provides a new approach to understanding the range and impact of this artist's practice as well as its complex relationship to several key artistic and ideological debates of the late twentieth century including the instability of identity the role of appropriation and the boundaries of expressionism Jordana Moore Saggese argues that Basquiat once known as the black Picasso probes not only the boundaries of blackness but also the boundaries of American art Weaving together the artist's interests in painting writing and music this groundbreaking book expands the parameters of aesthetic discourse to consider the parallels Basquiat found among these disciplines in his exploration of the production of meaning Most important Reading Basquiat traces the ways in which Basquiat constructed large parts of his identity as a black man as a musician as a painter and as a writer via the manipulation of texts in his own library 三浦 雅也 (Japan),1997

After the Revolution Eleanor Heartney,Helaine Posner,Nancy Princenthal,Sue Scott,2013-11-04 Why Have There Been No Great Women Artists asked the prominent art historian Linda Nochlin in a provocative 1971 essay Today her insightful critique serves as a benchmark against which the progress of women artists may be measured In this book four prominent critics and curators describe the impact of women artists on contemporary art since the advent of the feminist movement

failure to recognize the needs of cultural minorities Yet a quarter century after the blue sky era cable television programming closely resembled and indeed depended upon broadcast television programming Whatever happened to the Sloan Commission's revolution now in sight In this book Megan Mullen examines the first half century of cable television to understand why cable never achieved its promise as a radically different means of communication Using textual analysis and oral archival and regulatory history she chronicles and analyzes cable programming developments in the United States during three critical stages of the medium's history the early community antenna CATV years 1948-1967 the optimistic blue sky years 1968-1975 and the early satellite years 1976-1995 This history clearly reveals how cable's roots as a retransmitter of broadcast signals the regulatory constraints that stymied innovation and the economic success of cable as an outlet for broadcast or broadcast type programs all combined to defeat most utopian visions for cable programming
