McKenzie, 2022 In 1834 the weary missionary Jason Lee arrived on the banks of the Willamette River and began to build a mission to convert the local Kalapuya and Chinook populations to the Methodist Church The denomination had become a religious juggernaut in the United States dominating the religious scene throughout the mid Atlantic and East Coast But despite its power and prestige and legions of clergy and congregants Methodism fell short of its goals of religious supremacy in the northwest corner of the continent In *A Country Strange and Far* Michael C McKenzie considers how and why the Methodist Church failed in the Pacific Northwest and how place can affect religious transplantation and growth Methodists failed to convert local Native people in large numbers and immigrants who moved into the rural areas and cities of the Northwest wanted little to do with Methodism McKenzie analyzes these failures arguing the region itself both the natural geography of the place and the immigrants and clergy's responses to it was a primary reason for the church's inability to develop a strong following there The Methodists' efforts in the Pacific Northwest provide an ideal case study for McKenzie's timely region based look at religion **Wet Growth** Craig Anthony Arnold, 2005 It is unrealistic and unwise to believe that water law will or should govern land use decisions or alternatively that land use planning and regulation will or should govern water management Nonetheless the initially unsettling question of whether one area of law and policy should control the other provokes discussion and reflection on both why and how we might move toward greater integration of land and water controls *Wet Growth Should Water Law Control Land Use* was written as a means to disseminate new ideas about the land water interface in law and policy and provides an overview of the relevant issues current trends toward integrating land and water controls and prospects for further progress The authors of this book describe the nature and costs of our currently fragmented management of land and water resources that results in unsustainable practices and suggest principles that should guide and direct our response to these problems Although they take differing perspectives the authors share common or at least overlapping observations about the fragmentation and integration of land and water controls **From Warm**

Center to Ragged Edge Jon Lauck, 2017-06 During the half century after the Civil War intellectuals and politicians assumed the Midwest to be the font and heart of American culture Despite the persistence of strong currents of midwestern regionalism during the 1920s and 1930s the region went into eclipse during the post World War II era In the apt language of Minnesota's F Scott Fitzgerald the Midwest slid from being the warm center of the republic to its ragged edge This book explains the factors that triggered the demise of the Midwest's regionalist energies from anti midwestern machinations in the literary world and the inability of midwestern writers to break through the cultural politics of the era to the growing dominance of a coastal urban culture These developments paved the way for the proliferation of images of the Midwest as flyover country the Rust Belt a staid and decaying region Yet Lauck urges readers to recognize persisting and evolving forms of midwestern identity and to resist the forces that squelch the nation's interior voices *Dripping Dry* David N.

A New Significance ,1996 Rocky Mountain Divide John B. Wright,2010-07-22 The opposing forces of conservation and development have shaped and will continue to shape the natural environment and scenic beauty of the American West Perhaps nowhere are their opposite effects more visible than in the neighboring states of Colorado and Utah so alike in their spectacular mountain environments yet so different in their approaches to land conservation This study explores why Colorado has over twenty five land trusts while Utah has only one John Wright traces the success of voluntary land conservation in Colorado to the state s history as a region of secular commerce As environmental consciousness has grown in Colorado people there have embraced the businesslike approach of land trusts as simply a new more responsible way of conducting the real estate business In Utah by contrast Wright finds that Mormon millennialism and the belief that growth equals success have created a public climate opposed to the formation of land trusts As Wright puts it environmentalism seems to thrive in the Centennial state within the spiritual vacuum which is filled by Mormonism in Utah These findings remind conservationists of the power of underlying cultural values that affect their efforts to preserve private lands

Northwest Lands, Northwest Peoples Dale D. Goble, Paul W. Hirt, 1999 This collection of essays addresses questions of how humans have adapted to the northwestern landscape and modified it over time and how the changing landscape in turn affected human society, economy, laws, and values

The World of the American West Gordon Morris Bakken, 2016-12-12 Addressing everything from the details of everyday life to recreation and warfare, this two-volume work examines the social, political, intellectual, and material culture of the American Old West from the California Gold Rush of 1849 to the end of the 19th century. What was life really like for ordinary people in the Old West? What did they eat, wear, and think? How did they raise their children? How did they interact with government? What did they do for fun? This encyclopedia provides readers with an engaging and detailed portrayal of the Old West through the examination of social, cultural, and material history. Supported by the most current research, the multivolume set explores various aspects of social history: family, politics, religion, economics, and recreation, to illuminate aspects of a society's emotional life, interactions, opinions, views, beliefs, intimate relationships, and connections between the individual and the greater world. Readers will be exposed to both objective reality and subjective views of a particular culture, as a result, they can create a cohesive, accurate impression of life in the Old West during the

second half of the 1800s **Playing House in the American West** Cathryn Halverson, 2013-11-26 Examines an eclectic group of western women's autobiographical texts canonical and otherwise *Playing House in the American West* argues for a distinct regional literary tradition characterized by strategic representations of unconventional domestic life The controlling metaphor Cathryn Halverson uses in her engrossing study is playing house From Caroline Kirkland and Laura Ingalls Wilder to Willa Cather and Marilynne Robinson from the mid nineteenth to the late twentieth centuries western authors have persistently embraced wayward or eccentric housekeeping to prove a woman's difference from western neighbors and eastern readers alike The readings in *Playing House* investigate the surprising textual ends to which westerners turn the familiar terrain of the home evaluating community arguing for different conceptions of race and class and perhaps most especially resisting traditional gender roles Western women writers Halverson argues render the home as a stage for autonomy resistance and imagination rather than as a site of sacrifice and obligation The western women examined in *Playing House in the American West* are promoted and read as representatives of a region as insiders offering views of distant and intriguing ways of life even as they conceive of themselves as outsiders By playing with domestic conventions they recast the region they describe portraying the West as a place that fosters female agency individuality and subjectivity
