Muslims on the Americanization Path? Yvonne Yazbeck Haddad, John L. Esposito, 2000-05-11 Islam is the fastest growing religion in the United States There are more Muslims in America than in Kuwait Qatar and Libya together Leaving aside immigration and conversion birthrate alone ensures that in the first part of the twenty first century Islam will replace Judaism as the nation's second largest religion Like all religious minorities in America Muslims must confront a host of difficult questions concerning faith and national identity Can they become part of a pluralistic American society without sacrificing their identity Can Muslims be Muslims in a state that is not governed by Islamic law Will the American legal system protect Muslim religious and cultural differences Is there a contradiction between demanding equal rights and insisting on maintaining a distinctively separate identity Will the secular and or Judeo Christian values of American society inhibit the Muslim practice of religious faith While the Muslims of America are indeed on the path to Americanization what that means and what that will yield remains uncertain In this thoughtful and wide ranging volume fourteen distinguished scholars take an in depth look at these issues and examine the varied responses and opinions of the Muslim community

American Studies, 2006 *The American Southern Gothic on Screen* Karen Horsley, 2025-10-01 The Southern Gothic on Screen explores a body of screen texts that conform to certain generic conventions and aesthetics that since the early twentieth century have led to the construction of the American South as a space of ruin decay melancholy loss and haunting The book considers the cultural significance of the Southern Gothic on screen by examining southern otherness as the primary mechanism through which the South is rendered a space of darkness and danger This opens up a critical space for the Southern Gothic to be discussed as a screen genre with its own complex visual thematic and narrative codes The book establishes a perspective that synthesizes a broad understanding of Southern Gothic genericity with pre-existing cultural and political discourses on the South resulting in an analysis that is specific to film and television while remaining heedful of the intersecting discourses that inform both the Gothic and the South as historic and mediated constructs The Political

Economy of the Internet in Asia and the Pacific Jason Abbott, 2004-12-30 Diverse contributors explore the impact of the Internet in the Asia Pacific region **Tracking Global Wokeism**, 2025-07-03 In this volume nineteen authors ask does wokeness exist in the non Western world And if yes is it imported from America or can it also have its own vernacular roots Wokeness has helped advance the cause of social justice in many domains However a cursory search on the internet can yield the impression that woke is now predominantly used in a negative fashion The present book approaches woke from unusual philosophical angles that do not adhere to either pro or counter positions but that try to transcend purely ideological perspectives The book shifts the debate to an international or global level **Arabs in America** Michael

Blood and Debt Miguel Angel Centeno,2015-08-26 What role does war play in political development Our understanding of

the rise of the nation state is based heavily on the Western European experience of war Challenging the dominance of this model Blood and Debt looks at Latin America s much different experience as more relevant to politics today in regions as varied as the Balkans and sub Saharan Africa The book s illuminating review of the relatively peaceful history of Latin America from the late eighteenth through the early twentieth centuries reveals the lack of two critical prerequisites needed for war a political and military culture oriented toward international violence and the state institutional capacity to carry it out Using innovative new data such as tax receipts naming of streets and public monuments and conscription records the author carefully examines how war affected the fiscal development of the state the creation of national identity and claims to citizenship Rather than building nation states and fostering democratic citizenship he shows war in Latin America destroyed institutions confirmed internal divisions and killed many without purpose or glory
