Schwalbach, 2012-07-26 Screen printing is simple enough for a child or beginner but it is also a favorite printing process of experienced artists and craftspeople It allows for a wide range of creative possibilities It is less inhibiting than other printing processes And contrary to most other methods of printing it does not require the user to make the mental translations of a reversed image The extreme versatility of the medium has opened completely new possibilities for design and expression in both serigraphy art prints and textile designs The Schwalbachs book clearly explains how to employ silk screen printing in both of these areas producing a serigraph and making a fabric print It also sets down all of the steps involved in constructing a printing board and frame keying the screen preparing inks or dyes and printing the color runs plus a list of various problems that might turn up and their solutions Other facets discussed include the best ways of cleaning up handling the completed print and working with different resists paper blockout washout photo emulsion There is even a special print project for the beginner using a cardboard frame and school tempera paint Nearly 200 diagrams and photographs including 19 in full color make a clear text even clearer and offer examples of completed prints The Schwalbachs taught silk screen printing for many years at the University of Wisconsin They know how to communicate the essence of this craft in the best manner possible With their book as a guide anyone can quickly master the techniques of silk screening printing *Screens* Kate Mondloch, 2010 Media screens film video and computer screens have increasingly pervaded both artistic production and everyday life since the

1960s Yet the nature of viewing artworks made from these media along with their subjective effects remains largely unexplored Screens addresses this gap offering a historical and theoretical framework for understanding screen reliant installation art and the spectatorship it evokes Examining a range of installations created over the past fifty years that investigate the rich terrain between the sculptural and the cinematic including works by artists such as Eija Liisa Ahtila Doug Aitken Peter Campus Dan Graham VALIE EXPORT Bruce Nauman and Michael Snow Kate Mondloch traces the construction of screen spectatorship in art from the seminal film and video installations of the 1960s and 1970s to the new media artworks of today s digital culture Mondloch identifies a momentous shift in contemporary art that challenges key premises of spectatorship brought about by technological objects that literally and metaphorically filter the subject s field of vision As a result she proposes that contemporary viewers are quite literally screen subjects and offers the unique critical leverage of art as an alternative way to understand media culture and contemporary visuality
