Williams,2005 In practically all the peacekeeping operations of the 1990s a postconflict reconstruction gap of almost one year separates the end of military peacekeepers mission of halting mass violence from the start of removing mines as well as rebuilding and repairing the host country s physical infrastructure roads and bridges public utilities and buildings In this timely work Colonel Garland Williams analyzes the postconflict reconstruction gap in three case studies Bosnia Kosovo and Afghanistan and shows how military engineering brigades accompanying peacekeeping contingents can be put to use immediately after the conflict ends to restore vital infrastructure and social institutions In the book s concluding chapter Williams proposes changes in U S national security decision making to integrate military engineering brigades into postconflict reconstruction thus making U S military officials less wary of mission creep and nation building *Department of Defense Appropriations for 1997: Military personnel programs, National Guard and Reserve programs, medical programs, readiness of United States forces* United States. Yeh,2006-09-08 As U S military forces appear overcommitted and some ponder a possible return to the draft the timing is ideal for a review of how the American military transformed itself over the past five decades from a poorly disciplined force of conscripts and draft motivated volunteers to a force of professionals revered throughout the world Starting in the early 1960s this account runs through the current war in Iraq with alternating chapters on the history of the all volunteer force and the analytic background that supported decisionmaking The author participated as an analyst and government policymaker in many of the events covered in this book His insider status and access offer a behind the scenes look at decisionmaking within the Pentagon and White House The book includes a foreword by former Secretary of Defense Melvin R Laird The accompanying DVD contains more than 1 700 primary source documents government memoranda Presidential memos and letters staff papers and reports linked directly from citations in the electronic version of the book This unique technology presents a treasure trove of materials for specialists researchers and students of military history public administration and government affairs to draw upon

Adler,2005-12-30 With global commitments and combat duty our armed forces face life threatening challenges on a daily basis However less visible threats also impact the mental health of our military men and women Experts examine challenges on the battlefield such as women coming to terms with life after being prisoners of war or soldiers dealing with mistakenly killing civilians But life in the armed forces presents less dramatic daily challenges Away from the front lines soldiers have to raise their families sometimes as single parents Children have to learn what it s like to be in a military family and to make sense of war Gay or lesbian officers cope with a don t ask don t tell policy An unprecedented range of contributors military officers medical doctors psychologists psychiatrists and professors take us onto the bases and the battlefields and inside the minds of military personnel who face far greater challenges than most of us ever see in the headlines These volumes also highlight factors that make members of the military resilient and stable as well as programs and practices that can ease the psychological burdens of military personnel families and children Readers can better understand how society views our military and military
