Coup Detat A Practical Manual:

Coup D'etat Gregor Ferguson,1987 *A Practical Manual for Coup D'Etat* Gordon Press Publishers,1991-06

Revolutionary Overthrow of Constitutional Orders in Africa Carlson Anyangwe,2012 The subject of revolutionary overthrow of constitutional orders in Africa is at the intersection of three disciplines jurisprudence and legal philosophy constitutional law and power politics and civil military relations that is military security policy which is one aspect of national security policy The subject is of interest in at least four ways It problematizes the inescapable question of governance in the African continent It challenges the democratization agenda in Africa how does one democratize not only political governance but also the instruments of violence in the state It also challenges African constitutional lawyers and policy makers to seek a constitutional model that addresses the enduring menace of the power of the gun in African affairs and the changing role of the military in African politics Finally it underscores concerns about sovereignty and national security This book contributes to a fuller understanding of the coup syndrome in African To this end it vigorously interrogates the place of coups in the governance of Africa and explores the relevance of Kelsen s theory of revolutionary legality in the context of coup d tats in Africa It is a major contribution by a leading thinker in the field **Revolution and Order** Ivana Spasić,Milan Subotić,2001

Historical Dictionary of Modern Coups d'état John J. Chin,Joseph Wright,David B. Carter,2022-12-13 For readers interested in international relations politics and global issues Library Journal Starred Review The Historical Dictionary of Modern Coups d tat surveys the history of coups d tat in the post World War II period The term modern in the title therefore demarcates the period since January 1946 This book documents over 582 coup attempts that have occurred in 108 different countries worldwide over a period of 75 years Historical Dictionary of Modern Coups d tat contains a chronology an introduction and an extensive bibliography The dictionary section has more than 1 400 cross referenced dictionary entries This book is an excellent resource for students and researchers **The Anarchist Cookbook** William Powell,2018-02-05 The Anarchist Cookbook will shock it will disturb it will provoke It places in historical perspective an era when Turn on Burn down Blow up are revolutionary slogans of the day Says the author This book is not written for the members of fringe political groups such as the Weatherman or The Minutemen Those radical groups don t need this book They already know everything that s in here If the real people of America the silent majority are going to survive they must educate themselves That is the purpose of this book In what the author considers a survival guide there is explicit information on the uses and effects of drugs ranging from pot to heroin to peanuts There i detailed advice concerning electronics sabotage and surveillance with data on everything from bugs to scramblers There is a comprehensive chapter on natural non lethal and lethal weapons running the gamut from cattle prods to sub machine guns to bows and arrows **Seizing Power** Naunihal Singh,2014-07-01 How coups happen and why half of them fail While coups drive a majority of regime changes and are responsible for the overthrow of many democratic governments there has been very little empirical work on the subject

Seizing Power develops a new theory of coup dynamics and outcomes drawing on 300 hours of interviews with coup participants and an original dataset of 471 coup attempts worldwide from 1950 to 2000 Naunihal Singh delivers a concise and empirical evaluation arguing that understanding the dynamics of military factions is essential to predicting the success or failure of coups Singh draws on an aspect of game theory known as a coordination game to explain coup dynamics He finds a strong correlation between successful coups and the ability of military actors to project control and the inevitability of success Examining Ghana's multiple coups and the 1991 coup attempt in the USSR Singh shows how military actors project an image of impending victory that is often more powerful than the reality on the ground In addition Singh also identifies three distinct types of coup dynamics each with a different probability of success based on where within the organization each coup originated coups from top military officers coups from the middle ranks and mutinous coups from low level soldiers

The Overthrow of Robert Mugabe Blessing-Miles Tendi, 2025-01-21 *The Overthrow of Robert Mugabe* Gender Coups and Diplomats argues the 2017 coup that ousted long time Zimbabwean president Robert Gabriel Mugabe and the generality of coups cannot be accurately and rigorously understood without examining the crucial role of gender and women's politics in military seizures of power Tendi's book shows that gender and women's politics pervade military coup causes dynamics justifications and international responses to coups Contrary to influential representations of Zimbabwe's 2017 coup and other recent coups as markedly different from past coups Tendi draws on long gendered histories of military coups in Africa to argue that there are significant continuities in coup characteristics across time Additionally Tendi's highly original study of Zimbabwe's 2017 coup identifies the motives dynamics and trigger of the coup Despite the existence of an international anti coup norm and democracy promotion in Africa by Western states Zimbabwean coup makers direct intervention in politics was largely not publicly condemned or penalized by Western and African diplomats Tendi uses original interviews with diplomats and politicians involved in external responses to the coup to address this important puzzle

Constructing Cassandra Milo Jones, Philippe Silberzahn, 2013-08-21 *Constructing Cassandra* analyzes the intelligence failures at the CIA that resulted in four key strategic surprises experienced by the US the Cuban Missile Crisis in 1962 the Iranian revolution of 1978 the collapse of the USSR in 1991 and the 9/11 terrorist attacks surprises still play out today in US policy Although there has been no shortage of studies exploring how intelligence failures can happen none of them have been able to provide a unified understanding of the phenomenon To correct that omission this book brings culture and identity to the foreground to present a unified model of strategic surprise one that focuses on the internal make up the CIA and takes seriously those Cassandras who offered warnings but were ignored This systematic exploration of the sources of the CIA's intelligence failures points to ways to prevent future strategic surprises

organizations that secure the order among nations and even from some points of view war. As the 20th century drew to a close we have witnessed peacemakers trying to end ethnic cleansing, reinstate justly elected political leaders and reach compromises in the ideological differences that perpetuate age old conflicts. We also see peacemaking in our schools, homes and workplaces. Philosophers have long been interested in peacemaking in one form or another and philosophical accounts of peacemaking reflect the variety of perspectives, methods and activities developed in pursuing peacemaking. In some instances philosophers expand upon the situations, activities and methods of the peacemaker in the field. The essays in this volume propose some theoretical arguments for various aspects of peacemaking, offer nonmilitary alternatives to war and discuss practical examples of peacemaking in daily life. The contributors analyze power relations, language, social groupings and distribution of resources. At times they draw insight from social and historical models of conflict and conflict resolution. This collection of essays on peacemaking aims to enlighten contemporary social and political discussions and contribute to achieving the ever challenging goal of peace.

Non-state Special Operations Ian Rice, Craig Whiteside, 2025-07-25. This book examines how violent non state actors (VNSAs) emulate and develop military special operation capabilities. Building on previous research on Islamic State special operations, the book develops a theoretical framework surrounding a typology of VNSA militants, proxies, criminal cults and mercenaries to explore variations of non state special operations with multiple cases for each category of actor. Understanding when and why VNSAs use special operations provides insights into the inner workings of such groups and how they campaign and also has implications for the proliferation of special operation forces around the globe and its influence on non state behavior. This

volume contributes to research on the recent trend of non state actors surprising and in some cases humiliating their state opponents This book will be of much interest to students of military and strategic studies defense studies and security studies

Military Integration After Civil Wars Florence Gaub,2010-09-13 This book examines the role of multiethnic armies in post conflict reconstruction and demonstrates how they can promote peacebuilding efforts The author challenges the assumption that multiethnic composition leads to weakness of the military and shows how a multiethnic army is frequently the impetus for peacemaking in multiethnic societies Three case studies Nigeria Lebanon and Bosnia Herzegovina determine that rather than external factors it is the internal structures that make or break the military institution in a socially challenging environment The book finds that where the political will is present the multiethnic military can become a symbol of reconciliation and coexistence Furthermore it shows that the military as a professional identity can supersede ethnic considerations and thus facilitates cooperation within the armed forces despite a hostile post conflict setting In this the book challenges widespread theories about ethnic identities and puts professional identities on an equal footing with them The book will be of great interest to students of military studies ethnic conflict conflict studies and peacebuilding and IR in general Florence Gaub is a Researcher and Lecturer at the NATO Defence College in Rome She holds a PhD in International Politics from Humboldt University Berlin
