Green Belts John Sturzaker, Ian Mell, 2016-11-25 Most of us have heard of green belts but how much do we really know about them This book tries to separate the fact from the fiction when it comes to green belts by looking both backwards and forwards They were introduced in the mid twentieth century to try and stop cities merging together as they grew There is little doubt they have been very effective at doing that but at what cost Are green belts still the answer to today s problems of an increasing population and ever higher demands on our natural resources Green Belts Past present future reflects upon green belts in the United Kingdom at a time when they have perhaps never been more valued by the public or under more pressure from development The book begins with a historical study of the development of green belt ideas policy and practice from the nineteenth century to the present It discusses the impacts and characteristics of green belts and attempts to reconcile perceptions and reality By observing examples of green belts and similar policies in other parts of the world the authors ask

what we want green belts to achieve and suggest alternative ways in which that could be done before looking forward to consider how things might change in the coming years This book draws together information from a range of sources to present for the first time a comprehensive study of green belts in the UK It reflects upon the gap between perception and reality about green belts analyses their impacts on rural and urban areas and questions why they retain such popular support and whether they are still the right solution for the UK and elsewhere It will be of interest to anyone who is concerned with planning and development and how we can provide the homes jobs and services we need while protecting our more valuable natural assets

Patterns and Processes in Forest Landscapes Raffaele Laforteza, Jiquan Chen, Giovanni Sanesi, Thomas R. Crow, 2008-08-30 Increasing evidence suggests that the composition and spatial configuration the pattern of forest landscapes affect many ecological processes including the movement and persistence of particular species the susceptibility and spread of disturbances such as fires or pest outbreaks and the redistribution of matter and nutrients Understanding these issues is key to the successful management of complex multifunctional forest landscapes and landscape ecology based on a foundation of island bio geography and meta population dynamic theories provides the rationale to deal with this pattern to process interaction at different spatial and temporal scales This carefully edited volume represents a stimulating addition to the international literature on landscape ecology and resource management It provides key insights into some of the applicable landscape ecological theories that underlie forest management with a specific focus on how forest management can benefit from landscape ecology and how landscape ecology can be advanced by tackling challenging problems in forest landscape management It also presents a series of case studies from Europe Asia North America Africa and Australia exploring the issues of disturbance diversity management and scale

and with a specific focus on how human intervention affects forest landscapes and in turn how landscapes influence humans and their culture An important reference for advanced students and researchers in landscape ecology conservation biology forest ecology natural resource management and ecology across multiple scales the book will also appeal to researchers and practitioners in reserve design ecological restoration forest management landscape planning and landscape architecture

Rural Europe Keith Hoggart,Richard Black,Henry Buller,2014-02-25 Examines the interaction of the economic political and social change processes within Europe which are bringing about fundamental transformations in rural areas The authors expand on this view of rural Europe and place its significance within the broader field of rural studies *Rural Development* B. K. Prasad,2003 **Planning and the Rural Environment** Joan Davidson,Gerald Wibberley,2016-04-20 Planning and the Rural Environment examines the environmental issues affecting countryside planning Emphasis is placed on the look and feel of the open countryside the function and appearance of the rural environment rather than the problems of its people and the settlements in which they live Also discussed is the conflict of interest generated between some of the major planning systems concerned with the development of rural activities and the protection of rural resources Comprised of 13 chapters this volume begins with an assessment of conflicting views of how a countryside of the future should develop and the degree of control and direction that should take place The following chapters consider how the emerging range of environmental problems and opportunities in rural planning can best be illustrated In particular the dominance of agriculture as a rural activity is analyzed together with forest and woodland management leisure activity in the countryside and conservation of resources and wildlife The next section is devoted to uplands and the urban fringe paying particular attention to some of the ways in which rural interests interact in two very different areas Finally the development of rural planning is reviewed and issues that are expected to shape the countryside of the future are considered This book should be of interest to postgraduate students of rural planning and specialists in various fields of countryside planning *Landscape Archaeology and the Medieval Countryside* Effie F. Athanassopoulos,2017-02-28 This volume presents the results of the medieval component of the Nemea Valley Archaeological Project NVAP survey conducted from 1985 1990 The archaeological evidence points to a proliferation of sites dating to the 12th 13th century A D There are two large sites and a substantial number of small sites on the lower slopes of the hills surrounding the Nemea Valley and in smaller valleys in the southern part of the survey area Archaeological evidence of settlements from the late 13th 15th century is scarce providing a contrast to the patterns documented for the 12th late 13th century This study is thus also concerned with general trends and important sociopolitical changes that affected such developments in the Nemea region in the medieval period *Rural Images* David Buisseret,1996-07 But these hand drawn maps often displaying elaborate cartouches and elegant coats of arms served as far more than mere records of property ownership they were treasured works of art exhibited for pleasure and as symbols of wealth and passed down from generation to generation The Architecture of Jefferson Country K. Edward Lay,2000 But

what is less well known are the many important examples of other architectural idioms built in this Piedmont Virginia county
