groundbreaking history of Africa s looted architectural heritage and a bold proposal for the repatriation of the continent s stolen cultural artifacts Between the nineteenth century and today colonial officials collectors and anthropologists dismembered African buildings and dispersed their parts to museums in Europe and the United States Most of these artifacts were cataloged as ornamental art objects which erased their intended functions and the removal of these objects often had catastrophic consequences for the original structures Africa s Buildings traces the history of the collection and distribution of African architectural fragments documenting the brutality of the colonial regimes that looted Africa s buildings and addressing the ethical questions surrounding the display of these objects Itohan Osayimwese ranges across the whole of Africa from Egypt in the north to Zimbabwe in the south and spanning the western central and eastern regions of the continent She describes how collectors employed violent means to remove elements such as columns and door panels from buildings and how these methods differentiated architectural collecting from conventional collecting She shows how Western collectors mischaracterized building components as ornament erasing their architectural character and concealing the evidence of their theft Osayimwese discusses how the very act of displacing building parts like floor tiles and woven screen walls has resulted in a loss of knowledge about their original function and argues that because of these removals scholars have yet to fully grasp the variety and character of African architecture Richly illustrated Africa s Buildings uncovers the vast scale of cultural displacement perpetrated by the West and proposes a new role for museums in this history one in which they champion the repatriation of Africa s architectural heritage and restitution for African communities **Publications of**

Traditional African Art Avner Shkarov, Lyubov Senatorova, 2015-06-14. The art of sub-Saharan Africa reveals the marvelous achievements of unknown artists over thousands of years. Their aesthetic ideal finds form in wood, ivory, fabric, bronze, and iron. This illustrated study of traditional African art includes pieces from Western Sudan, the Congolese Basin, the Guinea coast, Gabon, the Democratic Republic of Congo, and East and South Africa. Each piece is characterized by its own traditions and artistic forms. The earliest works date from the beginning of the first millennium, the most recent from the early 20th century. Unique and rare examples are documented, many heretofore virtually unknown.

Lost Secrets of the Gods Michael Pye, Kirsten Dalley, 2025-09-12. Are there 10,000-year-old secret societies that still exist today? Was there a race of giants that once inhabited the Americas? Did ancient Egypt and ancient China have heretofore undiscovered ties? *Lost Secrets of the Gods* delves into these ancient mysteries and many more in articles by some of the world's most intrepid and knowledgeable researchers. The old paradigms of history are being radically transformed as we discover more evidence of little-known cultures and what they achieved. Many ancient cultures spoke and wrote of visitors that gave them knowledge and helped shape their societies. Who were they and where did they come from? We now know that many ancient cultures had advanced knowledge of science, agriculture, and astronomy, only some of which has been rediscovered in the last 100 years. Were *The Iliad* and *The Odyssey* really about an epic struggle in pre-Celtic Europe? What happened to the Persian army that completely disappeared from Egypt 2,500 years ago? Did the ancients know how to create psychic guard dogs to protect sacred sites? There is much more to history than what has officially been recorded. *Lost Secrets of the Gods* reveals startling truths and asks fascinating questions traditional historians have long ignored.
