American Whalers In The Western Arctic:

Whales, Ice, and Men John R. Bockstoce, New Bedford Whaling Museum, 1986 In the pages that follow the story of commercial whaling in the western Arctic is told by a scholar intimately acquainted with the terrain not only as it can be found in the historical records or at archaeological sites but from lone experience on the shores and waters where the great adventure was played out His book is written with such mastery and vigor that we confidently greet it as the finest history yet written on any aspect of American whaling

Steam Whaling in the Western Arctic John R. Bockstoce, William A. Baker, Charles Foster Batchelder, Old Dartmouth Historical Society (New Bedford, Mass.), 1977 History of American whaling in the western arctic from 1880 to 1910 Includes ship design ship biographies and a chronological list of wintering voyages 1850 1910

Globalization and the Circumpolar North Lassi Heininen, Chris Southcott, 2010-05-15 The circumpolar north has long been the subject of conflicting national aspirations and border disputes and with the end of the cold war and the coming era of potential resource scarcity its importance will only grow over the next several decades Anticipating that renewed prominence Globalization and the Circumpolar North brings together an array of scholars to explore the effects of this increased attention from the new opportunities offered by globalization to the potential damage to long isolated northern communities and peoples

The Political Economy of Northern Regional Development: Introduction to the Project and The First Volume of The Political Economy of Northern Regional Development (POENOR) Gorm Winther, 2010 Nordic co operation is one of the world s most extensive forms of regional collaboration involving Denmark Finland Iceland Norway Sweden and three autonomous areas the Faroe Islands Greenland and land

Furs and Frontiers In the Far North John R. Bockstoce, 2009-09-15 This comprehensive history of the native and maritime fur trade in Alaska during the eighteenth and nineteenth centuries is without precedent The Bering Strait formed the nexus of the circumpolar fur trade in which Russians British Americans and members of fifty native nations competed and cooperated The desire to dominate the fur trade fed the European expansion into the most remote regions of Asia and America and was an agent of massive change in these regions Award winning author John R Bockstoce fills a major gap in the historiography of the area in covering the scientific commercial and foreign relations implications of the northern fur trade In addition the book provides rare insight into the relationship between the Western powers and the Native Americans who provided them with fur ivory and whalebone in exchange for manufactured goods tobacco tea alcohol and hundreds of other things But this is also the story of the enterprising individuals who energized the Alaskan fur trade and in doing so forever altered the region s history

The Unending Frontier John F. Richards, 2003-05-15 It was the age of exploration the age of empire and conquest and human beings were extending their reach and their numbers as never before In the process they were

intervening in the world's natural environment in equally unprecedented and dramatic ways. A sweeping work of environmental history, *The Unending Frontier* offers a truly global perspective on the profound impact of humanity on the natural world in the early modern period. John F. Richards identifies four broadly shared historical processes that speeded environmental change from roughly 1500 to 1800: intensified human land use along settlement frontiers, biological invasions, commercial hunting of wildlife, and problems of energy scarcity. *The Unending Frontier* considers each of these trends in a series of case studies, sometimes of a particular place such as Tokugawa Japan and early modern England and China, sometimes of a particular activity such as the fur trade in North America and Russia, cod fishing in the North Atlantic, and whaling in the Arctic. Throughout, Richards shows how humans, whether clearing forests or draining wetlands, transporting bacteria, insects, and livestock, hunting species to extinction, or reshaping landscapes, altered the material well-being of the natural world along with their own.

From Talking Chiefs to a Native Corporate Elite Marybelle Mitchell, 1996-06-21 Mitchell demonstrates the transformation of relationships both between the Inuit and Europeans and among the Inuit themselves that has occurred since contact with the West, focusing on the intersection of class and nation. This intersection provides a unifying framework to order the history of Inuit-European contact. At the heart of the book is a detailed and original presentation of the Inuit cooperative movement. Mitchell's skilful blending of primary sources with personal experience and secondary literature provides a compelling analysis of the Inuit co-op as a development tool used by the state. In the final chapters, she provides an astute evaluation of contemporary Inuit land claims, concluding that the Inuit have been unequally incorporated into the Canadian class system because of their ethnic status and lack of capital. Growing nationalism among the Inuit and demands for self-government make *From Talking Chiefs to a Native Corporate Elite* a timely and important addition to the field of Native studies. It will be of great interest to both scholars and general readers.

Norwegian Whaling in Newfoundland Anthony B. Dickinson, Chesley W. Sanger, 2017-10-18 This book is both a study of the wider presence of the whaling industry in Newfoundland and Labrador between 1898 and 1972 and a comprehensive case study of the Ellefsen Papers and the Aquaforte whaling station. Aquaforte was the only entirely Norwegian-owned factory in Newfoundland at the turn of the century and one of the only whaling companies to retain all company records, making it an invaluable resource for maritime historians. The archive consists of business transactions, operations details, personal letters, photographs, wage accounts, equipment lists, and product information. The journal introduces the Aquaforte station in the context of global whaling, then traces the business history of the Ellefsen family and then covers in detail the short history of Aquaforte from its inception in 1898 to its collapse in 1908 due to stock exploitation. A postscript details both the family's return to Norway and the whaling cycles in Newfoundland and Labrador post-Aquaforte between 1908 and 1972, when the Canadian government placed a moratorium on whaling. The book reproduces numerous maps, photographs, lists, and tables. It concludes with a bibliography and six appendices providing relevant whaling industry statistics.

Prehistory of

North America Mark Sutton, 2015-12-22 A Prehistory of North America covers the ever evolving understanding of the prehistory of North America from its initial colonization through the development of complex societies and up to contact with Europeans This book is the most up to date treatment of the prehistory of North America In addition it is organized by culture area in order to serve as a companion volume to An Introduction to Native North America It also includes an extensive bibliography to facilitate research by both students and professionals Human Impacts on Seals, Sea Lions, and Sea Otters Todd J. Braje, Torben C. Rick, 2011-03-23 The bones recovered from the middens of the northeastern Pacific shorelines have important stories to tell biologists marine mammalogists and those concerned with marine conservation This volume unearths a wealth of information about the historical ecology of seals sea lions and sea otters in the North Pacific that spans thousands of years It provides fascinating insights into how the world once looked and how it may one day look again as seals sea lions and sea otters reclaim and recolonize their former haunts Andrew Trites Director Marine Mammal Research Unit University of British Columbia Braje and Rick have assembled a compelling set of case studies on the long term and complex interactions between people marine mammals and environments in the Northeast Pacific The promise of zooarchaeology as historical science is on full display as researchers use geochemistry aDNA morphometrics and traditional analytic methods to address questions of utmost importance to the long term health of coastal ecosystems If this book doesn't convince conservation biology about the need to take the long view of animal histories and ecosystems into account in developing conservation management plans I'm not sure what will Virginia L.
