

The background of the slide is a historical map of the Americas, likely from a 16th-century European cartographic work. The map shows the continents of North and South America with various geographical features and labels in Latin. Overlaid on the map is a large, circular inset that contains a complex astronomical or celestial diagram. This diagram features concentric circles, a central sun or star, and various celestial bodies, possibly representing a geocentric model of the universe. The text of the title is superimposed on the upper portion of this circular inset.

domain of education church politics natural sciences etc The reader will find herein that American Philosophy is the outgrowth of impacts of new life and new directions imported by waves of immigration More conspicuous are the recent intellectual imports from Cambridge Paris and Vienna The philosophical analysis that grew up in Cambridge under the leadership of Whitehead Russell and Moore the sophisticated modernized versions of Catholic scholasticism from Paris and the the schools of value theory existentialism phenomenology logical positivism psychoanalysis and socialism from Vienna these are now pervasive forces in American culture The author has ventured to predict that the types of philosophical thought described in this volume are being radically revised reviewed and reconstructed because of these new importations that a decidedly new chapter in American philosophy is being written The author has tried well to expound what American history teaches or what American philosophy stands for

American Philosophy Barbara MacKinnon, 1985-01-01 This anthology demonstrates the richness and diversity of the American intellectual heritage In it we see how Jonathan Edwards grapples with the problem of how to reconcile freedom and responsibility with Calvinist religious beliefs how Franklin and Jefferson exemplified American enlightenment thought and how the Transcendentalists Ralph Waldo Emerson and Henry David Thoreau formulated their particular romantic idealist beliefs A second and significant portion of the anthology is devoted to Pragmatism Substantive excerpts from Peirce James and Dewey as well as Royce are collected here A third part is devoted to other Twentieth Century American philosophies No other collection of writings in this field includes the breadth of coverage that this one does Among the chapters in this third part of the book are those on early Process Philosophy Phenomenology Positivism and Language Philosophies Selections from such philosophers as Whitehead Weiss Buchler Gurwitsch Sellars Quine Davidson and Rawls along with many others are included in this part A final chapter is devoted to twentieth century American Moral Philosophy The book is specifically designed to be used as a text for courses in American philosophy A substantive introduction that emphasizes the historical setting as well as major interests and ideas of the philosophers accompanies each chapter Extensive bibliographies and study guide questions follow each chapter The selections include more than any one course will cover but in their completeness also allow individual teachers and readers to select what they want

McClymond, Gerald R. McDermott, 2012-01-05 Scholars and laypersons alike regard Jonathan Edwards 1703-58 as North America's greatest theologian The Theology of Jonathan Edwards is the most comprehensive survey of his theology yet produced and the first study to make full use of the recently completed seventy-three volume online edition of the Works of Jonathan Edwards The book's forty-five chapters examine all major aspects of Edwards's thought and include in depth

discussions of the extensive secondary literature on Edwards as well as Edwards's own writings. Its opening chapters set out Edwards's historical and personal theological contexts. The next thirty chapters connect Edwards's theological loci in the temporally ordered way in which he conceptualized the theological enterprise beginning with the triune God in eternity with his angels to the history of redemption as an expression of God's inner reality *ad extra* and then back to God in eschatological glory. The authors analyze such themes as aesthetics metaphysics typology history of redemption revival and true virtue. They also take up such rarely explored topics as Edwards's missiology treatment of heaven and angels sacramental thought public theology and views of non-Christian religions. Running throughout the volume are what the authors identify as five basic theological constituents: trinitarian communication creaturely participation necessitarian dispositionalism divine priority and harmonious constitutionalism. Later chapters trace his influence on and connections with later theologies and philosophies in America and Europe. The result is a multi-layered analysis that treats Edwards as a theologian for the twenty-first century global Christian community and a bridge between the Christian West and East Protestantism and Catholicism conservatism and liberalism and charismatic and non-charismatic churches.
