Landscape Interfaces Hannes Palang, G. Fry, 2013-06-29 This book has been initiated by the workshop on Cultural heritage in changing landscapes held during the IALE International Association for Landscape Ecology European Conference that started in Stockholm Sweden in June 2001 and continued across the Baltic to Tartu Estonia in July The papers presented at the workshop have been supported by invited contributions that address a wider range of the cultural heritage management issues and research interfaces required to study cultural landscapes The book focuses on landscape interfaces Both the ones we find out there in the landscape and the ones we face while doing research We hope that this book helps if not to make use of these interfaces then at least to map them and bridge some of the gaps between them The editors wish to thank those people helping us to assemble this collection First of all our gratitude goes to the authors who contributed to the book We would like to thank Marc Antrop Mats Widgren Roland Gustavsson Marion Potschin Barbel Tress Tiina Peil Helen Soovali and Anu Printsman for their quick and helpful advice opinions and comments during the different stages of editing Helen Soovali and Anu Printsman together with Piret Pungas thank you for technical help

Land and Estate Management J. S. Nix, 2003-09-29 The latest edition of this book first published in 1987 aimed at land managers farmers accountants and those in rural finance

law and taxation      **European Rural Landscapes** Hannes Palang, 2004-05-31 This book a compendium of 28 papers selected from two recent conferences on the topic focuses on aspects of rural landscape broadly related to issues of language representation and power These are issues that have not been addressed on a pan European landscape level before The aim is to offer a deeper interdisciplinary understanding of historical and contemporary processes in European landscapes

**Conservation Biology** Andrew S. Pullin, 2002-06-27 This colourful textbook introduces students to conservation biology the science of preserving biodiversity      **The Geohistorical Approach** Silvia Elena Piovan, 2020-05-14 This book gives a comprehensive view of the strengths and limits of the interdisciplinary methods that work together to form the geohistorical approach to geographical and geological sciences The geohistorical approach can be synthetically defined as a multi and interdisciplinary approach that uses techniques and perspectives mainly from geography history and natural sciences to examine topics that inform the space time knowledge of environment territory and landscape The boundary between the application of physical and human science methods is large and hazy This volume exists at this boundary and offers an approach that utilizes both historical data from both physical and human records and GIScience e g GIS cartography GPS remote sensing to investigate the evolution of the environment territory and landscape through both space and time The first objective of this volume is to define the term geohistorical approach An entire chapter focuses on a review of the main disciplines that connect geography and history a review of the terms environment territory and landscape as objects of study of this approach and the definition and importance of the geohistorical approach The second goal is to describe the methods used in the geohistorical approach Eight chapters present the key methods also using examples of applications from the international context offering an awareness of the potentials limitations and accuracy of each method with particular focus on the integration of methods The third goal is to provide case studies to demonstrate the use and integration of geohistorical methods from both original material and published research A final chapter is dedicated to an interdisciplinary case study from the Venetian Plain Italy providing an example of the integration of almost all methods described in the book

*Landscape and Sustainability* John F. Benson, Maggie H. Roe, 2005-11-29 This unique book is about landscape sustainability and the practices of the professions which plan design and manage landscapes at many scales and in many locations urban suburban and rural Despite the ubiquity of sustainability as a concept this is the first book to address the relationship between landscape architecture and sustainability in a comprehensive way Much in the book is underpinned by landscape ecology in contrast to the idea of landscape as only appealing to the eye or aspiring cerebrally to be fine art As this book argues landscape is and must be much more than this landscape architecture is about making places which are biologically wholesome socially just and spiritually rewarding      **Environmental Co-operation and Institutional Change** Konrad Hagedorn, 2002-01-01 The book is well written and makes a significant contribution to the development of the principles and practices of dealing with agri environmental problems It is of relevance to a wide circle of readers including

researchers and politicians but also students and others concerned with agri environmental issues Stefanie Engel and Ulrike Grote Quarterly Journal of International Agriculture the book has the potential to provide something for everyone Stefan B ckmann European Review of Agricultural Economics Although the history of the Common Agricultural Policy CAP is dominated by a process of centralisation growing pressures to integrate agri environmental problems into the CAP have revealed the need to embrace decentralised approaches in an efficient federal structure Indeed in recent years it has become increasingly evident that the agricultural sector must undergo fundamental changes in order to enter an era of sustainable development

Principles and Methods in Landscape Ecology Almo Farina,1998 This text presents landscape ecology as an integrative and transdisciplinary science with a problem solving orientation toward land use planning and management Special reference is made to the conservation restoration and sustainable development of cultural landscapes This textbook is presented in a clear and non technical style with practical examples and many illustrations

*Environmental Dilemmas* R.J. Berry,2007-08-19 This is a book by people who have had to make decisions which affect the environment in which we all live decisions which sometimes affect the quality of life of millions It is not an academic disquisition on how to approach decision making Most of the chapters are written by scientists who have had to take action or make recommendations on environmental matters in situations where the data are incomplete or choices hedged by factors beyond scientific resolution the result is that they have had to resolve dilemmas about the proper way forward in the matter My brief to the authors was to describe issues with which they had been personally concerned rather than simply select from the vast range of environmental problems out there The only exception to this was Andrew Brennan Chapter 1 who is a professional philosopher I asked him to say something about the processes and errors indulged by environmental decision makers There is some overlap between chapters but this is not extensive I have made no attempt to eliminate it because the aim has been to present personal points of view not a systematic account of environmental problems Similarly there are important topics which are not covered Indeed a critic would complain that a book on environmental dilemmas which does not deal directly with the crucial divide between development and conservation is almost wholly irrelevant from one point of view it could be condemned as fiddling while Rome burns

Ecological Landscape Design and Planning Jala Makhzoumi,Gloria Pungetti,2003-09-02 Based on both research and practical experience Ecological Landscape Design and Planning offers a holistic methodological approach to landscape design and planning It focuses on the scarcity of natural resources in the Mediterranean and the need to aim for long term ecological stability and environmental sustainability The principles of this approach therefore can be used as a theoretical foundation for holistic landscape research creative ecological design and better sustainable practice development

**Managing the Historic Rural Landscape** Jane Grenville,2014-04-04 First published in 1999 The Issues in Heritage Management series is a joint venture between Routledge and English Heritage It provides accessible thought provoking books on issues central to heritage management Each book within the series is

designed to provide a topical introduction to a key issue in heritage management for students in higher education and for heritage professionals. Rapid changes are taking place in countryside management today making their impact on the historic landscape. In an accessible format this volume examines the questions and conflicts that arise in Managing the Historic Rural Landscape. It is essential reading for students and professionals concerned with countryside management in particular those involved with cultural landscapes and students of planning.

### **Rural Analysis and Management** Francisco J.

Tapiador, 2007-09-28. This handbook possesses two virtues that are becoming increasingly difficult to find together. The first one is providing a novel and original scheme to analyze the rural areas of the planet in the context of Earth sciences. The handbook is so original in its plan that it actually defines what modern rural science is. The scheme followed albeit new is rooted in a venerable geographical tradition and presents a sensible balance between the academic and the applied viewpoints. This novel way of studying rural areas represents by itself a valuable contribution to this complex field. The second virtue of the book is the ability of synthesizing the most important aspects of the issues tackled and there are many issues this book tackles from physical to human geography and from deontology to matrix algebra. When writing a handbook in such a vast field as rural science it is indeed tempting to accumulate meaningless information assisted by the wealth of available online information. On the other side the danger of forgetting essential aspects is always present. None of these problems seems to have affected the making of this book. The pictures and tables always have a place the text never loses its coherence and no comment seems superfluous. Also the ambitious scope of the book is seemingly effortlessly solved by a rational clear and logical scheme that dissects all the relevant issues up to the required point.
