BOOK JACKET *Imagining the Americas in Medici Florence* Lia Markey, 2016-11-30 The first full length study of the

impact of the discovery of the Americas on Italian Renaissance art and culture *Imagining the Americas in Medici Florence* demonstrates that the Medici grand dukes of Florence were not only great patrons of artists but also early conservators of American culture In collecting New World objects such as featherwork codices turquoise and live plants and animals the Medici grand dukes undertook a vicarious conquest of the Americas As a result of their efforts Renaissance Florence boasted

one of the largest collections of objects from the New World as well as representations of the Americas in a variety of media Through a close examination of archival sources including inventories and Medici letters Lia Markey uncovers the provenance history and meaning of goods from and images of the Americas in Medici collections and she shows how these novelties were incorporated into the culture of the Florentine court More than just a study of the discoveries themselves this volume is a vivid exploration of the New World as it existed in the minds of the Medici and their contemporaries Scholars of Italian and American art history will especially welcome and benefit from Markey's insight

Collecting Mesoamerican Art before 1940 Andrew D. Turner, Megan E. O'Neil, 2024-02-13 The untold chronicles of the looting and collecting of ancient Mesoamerican objects This book traces the fascinating history of how and why ancient Mesoamerican objects have been collected It begins with the pre Hispanic antiquities that first entered European collections in the sixteenth century as gifts or seizures continues through the rise of systematic collecting in Europe and the Americas during the nineteenth and twentieth centuries and ends in 1940 the start of Europe's art market collapse at the outbreak of World War II and the coinciding genesis of the large scale art market for pre Hispanic antiquities in the United States Drawing upon archival resources and international museum collections the contributors analyze the ways shifting patterns of collecting and taste including how pre Hispanic objects changed from being viewed as anthropological and scientific curiosities to collectible artworks have shaped modern academic disciplines as well as public private institutional and nationalistic attitudes toward Mesoamerican art As many nations across the world demand the return of their cultural patrimony and ancestral heritage it is essential to examine the historical processes events and actors that initially removed so many objects from their countries of origin

A New Deal for Native Art Jennifer McLerran, 2022-08-16 As the Great Depression touched every corner of America the New Deal promoted indigenous arts and crafts as a means of bootstrapping Native American peoples But New Deal administrators

romanticization of indigenous artists predisposed them to favor pre industrial forms rather than art that responded to contemporary markets In *A New Deal for Native Art* Jennifer McLerran reveals how positioning the native artist as a pre modern Other served the goals of New Deal programs and how this sometimes worked at cross purposes with promoting native self sufficiency She describes federal policies of the 1930s and early 1940s that sought to generate an upscale market for Native American arts and crafts And by unraveling the complex ways in which commodification was negotiated and the roles that producers consumers and New Deal administrators played in that process she sheds new light on native art s commodity status and the artist s position as colonial subject In this first book to address the ways in which New Deal Indian policy specifically advanced commodification and colonization McLerran reviews its multi pronged effort to improve the market for Indian art through the Indian Arts and Crafts Board arts and crafts cooperatives murals museum exhibits and Civilian Conservation Corps projects Presenting nationwide case studies that demonstrate transcultural dynamics of production and reception she argues for viewing Indian art as a commodity as part of the national economy and as part of national political trends and reform efforts McLerran marks the contributions of key individuals from John Collier and Rene d Harnoncourt to Navajo artist Gerald Nailor whose mural in the Navajo Nation Council House conveyed distinctly different messages to outsiders and tribal members Featuring dozens of illustrations *A New Deal for Native Art* offers a new look at the complexities of folk art revivals as it opens a new window on the Indian New Deal

Rethinking the Baroque Helen Hills, 2017-07-05 *Rethinking the Baroque* explores a tension In recent years the idea of baroque or the baroque has been seized upon by scholars from a range of disciplines and the term baroque has consequently been much in evidence in writings on contemporary culture especially architecture and entertainment Most of the scholars concerned have little knowledge of the art literature and history of the period usually associated with the baroque A gulf has arisen On the one hand there are scholars who are deeply immersed in historical period who shy away from abstraction and who have remained often oblivious to the convulsions surrounding the term baroque on the other there are theorists and scholars of contemporary theory who have largely ignored baroque art and architecture This book explores what happens when these worlds mesh In this book scholars from a range of disciplines retrieve the term baroque from the margins of art history where it has been sidelined as anachronistic to reconsider the usefulness of the term baroque while avoiding simply rehearsing familiar policing of periodization stylistic boundaries categories or essence Baroque emerges as a vital and productive way to rethink problems in art history visual culture and architectural theory Rather than attempting to provide a survey of baroque as a chronological or geographical conception the essays here attempt critical re engagement with the term baroque its promise its limits and its overlooked potential in relation to the visual arts Thus the book is posited on the idea that tension is not only inevitable but even desirable since it not only encapsulates intellectual divergence which is always as useful as much as it is feared but helps to push scholars and therefore readers outside their usual runnels

Collecting East and West Andrea M. Gáldy, Adriana Turpin, 2013-09-11 If collecting the rare and valuable is an entirely normal trait of human behaviour amassing objects from far away places has also long played a role in the history of collecting East and West or North and South for that matter are of course entirely relative to one's particular geographical position Therefore it is interesting that collecting exotic objects is an endeavour that unites humanity over millennia and round the globe The ancient Assyrians did so as assiduously as eighteenth century collectors in Paris or London Chinese emperors collected Western art and artefacts at a time when Western collectors started to gather ceramics lacquered furniture or South East Asian prints Key factors were of course increasingly frequent contact and an ever growing knowledge about the other and about the other's artistic production Of particular interest to the mission of this working group is the fact that the building of collections was only part of the endeavour but that in many cases the objects imported at huge cost and logistic effort were meant to be displayed in surroundings reminiscent of their original habitat even though their exact original context may have been open to debate and their final exhibition surroundings may have been unrecognisable to anyone from their former home Western collectors built Chinese cabinets for their exotic treasures often complemented by depictions of Oriental tea parties Less familiar is perhaps the fact that from the seventeenth century onwards Chinese emperors displayed their European collectibles in palaces built for them for this purpose in Western architectural style The essays in the present volume therefore attempt to connect the collections of exotic objects with the forms of display adopted by collectors and institutions and thus chart the levels of increasingly informed and intimate encounters between East and West scholars and collectors art lovers and institutions from the early first millennium BC to the early twentieth century and from South East Asia to North Western Europe

Cultural Contact and the Making of European Art since the Age of Exploration Mary D. Sheriff, 2010-06-21 Art historians have long been accustomed to thinking about art and artists in terms of national traditions This volume takes a different approach

suggesting instead that a history of art based on national divisions often obscures the processes of cultural appropriation and global exchange that shaped the visual arts of Europe in fundamental ways between 1492 and the early twentieth century. Essays here analyze distinct zones of contact between various European states between Asia and Europe or between Europe and so called primitive cultures in Africa the Americas and the South Pacific focusing mainly but not exclusively on painting drawing or the decorative arts. Each case foregrounds the centrality of international borrowings or colonial appropriations and counters conceptions of European art as a pure tradition uninfluenced by the artistic forms of other cultures. The contributors analyze the social cultural commercial and political conditions of cultural contact including tourism colonialism religious pilgrimage trade missions and scientific voyages that enabled these exchanges well before the modern age of globalization.
