Explaining Creativity Robert Keith Sawyer, Danah Henriksen, 2024. Genius Invention Talent. And of course, creativity. These words describe the highest levels of human performance. When we're engaged in the act of being creative, we feel we are performing at the peak of our abilities. Creative works give us insight and enrich our lives. Creativity is part of what makes us human. Our nearest relatives, chimpanzees and other primates, are often quite intelligent but never reach these high levels of performance.

The Routledge Companion to Museum Ethics Janet Marstine, 2012-05-23. Routledge Companion to Museum Ethics is a theoretically informed reconceptualization of museum ethics discourse as a dynamic social practice central to the project of creating change in the museum. Through twenty-seven chapters by an international and interdisciplinary group of academics and practitioners, it explores contemporary museum ethics as an opportunity for growth rather than a burden of compliance. The volume represents diverse strands in museum activity, from exhibitions to marketing, as ethics is embedded in all areas of the museum sector. What the contributors share is an understanding of the contingent nature of museum ethics in the twenty-first century, its relations with complex economic, social, political, and technological forces, and its fluid, ever-shifting sensibility. The volume examines contemporary museum ethics through the prism of those disciplines and methods that have shaped it most. It argues for a museum ethics discourse defined by social responsibility, radical transparency, and shared guardianship of heritage. And it demonstrates the moral agency of museums, the concept that museum ethics is more than the personal and professional ethics of individuals and concerns the capacity of institutions to generate self-reflective and activist practice.
