

CourseCARD

Introduction

This course is designed to provide students with a comprehensive understanding of the principles and practices of project management. The course covers the entire project lifecycle, from initiation to closure, and includes practical applications of project management tools and techniques.

Course Objectives

By the end of this course, students will be able to:

- Identify the key components of a project and the roles of the project manager.
- Develop a project charter and a project management plan.
- Execute project tasks and manage resources.
- Monitor project progress and control risks.
- Close a project and evaluate its performance.

Topics

The course covers the following topics:

- Project Management Fundamentals
- Project Initiation
- Project Planning
- Project Execution
- Project Monitoring and Control
- Project Closure

Prerequisites

Students should have a basic understanding of business and management principles. No prior experience with project management is required.

Materials

Students will need access to a computer and internet connection. A project management software tool is recommended.

Methodology

The course uses a combination of lecture, case studies, and hands-on exercises. Students will be encouraged to work in groups and apply project management principles to real-world scenarios.

Assessment

Students will be assessed through a combination of quizzes, assignments, and a final project. The final project will require students to develop and execute a project plan.
