On the Camera Arts and Consecutive Matters Hollis Frampton, 2015-01-30 The collected writings of artist and filmmaker Hollis Frampton including all the essays from the long unavailable *Circles of Confusion* along with rare additional material As Hollis Frampton's photographs and celebrated experimental films were testing the boundaries of the camera arts in the 1960s and 1970s his provocative and highly literate writings were attempting to establish an intellectually resonant form of discourse for these critically underexplored fields It was a time when artists working in diverse disciplines were beginning to pick up cameras and produce films and videotapes well before these practices were understood or embraced by institutions of contemporary art This collection of Frampton's writings presents his critical essays many written for *Artforum* and *October* along with additional material including lectures correspondence interviews and production notes and scripts It replaces and supersedes the long unavailable *Circles of Confusion* published in 1983 Frampton ranged widely over the visual arts in his writing and the texts in this collection display his unique approaches to photography film and video as well as the plastic and literary arts They include critically acclaimed essays on Edward Weston and Eadweard Muybridge as well as appraisals of contemporary photographers the influential essay *For a Metahistory of Film* along with scripts textual material and scores for his films writings on video that constitute a prehistory of the digital arts a dialogue with Carl Andre his friend and former Phillips Andover classmate from the early 1960s and two inventive almost unclassifiable pieces that are reminiscent of Borges Joyce and Beckett

Photography after Postmodernism David Bate, 2022-08-19 In life after postmodernism our conception of photography is not the same as before *Photography After Postmodernism* starts with this conception and explores what changes have affected photography its relation to social life and our image centred culture Engaging with the visual environment and issues that have emerged in the postmodern world David Bate introduces fresh approaches and

analysis of photographs and their place within the aftermath of postmodernist thought The book shows how photographs circulate in an image world beyond their art or media origins that deeply affects our sense of time and relation to memory The role of archives dreams memories and time are deployed to develop and resituate arguments about photography made by Roland Barthes in *Camera Lucida* to further engage and understand our contemporary condition By considering how afterwardness is invoked in the developments of modern and contemporary photography Bate demonstrates the complex ways in which photographic images resonate across public and private spaces while carrying a slippage of meaning that is never quite fixed yet always contingent and social The approach shows how modernist photography was already invested in values that its discourse could not enunciate which resonates with much contemporary photography today Featuring a range of historical and contemporary images the book offers detailed and innovative readings of specific photographs which open new avenues of thought for those studying and researching visual culture and photography

The Concise Focal Encyclopedia of Photography Michael Peres, 2014-06-20 Defining photography is impossible Revealing it is another matter and that's what *The Concise Focal Encyclopedia of Photography* does with each turn of the page History The technical origins and evolution of photography are half of the story The other half consists of the ways that cultural forces have transformed photography into a constellation of practices more diverse than any other mode of representation Photographers can tell a more in depth story through a photo like Dorothea Lange's *Migrant Mother* than a journalist ever could with the written word alone Major themes and practitioners Over 25 entries many with supporting illustrations examine the figures trends and ideas that have contributed most heavily to the history and current state of photography Contemporary issues The issues influencing photography today are more complex than at any other time in its history Questions of ethics desire

Cooper,2009-04-27 A COMPANION TO AESTHETICS This second edition of A Companion to Aesthetics examines questions that were among the earliest discussed by ancient philosophers such as the nature of beauty and the relation between morality and art while also addressing a host of new issues prompted by recent developments in the arts and in philosophy including coverage of non Western art traditions and of everyday and environmental aesthetics The volume also canvases debates regarding the nature of representation the relation between art and truth and the criteria for interpretation which are among the most hotly discussed topics in contemporary philosophy In this extensively revised and updated edition 168 alphabetically arranged articles provide comprehensive treatment of the main topics and writers in aesthetics Major additions include historical overviews from the prehistoric to the present and a section on the individual arts A Companion to Aesthetics will serve students of philosophy literary criticism and cultural studies as well as the educated general reader both as a work of reference and with its many substantial essays as a guide to the best thinking about the arts from the ancient Greeks to the dawn of the twenty first century *Art, Design, Photo* ,1975 **Marvelous Images** Kendall L. Walton,2008 The twelve

essays by Kendall Walton in this volume address a broad range of theoretical issues concerning the arts. Many of them apply to the arts generally to literature, theater, film, music, and the visual arts, but several focus primarily on pictorial representation or photography. In *How Marvelous: Toward a Theory of Aesthetic Value*, Walton introduces an innovative account of aesthetic value, and in this and other essays he explores relations between aesthetic value and values of other kinds, especially moral values. Two of the essays take on what has come to be called imaginative resistance, a cluster of puzzles that arise when works of fiction ask us to imagine or to accept as true in a fiction moral propositions that we find reprehensible in real life. *Transparent Pictures*, Walton's classic and controversial account of what is special about photographic pictures, is included along with a new essay on a curious but rarely noticed feature of photographs and other still pictures: the fact that a depiction of a momentary state of an object in motion allows viewers to observe that state in imagination for an extended period of time. Two older essays round out the collection: another classic, *Categories of Art*, and a less well-known essay, *Style and the Products and Processes of Art*, which examines the role of appreciators' impressions of how a work of art came about in understanding and appreciation. None of the reprinted essays is abridged, and new postscripts have been added to several of them.
