Maxeiner, 2011-08-29 Civil justice in the United States is neither civil nor just Instead it embodies a maxim that the American legal system is a paragon of legal process which assures its citizens a fair and equal treatment under the law Long have critics recognized the system's failings while offering abundant criticism but few solutions This book provides a comparative critical introduction to civil justice systems in the United States Germany and Korea It shows the shortcomings of the American system and compares them with German and Korean successes in implementing the rule of law The author argues that these shortcomings could easily be fixed if the American legal systems were open to seeing how other legal systems civil justice processes handle cases more efficiently and fairly Far from being a treatise for specialists this book is an introductory text for civil justice in the three aforementioned legal systems *The Changing Role of the American Prosecutor* John

Decision Making in Criminal Justice Michael R. Gottfredson, Don M. Gottfredson, 2013-11-11 The study of decisions in the criminal justice process provides a useful focus for the examination of many fundamental aspects of criminal justice These decisions are not always highly visible They are made or dinarily within wide areas of discretion The aims of the decisions are not always clear and indeed the principal objectives of these decisions are often the subject of much debate Usually they are not guided by explicit decision policies Often the participants are unable to verbalize the basis for the selection of decision alternatives Adequate information for the decisions is usually unavailable Rarely can the decisions be demonstrated to be rational By a rational decision we mean that decision among those possible for the decisionmaker which in the light of the information available maximizes the probability of the achievement of the purpose of the decisionmaker in that specific and particular case Wilkins 1974a 70 also 1969 This definition which stems from statistical decision theory points to three fundamental characteristics of decisions First it is assumed that a choice of possible decisions or more precisely of possible alternatives is available If only one choice is possible there is no decision problem and the question of rationality does not arise Usually of course there will be a choice even if the alternative is to decide not to decide a choice that of course often has profound consequences **Criminal Justice Theory** Edward Maguire, David Duffee, 2015-02-11 Criminal Justice Theory
