Bardes probes deeply into this illness as metaphor by exploring the impact of both science and culture on its treatment across the ages His innovative life of this condition ranges widely through history mythology literature and clinical practice to examine how our notions of specific medical conditions are often deeply rooted in language symbolism and culture Delving into the annals of anemia and its treatment he takes us on a fascinating journey back through the history of medicine from the Greeks and ancient practices of bloodletting and magic up to the diagnostic rituals of a modern medical office A scholar of the literary as well as the medical arts Bardes gives us a beautifully written free ranging text resonant with poetic associations yet anchored in concrete clinical experience As a practicing physician Bardes is also able to draw upon his direct experience with patients to demystify the doctor patient relationship Through detailed descriptions of the diagnostic processes involved in blood related conditions as well as the particular understanding of the inner workings of the human body provided by modern medical science we are treated to the complex ways in which doctors think Charles L. L. Molyneux, P. G. Stone, 2003-09-02 The Presented Past is concerned with the differences between the comparatively static well understood way in which the past is presented in schools museums and at historic sites compared to the approaches currently being explored in contemporary archaeology It challenges the all too frequent representation of the past as something finished understood and objective rather than something that is constructed and therefore open to co existing interpretations and constant re interpretation Central to the book is the belief that the presentation of the past in school curricula and in museum and site interpretations will benefit from a greater use of non documentary sources derived from archaeological study and oral histories The book suggests that a view of the past incorporating a larger body of evidence and a wider variety of understanding will help to invigorate the way history is taught The Presented Past will be of interest to teachers archaeologists cultural resource managers in fact anyone who is concerned with how the past is presented
