

The book cover features a photograph of a person standing in the center of a city street, with their arms outstretched horizontally. The person is silhouetted against a bright, hazy background. The street is lined with tall buildings on both sides, and the perspective leads the eye towards the person in the distance. The lower half of the cover is a solid dark color, providing a high-contrast background for the white text.

Julier, Liz Moor, 2009-08-01 Design and other creative industries not only shape our lives in numerous ways providing cultural goods such as films music and magazines but also shape the look and feel of everyday objects and spaces The creative industries are also important economically governments and businesses now make considerable efforts to manage creativity for a range of political and economic ends Does the management of design conflict with traditional ideas of creative freedom and autonomy How do government policies and business priorities influence the day to day practices of designers And how

The Physical University Paul Temple,2014-03-21 The great universities of the world are to a large extent defined in the public imagination by their physical form when people think of a university they usually think of a distinctive place rather than about say the teaching or the research that might go on there This is understandable both because universities usually stay rooted to the same spot over the centuries and because their physical forms may send powerful messages about the kind of places they are The physical form of the university and how the spaces within it become transformed by their users into places which hold meanings for them has become of increased interest recently from both academic and institutional management perspectives when trying to understand more about how universities work and how they may be made more effective Yet despite its seemingly obvious importance the available literature on space and place in higher education internationally is scant when compared to that dealing with say teaching and learning methods or with evaluating quality or many other topics This book brings together a range of academic and professional perspectives on university spaces and places and show how technical matters of building design maintenance and use interact with academic considerations on the goals of the university Space issues are located at an intellectual crossroads where widely differing conceptual and professional perspectives meet and need to be integrated and this important book brings together perspectives from around the world to show design and use issues are changing Higher Education Globally higher education is being required to do more things to teach more students to be better at research to engage more with business and communities and many other things These pressures are leading universities to reconsider their management processes as well as their academic structures an often quoted saying is that we make our buildings and afterwards they make us At a time when universities and colleges are seeking competitive advantages ideas and analysis about space design and use is much needed and will be well received
