The Semiotic Sphere Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to flourish only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly surfaced almost everywhere over the literate globe Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems their comparative analysis and their classification More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward Bit by bit mutually supportive international networks were put together Today it can truly be asserted that semiotics has become a global enterprise This of course is far from saying that the map is uniform or even that world wide homogeneity is in the least desirable While our conjoint ultimate goal remains steadily in focus the multiplicity of avenues available for its realization is inherent in the adventure of the search itself

Handbook of Qualitative Research Methods in Entrepreneurship Helle Neergaard, John P. Ulhøi, 2007 the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon Craig S Galbraith

Journal of Enterprising Communities There is no hiding behind the ramparts of dry scholarship here The credibility of the theory being spoken of is not the stuff of constructed proofs but alignments of critical insight and utility This is where qualitative work can make a difference to the field and where this book makes its mark Robin Holt International Journal of Entrepreneurial Behaviour and Research The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done are doing and will do in entrepreneurship research Every serious entrepreneurship scholar should read it It points at the future Bj rn Bjerke University of Kalmar Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies For those who try to get away from only quantitative studies in both business practice and academic research this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic discourse and narrative approaches It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions This domain is not physics In bringing together such a variety of experts from so many nationalities in this Handbook our Danish colleagues are making entrepreneurship research a realistic global venture Jan Ulijn Eindhoven University of Technology The Netherlands Helle Neergaard and John Parm Ulh i have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches This book is not simply a handbook of qualitative research methods though it well achieves this aim it is also an important contribution towards the field of entrepreneurship research From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship It fills a crucial gap in the literature on entrepreneurship theory and just as importantly illustrates how these principles and techniques can be appropriately and fruitfully employed The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies They achieve this by providing concrete examples of research experiences and tangible how to advice By clarifying what these research methods entail how they are currently being used and how they can be evaluated this Handbook constitutes a comprehensive and highly accessible methodological toolbox Dealing with both well accepted qualitative approaches and lesser known rarer and more novel approaches to the study of entrepreneurship this Handbook will be invaluable to those studying researching and teaching entrepreneurship

Essential Readings in Biosemiotics Donald Favareau, 2010-06-10 Synthesizing the findings from a wide range of disciplines from biology and anthropology to philosophy and linguistics the emerging field of Biosemiotics explores the highly complex phenomenon of sign processing in living systems Seeking to advance a naturalistic understanding of the evolution and development of sign dependent life processes contemporary biosemiotic theory offers important new conceptual tools for the scientific understanding of mind and meaning for the development of artificial intelligence and for the ongoing research into the rich diversity of non verbal human animal and biological communication processes Donald Favareau's Essential Readings in Biosemiotics has been designed as a single source overview of the major works informing this new interdisciplinary and provides scholarly historical and analytical commentary on each of the texts presented The first of its kind this book constitutes a valuable resource to both bioscientists and to semioticians interested in this emerging new discipline and can function as a primary textbook for students in biosemiotics as well Moreover because of its inherently interdisciplinary nature and its focus on the big questions of cognition meaning and evolutionary biology this volume should be of interest to anyone working in the fields of cognitive science theoretical biology philosophy of mind evolutionary psychology communication studies or the history and philosophy of science

Juri Lotman - Culture, Memory and History Marek Tamm, 2019-10-09 This volume brings together a selection of Juri Lotman's late essays published between 1979 and 1995 While Lotman is widely read in the fields of semiotics and literary studies his

innovative ideas about history and memory remain relatively unknown The articles in this volume most of which are appearing in English for the first time lay out Lotman s semiotic model of culture with its emphasis on mnemonic processes Lotman s concept of culture as the non hereditary memory of a community that is in a continuous process of self interpretation will be of interest to scholars working in cultural theory memory studies and the theory of history

Semiotics: Principles & Problems Yiheng Zhao,2025-03-06 This book attempts to build semiotics on a new foundation which is meaning making At the very beginning the central terms of signs and semiotics are redefined as the old definition for sign one thing standing for another is far from satisfactory Sign is a perception that is regarded as carrying meaning In this way semiotics now built on the foundation of meaning making and meaning cognition is a science of meaning All the principles are now under the scrutiny of the new definition and many issues are answered more succinctly Therefore the new definition is extended to the new fields of cultural activities in human society and a series of problems arise This book intends to discuss and explore these questions such as the middle reclining in the cultural markedness the sliding of motivation in art the difficult distinction between falsehood and untruthfulness and the driving force of modernization in China **Analyzing**
