Reaching and Teaching Students with Special Needs Through Art Beverly Levett Gerber, Doris M. Guay, Jane Burnette, 2024-09-30 This second edition of *Reaching and Teaching Students with Special Needs Through Art* is written for art educators, special educators, and those who value the arts for students with special needs. It builds on teachers' positive responses to the first edition and now combines over 700 years of the educational experience of arts and special educators who share their art lessons, behavior management strategies, and classroom stories. The revised second edition provides updated chapters addressing students with emotional/behavioral disabilities, learning disabilities, intellectual disabilities, physical disabilities, and visual and hearing impairments. The newly revised second edition includes chapters on students with autism spectrum disorder, preschool students, and students experiencing trauma. All chapters have been updated to include current definitions and language, recommended teaching strategies, art lesson adaptations, behavior management strategies, and references to related chapters. Follow-up activities are provided for further insights into each group of students. A new summary chapter connects how the authors' collaborations resulted in changes to two professional organizations. Since the first edition, many of the featured authors established the new Division of Visual and Performing Arts Education (DARTS) at the Council for Exceptional Children (CEC) and earlier formed a new National Art Education Association (NAEA) Interest group, Special Needs in Art Education (SNAE), now Arts in Special Education (ASE). This edition is ideal for preservice arts methods courses and education courses on accessibility and inclusion at the undergraduate and graduate levels. It continues to offer current yet proven best practices for reaching and teaching this ever-important population of students through the arts.

This new edition, offering mostly entirely new chapters, provides an accessible, fully updated guide to the world of academic art and design libraries from a range of international experts who reflect current practice at a global level. Coverage includes case studies and library profiles providing benchmarks for developing facilities, teaching and learning, including the ACRL Framework, teaching with special collections, meta-literacies, instructional design, and cultural differences, developments in institutional repositories, digital humanities, and makerspaces, contemporary library design, spaces for collaboration and sustainability. This book will be useful reading for students taking library and information science courses in art librarianship, special collections, and archives, as well as practicing library and information professionals in art and design, school libraries, art museum libraries, and public libraries.
