Questioning the Music Education Paradigm Lee Bartel,2004-09-15 Twenty three contributors turn a critical lens on the dominant music education paradigm to examine how we teach what we teach for what we teach what is expected of teachers and how we teach them whom we should be teaching and the very assumptions and structures of which we base our practice

Not for Profit Martha C. Nussbaum,2024-12-03 A passionate defense of the humanities from one of today s foremost public intellectuals In this short and powerful book celebrated philosopher Martha C Nussbaum makes a passionate case for the importance of the liberal arts at all levels of education Historically the humanities have been central to education because they have been seen as essential for creating competent democratic citizens But recently Nussbaum argues thinking about the aims of education has gone disturbingly awry in the United States and abroad We increasingly treat education as though its primary goal were to teach students to be economically productive rather than to think critically and become knowledgeable productive and empathetic individuals This shortsighted focus on profitable skills has eroded our ability to criticize authority reduced our sympathy with the marginalized and different and damaged our competence to deal with complex global problems And the loss of these basic capacities jeopardizes the health of democracies and the hope of a decent world In response to this dire situation Nussbaum argues that we must resist efforts to reduce education to a tool of the gross national product Rather we must work to reconnect education to the humanities in order to give students the capacity to be true democratic citizens of their countries and the world Translated into twenty five languages Not for Profit draws on the stories of troubling and hopeful global educational developments Nussbaum offers a manifesto that should be a rallying cry for anyone who cares about the deepest purposes of education

Studies in Art Education ,2002 *Soft Boundaries* Claire Detels, 1999-11-30 American education and culture are suffering from a terrible soul numbing imbalance in which there is an overemphasis on basic quantifiable skills and knowledge and a de emphasis of more creative areas of the humanities especially the arts and aesthetics Detels indicates that the marginalization of the arts and aesthetics in American education has been caused by a hard boundaried paradigm that has come to dominate American education According to this paradigm the arts are wrongly viewed and taught as separate unconnected disciplines of music visual arts dance and theater while their intimate connections to each other and to aesthetic experience and life in general are completely unrepresented The way out of this crisis is to change paradigms from a hard boundaried single minded valuation of specialization to a more soft boundaried curriculum that allows for specialized education in individual art forms as well as widespread interdisciplinary integration of the arts with each other and with general education at the K 12 and college levels Without such a change we will be unable to equip our students with the necessary skills to understand and communicate about the increasingly complex sensually immersive artistic media and forms of the future
