Art and Time Derek Allan, 2014-09-18 A well known feature of great works of art is their power to live on long after the moment of their creation to remain vital and alive long after the culture in which they were born has passed into history This power to transcend time is common to works as various as the plays of Shakespeare the Victory of Samothrace and many works from early cultures such as Egypt and Buddhist India which we often encounter today in major art museums What is the nature of this power and how does it operate The Renaissance decided that works of art are timeless immortal immune from historical change and this idea has exerted a profound influence on Western thought But do we still believe it Does it match our experience of art today which includes so many works from the past that spent long periods in oblivion and have clearly not been immune from historical change This book examines the seemingly miraculous power of art to transcend time an issue widely neglected in contemporary aesthetics Tracing the history of the question from the Renaissance onwards and discussing thinkers as various as David Hume Hegel Marx Walter Benjamin Sartre and Theodor Adorno the book argues that art transcends time through a process of metamorphosis a thesis first developed by the French art theorist Andr Malraux The implications of this idea pose major challenges for traditional thinking about the nature of art *Belarusian Fine Art: Time and Time Again* Zina Gimpelevich, 2023-02-06 It's hard to imagine feeling a sense of loss for artwork until you become immersed in the stories of the Belarusian fine artists Dr Zina Gimpelevich has spotlighted in her newest book She brought to life artists whose work was curtailed under the tyranny of the Russian Empire the tragedy of the Holocaust and persistent poverty Yet these artists' collective resilience and the work they produced paintings sculptures textiles ceramics and more have helped bring beauty and joy to the world even when depicting the suffering felt by so many In *Belarusian Fine Art Time and Time Again* Dr Gimpelevich celebrates the work of over 150 Belarusian fine artists including many from the School of Paris She estimates more than 3 000 Belarusian artists are creating today in Belarus her birth country Many remained in their home country Many became migrants who traveled beyond borders and never returned home Native sons such as Mark Chagall and Markus Yaka Levi Rotkovi Mark Rothko have left their influence and work the world over and are often claimed by other countries Other fine artists created in obscurity or self-imposed exile hiding their work to avoid the grasp of oppressive regimes Dr Gimpelevich has ensured their names and work will not be forgotten and will receive the recognition they richly deserve The harsh truths Dr Gimpelevich brings to light are tempered with glimmers of hope from recent generations of Belarusian fine artists Like their predecessors and mentors their work shows an unyielding reverence for their country's landscapes culture history and people Although this book has its lens focused on Belarusian fine art Dr Gimpelevich adeptly provides readers with a deeper understanding of how politics and power struggles have affected this

From Point to Pixel Meredith Hoy,2017-01-03 In this fiercely ambitious study Meredith Anne Hoy seeks to reestablish the very definitions of digital art and aesthetics in art history She begins by problematizing the notion of digital aesthetics tracing the nineteenth and twentieth century movements that sought to break art down into its constituent elements which in many ways predicted and paved the way for our acceptance of digital art Through a series of case studies Hoy questions the separation between analog and digital art and finds that while there may be sensual and experiential differences they fall within the same technological categories She also discusses computational art in which the sole act of creation is the building of a self generating algorithm The medium isn't the message what really matters is the degree to which the viewer can sense a creative hand in the art

Min,2018-06-05 Charting its historical conditions and the expansive contexts of its emergence the author challenges the notion of Asian American art as a site of reconciliation for marginalized artists to enter into the canon Pressing critically on how the politics of visibility and recognition reduces artworks by Asian American artists to narrow parameters of categorization this work reconceives Asian American art not as a subset of objects but as a discursive medium that sets up the conditions for a politics to occur By approaching Asian American art in this way the author refigures the way we see Asian American art as an oppositional practice less in terms of its aspirations to be seen than in terms of how it models a different way of seeing and encountering the world Uniquely presented the chapters are organized thematically as mini exhibitions and offer readings of select works by contemporary artists including Tehching Hsieh Byron Kim Simon Leung Mary Lum and Nikki S Lee Inspired above all by their art practice the author argues for an alternative approach to exhibition making and methods of reading that conceives of these works not as exemplary instances of Asian American art but as engaged in an aesthetic practice that remains open ended challenging the assumptions that racialize artists within an Asian American context In this book the author insists that in order to reassess Asian American art beyond its place in art history she suggests the possible need to let go not only of established viewing and curatorial practices but even the category of Asian American art itself **Art-Union** ,1899 Vol for 1867 includes Illustrated catalogue of the Paris Universal Exhibition

Movement, Time, Technology, and Art Christina Chau,2017-06-12 This book explores the ways in which artists use technology to create different perceptions of time in art in order to reflect on contemporary relationships to technology By considering the links between technology movement and contemporary art the book explores changing relationship between temporality in art art history media art theory modernity contemporary art and digital art This book challenges the dominant view that kinetic art is an antiquated artistic experiment and considers the changing perception of kinetic art by focusing on exhibitions and institutions that have recently challenged the notion of kinetic art as a marginalised and forgotten artistic experiment with mechanical media This is achieved by deconstructing Frank Popper s argument that kinetic art is a precursor to subsequent explorations in the intersections between art science and technology Rather than pandering to the prevailing art historical assumption that kinetic sculpture is merely a precursor to art in a digital culture the book proposes that perhaps kineticism succeeded too well where movement has become a ubiquitous element of the aesthetic of

contemporary art If as Boris Groys has recently suggested installation has become the dominant mode of art in the contemporary age then movement in real time with the viewer is used to aestheticise and explore the facets of our peculiar time
