Saratoga Rupert Furneaux,2021-03-30 The Grand Strategy the imaginative plan to divide the rebellious American colonies ended in disaster On October 17 1777 General Sir John Burgoyne alone unaided and stranded in the American wilderness capitulated with his army at Saratoga in upper New York State It was the turning point of the Revolution which culminated four years later in the British surrender at Yorktown Creasy wrote of Saratoga Nor can any military event be said to have exercised more important influence upon the future fortunes of mankind Who blundered For nearly two centuries Lord George Germain the maladroit minister has been blamed together with the Commander in Chief Sir William Howe but Burgoyne Gentleman Johnny as his affectionate troops called him has largely escaped criticism Only in the late 1960s had a full assessment become possible by the publication of all the correspondence that passed between these men Originally published in 1971 from his study of these letters and by his visit to the campaign area author Rupert Furneaux questions this long accepted view The British disaster resulted he says not because anyone particularly blundered or from any pigeon holed despatch but rather because no one bargained that thousands of ordinary American citizens would rally to bar Burgoyne s path Experienced frontier fighters and skilled marksmen they mowed down the closely ranked Redcoats and the German mercenaries who had all been trained for European battles Saratoga heralded a new age of warfare which Europeans took another hundred years to learn It was also far more than a British defeat it was an American victory the decisive battle whereby they won the right to run their own lives without interference from Europe and with incalculable consequences

The Genesis of Israel and Egypt Emmet Sweeney, 2023-10-01 The Genesis of Israel and Egypt examines the earliest phase of historical consciousness in the ancient Near East looking in particular at the mysterious origins of Egypt s civilization and its links with Mesopotamia and the early Hebrews The book takes a radically alternative view of the rise of high civilization in the Near East and the forces which propelled it The author Emmet Sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes events which had a profound effect upon the ancient peoples and left its mark upon their myths legends customs and religions Ideas found in all corners of the globe concepts such as dragon worship pyramid building and human sacrifice are shown by Sweeney to have a common origin in the cataclysmic events of the period termed the eruptive age by legendary English explorer Percy Fawcett Terrified and traumatized by the forces of nature people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods These events which are fundamental to any understanding of the first literate cultures have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world s great libraries Starting with clues unearthed by history sleuth Immanuel Velikovsky and others Emmet Sweeney takes the investigation further While the Near Eastern civilizations are generally considered to have taken shape around 3300 BC about 2 000 years before those of China and the New World Ages in Alignment demonstrates that they had no 2 000 year head start All the ancient civilizations arose simultaneously around 1300 BC in the wake of a terrible natural catastrophe recalled in legend as the Flood or Deluge Sweeney points out that the presently accepted chronology of Egypt is not based on science but on venerated literary tradition This chronology had already been established in its present form by the third century BC when Jewish historians utilizing the History of Egypt by the Hellenistic author Manetho sought to tie in Egypt s history with that of the Bible Apparent gaps and weird repetitions resulted Improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or Pythagorean geometry point to the weaknesses of the traditional view Taking a more

rigorous approach and pointing to solid evidence Emmet Sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times Volume 1 The Genesis of Israel and Egypt looks at the archaeological evidence for the Flood evidence now misinterpreted and ignored This volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early Mesopotamians westward toward Egypt where they helped to establish Egyptian civilization This migration recalled in the biblical story of Abraham provides the first link between Egyptian and Hebrew histories The next link comes a few generations later with Imhotep the great seer who solved the crisis of a seven year famine by interpreting pharaoh Djoser s dream Imhotep is shown to be the same person as Joseph son of Jacob *Proceedings of the American Academy of Arts and Sciences* American Academy of Arts and Sciences,1852 Vol 12 from May 1876 to May 1877 includes Researches in telephony by A Graham Bell
