Countryside Planning Kevin Bishop, Adrian Phillips, 2012-05-23 Not since the 19th century has the future of the countryside been such a focus of political and public attention nor of profound uncertainty and anguished debate A watershed has now been reached and in this time of unprecedented change new tools are needed for planning and managing the countryside Increasingly the drivers of countryside management and conservation are European and international They aim to provide comprehensive new frameworks for the whole countryside and encourage community driven planning and protection There have been numerous responses at the country and local levels within the UK In this book a broad range of scholars and practitioners review the international drivers affecting countryside policy and practice and through a variety of case studies they assess the value of country and local responses The result is a powerful and coherent volume that provides a fully up to date review and analysis of the pressures on the countryside the policies for the future and the keys to successful implementation Countryside Planning is essential reading for planners local authorities and rural organizations conservationists and environmental groups as well as academics and students in planning rural studies environmental studies and geography

Trees Beyond the Wood (colour) Ian D. Rotherham, Christine Handley, Mauro Agnoletti, Tomasz Samojlik, 2013-07-05 Trees Beyond the Wood was written for a conference organised to celebrate twenty years of work since the first major conference on the theme of ancient trees and woodlands held in Sheffield UK It was held almost ten years after the landmark 2003 Working and Walking in the Footsteps of Ghosts event which started to raise issues and challenge assumptions about what is ancient or natural and what is meant by the terms wood or woodland Since then on going work in a range of disciplines across ecology biology landscape history archaeology forestry and nature conservation has continued the process of research and evaluation across the subject area The collection of papers by contributors from across Europe reflects this broad range of interests and disciplines

The End of Tradition? Ian D. Rotherham, 2014 The threats from global cultural change and abandonment of traditional landscape management increased in the last half of the twentieth century and ten years into the twenty first century show no signs of slowing down Their impacts on global biodiversity and on people disconnected from their traditional landscapes pose real and serious economic and social problems which need to be addressed now The End of Tradition conference held in Sheffield UK was organised by Ian D Rotherham and colleagues It addressed the fundamental issues of whether we can conserve the biodiversity of wonderful and iconic landscapes and reconnect people to their natural environment And if we can how can we do so and make them relevant for the twenty first century The book is in two parts Part 1 A History of Commons and Commons Management and Part 2 Commons Current Management and Problems

Cultural Severance and the Environment Ian D. Rotherham, 2013-05-09 This major book explores commons lands and rights of usage in common traditional and customary practices and the cultural nature of landscapes Importantly it addresses now critical matters of cultural severance and largely unrecognized impacts on

biodiversity and human societies and implications for conservation sustainability and local economies The book takes major case studies and perspectives from around the world to address contemporary issues and challenges from historical and ecological perspectives The book developed from major international conferences and collaborations over around fifteen years culminating The End of Tradition in Sheffield UK 2010 The chapters are from individuals who are both academic researchers and practitioners These ideas are now influencing bodies like the EU UNESCO and FAO with recognition by major organisations and stakeholders of the critical state of the environment consequent on cultural severance

Fry, 2013-06-29 This book has been initiated by the workshop on Cultural heritage in changing landscapes held during the IALE International Association for Landscape Ecology European Conference that started in Stockholm Sweden in June 2001 and continued across the Baltic to Tartu Estonia in July The papers presented at the workshop have been supported by invited contributions that address a wider range of the cultural heritage management issues and research interfaces required to study cultural landscapes The book focuses on landscape interfaces Both the ones we find out there in the landscape and the ones we face while doing research We hope that this book helps if not to make use of these interfaces then at least to map them and bridge some of the gaps between them The editors wish to thank those people helping us to assemble this collection First of all our gratitude goes to the authors who contributed to the book We would like to thank Marc Antrop Mats Widgren Roland Gustavsson Marion Potschin Barbel Tress Tiina Peil Helen Soovali and Anu Printsmann for their quick and helpful advice opinions and comments during the different stages of editing Helen Soovali and Anu Printsmann together with Piret Pungas thank you for technical help **Conserving and Managing Ancient Monuments** Keith Emerick, 2014 A survey of the theory and methods of conservation from the nineteenth century to the present day highlighting future pathways The origins and use of conservation principles and practice from the nineteenth century to the present day are charted in this volume Written from the perspective of a practitioner it examines the manner in which a single dominant mode of conservation which held sway for many decades is now coming under pressure from a different and more democratic heritage management practice favouring diversity inclusion and difference The author blends case studies from Ireland Cyprus and England with examples from current practice community heritage initiatives and political policy highlighting the development and use of international charters and conventions Central to the main argument of the book is that the sacred cows of conservation antiquity fabric and authenticity have outlived their usefulness and need to be rethought Dr Keith Emerick is an English Heritage Inspector of Ancient Monuments in York and North Yorkshire he is also a Research Associate at the University of York British National Bibliography for Report Literature, 2000 **Vegetation Management in**
