The room is illuminated by warm, ambient lights, and a desk lamp is visible on the right. The background is blurred, showing shelves and other equipment.

Film Editing Valerie Orpen, 2019-07-25 Film Editing provides an introduction to the craft of editing in the non silent film In clear and accessible language Valerie Orpen considers editing as an expressive strategy rather than a mere technique She reveals that editing can be approached and studied in a similar way to other aspects of film Traditionally studies on editing or montage tend to focus on silent cinema yet this book claims that an examination of editing should also consider the role of the soundtrack The aim of Film Editing is to examine the way in which editing can make meaning The book addresses editing as part of a wider context and as a crucial element of the overarching design and vision of a film Consequently this book incorporates other parameters such as mise en scene framing sound genre history and performance By examining a number of mainstream and art films such as Godard's A bout de souffle Hitchcock's Rear Window and Scorsese's Raging Bull Film Editing seeks to dispel the notion that editing is necessarily polarized as continuity versus discontinuity

The Art of Editing Tim Groenland, 2019-02-21 The place of the editor in literary production is an ambiguous and often invisible one requiring close attention to publishing history and often inaccessible archival resources to bring it into focus In The Art of Editing Tim Groenland shows that the critical tendency to overlook the activities of editors and to focus on the solitary author figure neglects important elements of how literary works are acquired developed and disseminated Focusing on selected works of fiction by Raymond Carver and David Foster Wallace authors who represent stylistic touchstones for US fiction of recent decades Groenland presents two case studies of editorial collaboration Carver's early stories were integral to the emergence of the Minimalist movement in

the 1980s while Wallace's novels marked a generational shift towards a more expansive maximal mode of narrative. The role of their respective editors however is often overlooked. Gordon Lish's part in shaping the form of Carver's early stories remains under explored. Analyses of Wallace's fiction meanwhile tend to minimise Michael Pietsch's role from the creation of *Infinite Jest* during the mid 1990s until the present day. Drawing on extensive archival research as well as interviews with editors and collaborators, Groenland illuminates the complex and often conflicting forms of agency involved in the genesis of these influential works. The energies and tensions of the editing process emerge as essential factors in the creation of fictions more commonly understood within the paradigm of solitary authorship. The mediating role of the editor is, Groenland argues, inseparable from the development, form and reception of these works.

What Editors Do Peter Ginna, 2017-10-06. This book gathers essays from twenty-seven leading figures in book publishing about their work. Representing both large houses and small and encompassing trade, textbook, academic and children's publishing, the contributors make the case for why editing remains a vital function to writers and readers everywhere. Ironically for an industry built on words, there has been a scarcity of written guidance on how to actually approach the work of editing. This book will serve as a compendium of professional advice and will be a resource both for those entering the profession or already in it and for those outside publishing who seek an understanding of it. It sheds light on how editors acquire books, what constitutes a strong author-editor relationship and the editor's vital role at each stage of the publishing process, a role that extends far beyond marking up the author's text. This collection treats editing as both art and craft and also as a career. It explores how editors balance passion against the economic realities of publishing.
