The Revival of Beauty Catherine Wesselinoff,2023-08-18 This book provides original descriptive accounts of two schools of thought in the philosophy of beauty the 20th century Anti Aesthetic movement and the 21st century Beauty Revival movement It also includes a positive defence of beauty as a lived experience extrapolated from Beauty Revival position Beauty was traditionally understood in the broadest sense as a notion that engages our sense perception and embraces everything evoked by that perception including mental products and affective states This book constructs and places in parallel with one another the Anti Aesthetic and Beauty Revival movements In the author s view Anti Aestheticism is devoted to a decisive negation of beauty denying its importance as a philosophical notion and its significance as a lived experience It suggests that beauty is a merely sensual experience which can be used at best as a distraction from justice and at worst as an instrument of evil Alternatively the Beauty Revival movement advances arguments for beauty as an experience that extends primarily to sensual experience but which also calls forth mental products and cognitive and affective states evoked by that

experience After reconstructing these two positions the author elaborates on the notion of beauty as a lived experience through three key moments which occur in the process of our experiencing beautiful objects These moments are a the conditions that constitute an experience of beauty b the attitudinal features most likely to lead to the experience of beauty and c the results of the experience of beauty The Revival of Beauty will be of interest to scholars and advanced students working in aesthetics history of philosophy and art history The Limits of Art Jiri Benovsky, 2020-08-18 This open access book is about exploring interesting borderline cases of art It discusses the cases of gustatory and olfactory artworks focusing on food proprioceptive artworks dance martial arts and rock climbing qua proprioceptive experiences intellectual artworks philosophical and scientific theories as well as the vague limits between painting and photography The book focuses on the author's research about what counts as art and what does not as well as on the nature of these limits Overall the author defends a very inclusive view extending the limits of art and he argues for its virtues Some of the limits discussed concern our senses our different perceptual modalities some concern vagueness and fuzzy boundaries between different types of works of art some concern the amount of human intention and intervention in the process of creation of an artwork and some concern the border between art and science In these various ways by understanding better such borderline cases Benovsky suggests that we get a better grip on an understanding of the nature of art **Art and Industry: (1892) Industrial and manual training in the public schools** United States. Office of Education, Isaac Edwards Clarke, 1892 *The art of being beautiful: a series of interviews with a society beauty*, by S- G-. S- G-, 1902 **The Fine arts' journal**, 1847 *A Concise Survey of Music Philosophy* Donald A. Hodges, 2016-10-04 A Concise Survey of Music Philosophy helps music students choose a philosophy that will guide them throughout their careers The book is divided into three sections central issues that any music philosophy ought to consider e g beauty emotion and aesthetics secondly significant philosophical positions exploring what major thinkers have had to say on the subject and finally opportunities for students to consider the ramifications of these ideas for themselves Throughout the book students are encouraged to make choices that will inform a philosophy of music and music education with which they are most comfortable to align Frequently music philosophy courses are taught in such a way that the teacher as well as the textbook used promotes a particular viewpoint A Concise Survey of Music Philosophy presents the most current prevalent philosophies for consideration Students think through different issues and consider practical applications There are numerous musical examples each with links from the author's home website to online video performances Examples are largely from the Western classical canon but also jazz popular and world music styles In the last two chapters students apply their views to practical situations and learn the differences between philosophy and advocacy Hodges has written an excellent resource for those wanting a short but meaningful introduction to the major concepts in music philosophy Applicable to a number of courses in the music curriculum this much needed book is both accessible and flexible containing musical examples tables and diagrams and additional readings that make it particularly

useful for a student's general introduction to the topic I especially like the emphasis on the personal development of a philosophical position which makes the material especially meaningful for the student of music Peter R Webster Scholar in Residence Thornton School of Music University of Southern California USA

Aesthetic Hybridity in Mughal Painting, 1526-1658 Valerie Gonzalez, 2016-03-03 The first specialized critical aesthetic study to be published on the concept of hybridity in early Mughal painting this book investigates the workings of the diverse creative forces that led to the formation of a unique Mughal pictorial language Mughal pictoriality distinguishes itself from the Persianate models through the rationalization of the picture's conceptual structure and other visual modes of expression involving the aesthetic concept of mimesis If the stylistic and iconographic results of this transformational process have been well identified and evidenced their hermeneutic interpretation greatly suffers from the neglect of a methodologically updated investigation of the images conceptual underpinning Valerie Gonzalez addresses this lacuna by exploring the operations of cross fertilization at the level of imagistic conceptualization resulting from the multifaceted encounter between the local legacy of Indo Persianate book art the freshly imported Persian models to Mughal India after 1555 and the influx of European art at the Mughal court in the sixteenth and seventeenth centuries The author's close examination of the visuality metaphysical order and aesthetic language of Mughal imagery and portraiture sheds new light on this particular aspect of its aesthetic hybridity which is usually approached monolithically as a historical phenomenon of cross cultural interaction That approach fails to consider specific parameters and features inherent to the artistic practice such as the differences between doxis and praxis conceptualization and realization intentionality and what lies beyond it By studying the distinct phases and principles of hybridization between the variegated pictorial sources at work in the Mughal creative process at the successive levels of the project intention the practice realization and the result product the author deciphers the modalities of appropriation and manipulation of the heterogeneous elements Her unique

The Subjective Eye Richard Valantasis, Deborah J. Haynes, James D. Smith, Janet F. Carlson, 2006-05-15 One of the great joys of the academic life is to pay homage in a Festschrift to a scholar who has influenced both colleagues and students over years of interaction and friendship both professional and personal This volume honors a scholar and theologian of historical theology a theorist and a practitioner of religion and the arts and a keen analyst of cultural trends both ancient and modern Margaret R Miles's prodigious production as a scholar has legendary qualities Her dozen plus books alone explore history patristics ancient philosophy art and art history spiritual formation and religious practice critical theory film ethics and values personal growth gender and women's studies as well as her true academic loves Augustine and Plotinus The breadth and depth of her own work and her influence upon others demands an expansive volume which the editors of this Festschrift unfortunately had to restrict to four categories Historical Theology Religion and Culture Religion and Gender and Religion and the Visual Arts in order to capture the heart of our appreciation for her from the Introduction

Ours is an age full of desires but impoverished in its understanding of where those desires lead an age that claims mastery over the world but also claims to find the world as a whole absurd or unintelligible In *The Vision of the Soul* James Matthew Wilson seeks to conserve the great insights of the western tradition by giving us a new account of them responsive to modern discontents The western or Christian Platonist tradition he argues tells us that man is an intellectual animal born to pursue the good to know the true and to contemplate all things in beauty Wilson begins by reconceiving the intellectual conservatism born of Edmund Burke's jeremiad against the French Revolution as an effort to preserve the West's vision of man and the cosmos as ordered by and to beauty After defining the achievement of that vision and its tradition Wilson offers an extended study of the nature of beauty and the role of the fine arts in shaping a culture but above all in opening the human intellect to the perception of the form of reality Through close studies of Theodor W Adorno and Jacques Maritain he recovers the classical vision of beauty as a revelation of truth and being Finally he revisits the ancient distinction between reason and story telling between mythos and logos in order to rejoin the two Story telling is foundational to the forms of the fine arts but it is no less foundational to human reason Human life in turn constitutes a specific kind of form a story form The ancient conception of human life as a pilgrimage to beauty itself is one that we can fully embrace only if we see the essential correlation between reason and story and the essential convertibility of truth goodness and beauty in beauty By turns a study in fundamental ontology aesthetics and political philosophy Wilson's book invites its readers to a renewal of the West's intellectual tradition
