Revisiting the Monetary Transmission Mechanism Through an Industry-Level Differential Approach Sangyup Choi,Tim Willems,Seung Yong Yoo,2022-01-28 We combine industry level data on output and prices with monetary policy shock estimates for 105 countries to analyze how the effects of monetary policy vary with industry characteristics Next to being interesting in their own right our findings are informative on the importance of various transmission mechanisms as they are thought to vary systematically with the included characteristics Results suggest that monetary contractions reduce output by more in industries featuring assets that are more difficult to collateralize consistent with the credit channel followed by industries producing durables as predicted by the interest rate channel The credit channel is stronger during bad times as well as in countries with lower levels of financial development in line with financial accelerator logic We do not find support for the cost channel of monetary policy nor for a channel running via exports Our database containing estimated monetary policy shocks for over 170 countries may be of independent interest to researchers *The Energy Origins of the Global Inflation Surge* Mr. Jorge A Alvarez,Thomas Kroen,2025-05-09 This paper investigates the relationship between energy prices and inflation dynamics in the context of the global inflation surge during the COVID 19 pandemic Using a comprehensive sector level dataset covering over 30 countries and a local projections empirical strategy we extend previous studies that primarily focused on single country analyses or aggregate inflation measures Our findings indicate that while the energy shocks of 2021 2022 were remarkable the degree of inflation passthrough of energy shocks appears to be relatively stable over time Moreover we show that energy price shocks significantly influence inflation through stable sectoral channels with structural characteristics such as energy dependence and price flexibility playing critical roles in the passthrough mechanism These results underscore the necessity of a sectoral perspective in understanding inflationary pressures and highlight the importance of detailed data on price setting mechanisms and intersectoral connectivity in understanding the energy inflation passthrough **Take Five Minutes Fascinating Facts from the World Almanac(r)** Greggory Moore,Greg

economies over 1989 2019 Stylized facts and econometric analysis suggest that within year responses are more important in terms of intensity and frequency than commonly understood from the existing literature which has tended to ignore them We find that retaliation often consists of responses across many sectors and that same sector retaliation is far from being the norm In addition we find that larger countries tend to retaliate more and that retaliation is larger during periods of higher unemployment and when the trading partner targeted a domestic comparative advantage sector *Brand Failures* Matt Haig,2003 Praise and Reviews You learn more from failure than you can from success Matt Haig s new book is a goldmine of helpful how not to advice which you ignore at your own peril LAURA RIES President Ries idea failures extension failures PR failures culture failures people failures rebranding failures Internet and new technology failures tired brands Companies live or die on the strength of their brand and failure can be fatal Don t let yours be consigned to the brand graveyard A tour of Matt Haig s fascinating hall of failure will alert you to potential dangers and show you how to ensure a long healthy life for your brand *Trade, Jobs, and Inequality* Ms. Kimberly Beaton,Ms. Valerie Cerra,Metodij Hadzi-Vaskov,2021-07 This paper examines the impact of trade on employment wages and other outcomes across countries and explores the conditions and policies that help spread the gains from trade more evenly throughout the population We exploit a large global firm level dataset to examine the impact of import competition on employment wages and firm performance as well as the firm industry and country factors that mitigate any negative impact of an import shock In contrast to the results of some well known single country studies we find limited adverse impact of import competition In some countries and industries import competition actually strengthens employment growth In addition import competition tends to improve average wages investment and firm profitability Country characteristics such as educational attainment can also improve employment prospects in response to trade shocks Finally we find that firms experiencing greater import competition start with higher average wages thus any relatively slower employment growth in this group of firms could lead to lower inequality
