries are Indo-European. In many instances, Romance languages were primarily brought to Africa in the era of colonization; the areas discussed in this volume are thirty-five states that were once ruled by Belgium, France, Italy, Portugal, or Spain, and the African regions still belonging to three of them. Twenty-six states are presented in relation to French, four to Italian, six to Portuguese, and two to Spanish. They are considered in separate chapters according to their sociolinguistic situation, linguistic history, external language policy, linguistic characteristics, and internal language policy. The result is a comprehensive overview of the Romance languages in modern-day Africa. It follows a coherent structure, offers linguistic and sociolinguistic information, and illustrates language contact situations, power relations, as well as the cross-fertilization and mutual enrichment emerging from the interplay of languages and cultures in Africa.

The Evolution of the Portuguese Atlantic: Essays in Honour of Ursula Lamb Timothy J. Coates, 2009-09-30 This special issue volume of the Portuguese Studies Review in honor of Ursula Lamb (1914-1996) presents studies by Timothy Coates, A. J. R. Russell-Wood, Ivana Elbl, Alberto Vieira, Martin Malcolm Elbl, Gerardo A. Lorenzino, Carlos Braga Pinto, Geraldo Pieroni, Janaína Amado, Mark Cooper, Emerson Ernst, Pijning, and Kirsten Shultz. The studies explore the themes of settlement, colonization, ethnogenesis, banishment, and exile; the intellectual and political construction of colonial identities; cross-cultural urbanism; and regulation of commerce. The volume also includes a bibliography of Ursula Lamb's works.

Environmental History in the Making Estelita Vaz, Cristina Joanaz de Melo, Lígia M. Costa Pinto, 2016-10-13 This book is the product of the 2nd World Conference on Environmental History held in Guimarães, Portugal, in 2014. It gathers works by authors from the five continents addressing concerns raised by past events so as to provide information to help manage the present and the future. It reveals how our cultural background and examples of past

territorial intervention can help to combat political and cultural limitations through the common language of environmental benefits without disguising harmful past human interventions. Considering that political ideologies such as socialism and capitalism as well as religion fail to offer global paradigms for common ground, an environmentally positive discourse instead of an ecological determinism might serve as an umbrella common language to overcome blocking factors, real or invented, and avoid repeating ecological loss. Therefore, agency, environmental speech, and historical research are urgently needed in order to sustain environmental paradigms and overcome political, cultural, and economic interests in the public arena. This book intertwines reflections on our bonds with landscapes, processes of natural and scientific transfer across the globe, the changing of ecosystems, the way in which scientific knowledge has historically both accelerated destruction and allowed a better distribution of vital resources, or as it in today's world can offer alternatives that avoid harming those same vital natural resources: water, soil, and air. In addition, it shows the relevance of cultural factors both in the taming of nature in favor of human comfort and in the role of the environment matters in the forging of cultural identities which cannot be detached from technical intervention in the world. In short, the book firstly studies the past, approaching it as a data set of how the environment has shaped culture; secondly, seeks to understand the present; and thirdly, assesses future perspectives: what to keep, what to change, and what to dream anew, considering that conventional solutions have not sufficed to protect life on our planet.

Catalogues No. 111-114, 137, 141, 147, 148, 151 Bernard Quaritch (Firm), 1891 Western Europe, North America and Australasia Rolf Bohme, 2013-10-22 Topographic mapping plays a basic and important role within the extensive field of cartography. In recent years, this type of mapping has become somewhat neglected and available literature is normally restricted to details concerning the programmes of individual countries, often presented in the form of monographs. Topographic maps are essential tools for use in development projects, resource exploitation, the planning of construction infrastructure, and recreation. Furthermore, they give a detailed illustration of the relative degrees of development of areas within a landscape and are thus unique in demonstrating the cultural status of a country. This book is the first of three volumes and provides an introduction to world topographic mapping, giving details and examples of topographic maps from Western Europe, North America, and Australasia. The information supplied for each country consists of a text including a brief history of the development of topographic mapping, geodetic data, map scales, and series, as well as extracts of maps and index sheets illustrating the present status of map coverage within that country. There is currently no other work employing the approach adopted in assembling this inventory. This work is a comprehensive and important reference and source book for information in the field of topographic mapping.

Manual de Arboricultura. Tratado ... da cultura das arvores frutíferas Alexandre de Sousa Figueiredo, 1875 **Volcanic Geology of São Miguel Island (Azores Archipelago)** J.L. Gaspar, J.E. Guest, A.M. Duncan, F.J.A.S. Barriga, D.K. Chester, 2015-10-12 The Azores archipelago in the Atlantic Ocean is composed of nine volcanic islands and São Miguel is the largest and most volcanically active. During the past 5000 years

several eruptions have taken place on the three active central volcanoes Sete Cidades Fogo and Furnas and in the basaltic fissure systems of Picos and Congro There is evidence that Furnas was in eruption when the first settlers arrived some time between 1439 and 1443 In the sixteenth and seventeenth centuries there were two explosive sub Plinian eruptions Fogo in 1563 and Furnas in 1630 The last eruption on land occurred in the Picos Fissural Volcanic System in 1652 involving the extrusion of lava domes In 22 chapters this volume considers the volcanic geology of the island under the headings of geological setting volcanic history geological hazards and risk assessment volcano monitoring and natural resources
