Ordinary Differential Equations and Their Solutions George Moseley Murphy, 2011-01-01 This treatment presents most of the methods for solving ordinary differential equations and systematic arrangements of more than 2 000 equations and their solutions The material is organized so that standard equations can be easily found Plus the substantial number and variety of equations promises an exact equation or a sufficiently similar one 1960 edition A Primer of Real Analytic Functions Steven G. Krantz, Harold R. Parks, 2012-09-08 It is a pleasure and a privilege to write this new edition of A Primer of Real Analytic Functions The theory of real analytic functions is the wellspring of mathematical analysis It is remarkable that this is the first book on the subject and we want to keep it up to date and as correct as possible With these thoughts in mind we have utilized helpful remarks and criticisms from many readers and have thereby made numerous emendations We have also added material There is now a treatment of the Weierstrass preparation theorem a new argument to establish Hensel's lemma and Puiseux's theorem a new treatment of Faà di Bruno's formula a thorough discussion of topologies on spaces of real analytic functions and a second independent argument for the implicit function theorem We trust that these new topics will make the book more complete and hence a more useful reference It is a pleasure to thank our editor Ann Kostant of Birkhäuser Boston for making the publishing process as smooth and trouble free as possible We are grateful for useful communications from the readers of our first edition and we look forward to further constructive feedback **Catalog** Library of the Marine Biological Laboratory and the Woods Hole Oceanographic Institution, Marine Biological Laboratory (Woods Hole, Mass.).
