*Winning in 2025* Michael de Kare-Silver, 2019-02-12 Such is the pace of technology driven change that companies around the world are scrambling to catch up to transform to get up to date reinvent themselves for this Digital age FinTech InsurTech Blockchain Bitcoin Cloud Artificial Intelligence Machine Learning Virtual Reality Robotics Cyber Security Internet of Things there s seems no end to what new tech is generating and with it the substantial challenges and opportunities for every organisation How make sense of this mass of ideas which ones to focus on and prioritise now and which can be left to another day How to transform and change and capture the key emerging options how energise and excite and empower teams and employees to embrace all this change and take advantage of it what are the keys to success This new book sets out a possible roadmap and blueprint to help companies navigate their way through these changing times it looks at best practices and lessons learned and aims to distil that into a clear set of guidelines and working advice There s no easy answer and every company is at different stages on their transformation journeys but if some of the ideas and insights here can be adopted and implemented it can provide the platform to succeed and be a winner in 2025 *The Ethics of Courage* Jacques M. Chevalier, 2023-11-17 This two volume work examines far reaching debates on the concept of courage from Greek antiquity to the Christian and mediaeval periods as well as the modern era Volume 1 explains how competing accounts of epist m rational wisdom and truth dominated classical antiquity Early Christian and mediaeval thinkers in contrast favoured fortitude founded on faith and fear of God over philosophical reasoning left to its own devices Volume 2 turns to theories of courage from the early modern period to the present It shows how the twin laws of polis and physis are at the heart of post medieval thought Courage is found at the crossroads of love and dread freedom and fate happiness and suffering as well as power and submission to the ruling order The later influence of evolutionism existentialism and the social and natural sciences on moral philosophy is also addressed at some length The protection of people s best interests the passions and powers of the human will and the rule of active energy in all aspects of life supplant courage formerly viewed through the lens of reason or faith or a combination of the two These new ideas paradoxically herald the end of the ethics of courage They also undermine the courage of ethical thinking Courage is no longer an end in itself nor is it a means to happiness at the end Regardless of what Gandhi Tillich and Foucault have to say about the topic late modernity and the global age witness a marked loss of interest in courage as an idea worthy of conceptual investigation Debates about the moral implications of

courage give way to the value free science of resilience which studies how people can recover from past trauma and find wellness primarily in the realm of physis
