Jacob Burckhardt's Social and Political Thought Richard Franklin Sigurdson, 2004-01-01 Contrary to his usual portrayal as a disinterested aesthete Swiss cultural historian Jacob Burckhardt is characterised as an original social and political thinker in Richard Sigurdson s timely book Jacob Burckhardt s Social and Political Thought Burckhardt s thinking on a number of ideas including the relationship between the individual and the mass the tension between the ideals of equality and human excellence and the role of the intellectual in the modern state is the subject of insightful analysis thus providing a rare investigation into Burckhardt s culture critique of the nineteenth century Other important aspects of Burckhardt s life that undoubtedly influenced both his historical and political thought such as his ambiguous relationship with Friedrich Nietzsche are carefully scrutinised in this groundbreaking analysis of the Swiss historian Known primarily as an historian Burckhardt s historical writings provide not only a powerful critique of his own times but also a broad ranging political philosophy that can be placed within the larger German tradition of evaluating politics according to the values and standards of art and culture

Although Burckhardt himself expressed his scepticism towards general theories and claimed to be devoid of a personal philosophical position through an examination of his works Sigurdson argues that both implicit and explicit political reflections and theories are recognisable

The Political Thought of Václav Havel Daniel Brennan, 2016-10-05 The book considers Václav Havel's body of writing as a cohesive whole offering a consistent political philosophy This bold claim is backed up through a close examination of Havel's plays letters essays and aphorisms The political philosophy that a close reading of Havel reveals is a liberal one However Havel is not the run of the mill liberal having influences from the field of phenomenology Masaryk Husserl Levinas Patočka and Heidegger which give him a nuanced view of the self Havel sees the self as something always being formed Hence for Havel man has an ability to shake his current state and invite transcendence into his life This agonistic process reveals our responsibility and liberates the self from forces which coerce behaviour

The Strange Persistence of Universal History in Political Thought Brett Bowden, 2017-03-24 This book explores and explains the reasons why the idea of universal history a form of teleological history which holds that all peoples are travelling along the same path and destined to end at the same point persists in political thought Prominent in Western political thought since the middle of the eighteenth century the idea of universal history holds that all peoples can be situated in the narrative of history on a continuum between a start and an end point between the savage state of nature and civilized modernity Despite various critiques the underlying teleological principle still prevails in much contemporary thinking and policy planning including post conflict peace building and development theory and practice Anathema to contemporary ideals of pluralism and multiculturalism universal history means that not everyone gets to write their own story only a privileged few For the rest history and future are taken out of their hands subsumed and assimilated into other people's narrative

Equality and Vulnerability in the Context of Italian Political Philosophy Gianfrancesco Zanetti, 2023-09-17 One of the main goals of this book is to determine if in the works of some of the key authors in the history of Italian political philosophy a notion of efficacy can be found In legal philosophy efficacy is the capacity a norm has to effectively influence citizens behavior The principle of efficacy is that according to which an order or rule exists as such when it is followed effectively in practice Here by efficacy I mean the idea that normative phenomena are self justifying without reference to extrinsic systems of value such as natural law The examinations of several texts undertaken here constitute reflections on this theme without any claim to systematicity They have been grouped together roughly in historical order by their common respect for the contexts within which they reason and reach decisions which lends them a characteristic flavor of harsh realism that at times relies on a minimalist use of traditional normative categories The second theme that emerges through the respective chapters each of which constitutes the text for a lesson in a course for Ph D students is that of the relationship between equality and vulnerability Here the idea is to elaborate a concept of vulnerability that is not underpinned by what we in Italy call an anthropology that is a fixed notion of human nature Instead this concept should be comprehensible and graspable solely on the basis of the recognition of decisions and actions that are merely efficacious that function for what they are and what they do This recognition doesn't even need to be explicitly articulated by these authors with any specific deliberately conscious awareness The goal is not to identify a precise tradition of thought one which elaborates a given line of reflection but rather to highlight certain themes that emerge in the texts examined even as the authors write with and for their own specific contingent set of motives which differ from time to time and place to place These authors include some who are widely known such as Dante Machiavelli and Beccaria At times they are figures who typify certain key historical episodes such as the Risorgimento Giuseppe Mazzini or Fascism Cesare Lombroso and Santi Romano while others reflect certain aspects of a contemporary debate Pasolini and the Braibanti affair The book is based on lectures given for a 2021 Ph D Course at the University of California Berkeley's Department of Italian Studies
