Handbook of Alternative Theories of Economic Development

Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28 The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo-classical tenets. With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields, this volume represents a landmark in the field of economic development. It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition. The subject matter is approached from several complementary perspectives. From a historical angle, the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment. From a geographical angle, it includes chapters on African, Chinese, Indian, and Muslim approaches to economic development. Different schools are also explored and discussed, including nineteenth-century US development theory, Marxist, Schumpeterian, Latin American structuralism, regulation theory, and world systems theories of development. In addition, the Handbook has chapters on important events and institutions, including The League of Nations, The Havana Charter, and UNCTAD, as well as on particularly influential development economists. Contemporary topics such as the role of finance, feminism, the agrarian issue, and ecology and the environment are also covered in depth. This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development. It should be read by all serious scholars, teachers, and students of development studies, and indeed anyone interested in alternatives to development orthodoxy.

This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy, as well as thoughtful philosophical articles on concepts and ideas related to the study of non-Western science, such as rationality, objectivity, and method. You'll also find material on religion and science, East and West, and magic and science.

The History of Science and Technology in Wei, Jin, Southern and Northern Dynasty

Li Shi, The book is the volume of The History of Science and Technology in Wei, Jin, Southern and Northern Dynasty, among a series of books of Deep into China Histories. The earliest known written records of the history of China date from as early as 1250 BC from the Shang dynasty; c. 1600-1046 BC and the Bamboo Annals (296 BC) describe a Xia dynasty; c. 2070-1600 BC before the Shang, but no writing is known from the period. The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural

centers along both the Yellow River and Yangtze River These Yellow River and Yangtze civilizations arose millennia before the Shang With thousands of years of continuous history China is one of the world s oldest civilizations and is regarded as one of the cradles of civilization The Zhou dynasty 1046 256 BC supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period These states became independent and warred with one another in the following Warring States period Much of traditional Chinese culture literature and philosophy first developed during those troubled times In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin marking the beginning of imperial China However the oppressive government fell soon after his death and was supplanted by the longer lived Han dynasty 206 BC 220 AD Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly In the 21 centuries from 206 BC until AD 1912 routine administrative tasks were handled by a special elite of scholar officials Young men well versed in calligraphy history literature and philosophy were carefully selected through difficult government examinations China s last dynasty was the Qing 1644 1912 which was replaced by the Republic of China in 1912 and in the mainland by the People s Republic of China in 1949 Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood the most recent being the Chinese Civil War 1927 1949 China was occasionally dominated by steppe peoples most of whom were eventually assimilated into the Han Chinese culture and population Between eras of multiple kingdoms and warlordism Chinese dynasties have ruled parts or all of China in some eras control stretched as far as Xinjiang and Tibet as at present Traditional culture and influences from other parts of Asia and the Western world carried by waves of immigration cultural assimilation expansion and foreign contact form the basis of the modern culture of China

Iron and Steel in Ancient China Donald B. Wagner,1993 A study of the production and use of iron and steel in early China and simultaneously a methodological study of the reconciliation of archaeological and written sources in Chinese cultural history Includes chapters on the technology of iron production based on studies of artifact microstructures

Metamorphic Imagery in Ancient Chinese Art and Religion Elizabeth Childs-Johnson,John S Major,2023-05-30 Metamorphic Imagery in Ancient Chinese Art and Religion demonstrates that the concept of metamorphism was central to ancient Chinese religious belief and practices from at least the late Neolithic period through the Warring States Period of the Zhou dynasty Central to the authors argument is the ubiquitous motif in early Chinese figurative art the metamorphic power mask While the motif underwent stylistic variation over time its formal properties remained stable underscoring the image s ongoing religious centrality It symbolized the metamorphosis through the phenomenon of death of royal personages from living humans to deceased ancestors who required worship and sacrificial offerings Treated with deference and respect the royal ancestors lent support to their living descendants ratifying and

upholding their rule neglected they became dangerous even malevolent Employing a multidisciplinary approach that integrates archaeologically recovered objects with literary evidence from oracle bone and bronze inscriptions to canonical texts all situated in the appropriate historical context the study presents detailed analyses of form and style and of change over time observing the importance of relationality and the dynamic between imagery materials and affects This book is a significant publication in the field of early China studies presenting an integrated conception of ancient art and religion that surpasses any other work now available Science and Civilisation in China, Part 13, Mining Peter J. Golas,1999-02-25 The fifth volume of Dr Needham s immense undertaking covers the subjects of chemistry and chemical technology This the thirteenth part of the volume is the first history of Chinese mining to appear in a western language Covering from the Neolithic period to the present day it deals with the full range of Chinese mining from copper to mercury arsenic to coal and a large number of other minerals and materials The author draws extensively not only on written sources but also on archaeological remains and observation of traditional techniques still in use The interrelationship between Chinese mining and the social economic and political conditions in which it took place is examined and leads the author to conclude that these extraneous factors were probably more important in determining how mining was carried out than technological progress *Cereals in China* , **Handbook of East and Southeast Asian Archaeology** Junko Habu,Peter V. Lape,John W. Olsen,2017-12-08 The Handbook of East and Southeast Asian Archaeology focuses on the material culture and lifeways of the peoples of prehistoric and early historic East and Southeast Asia their origins behavior and identities as well as their biological linguistic and cultural differences and commonalities Emphasis is placed upon the interpretation of material culture to illuminate and explain social processes and relationships as well as behavior technology patterns and mechanisms of long term change and chronology in addition to the intellectual history of archaeology as a discipline in this diverse region The Handbook augments archaeologically focused chapters contributed by regional scholars by providing histories of research and intellectual traditions and by maintaining a broadly comparative perspective Archaeologically derived data are emphasized with text based documentary information provided to complement interpretations of material culture The Handbook is not restricted to art historical or purely descriptive perspectives its geographical coverage includes the modern nation states of China Mongolia Far Eastern Russia North and South Korea Japan Taiwan Vietnam Cambodia Laos Thailand Burma Malaysia Indonesia the Philippines and East Timor
